Contents

Foreword 7

Jiří Grygar
Kepler's Heritage in the International Year of Astronomy 2009 8

Kepler's Astronomia nova

J. V. Field
Kepler's Place in the History of Science 11

A. E. L. Davis
Kepler's Astronomia nova: a Geometrical Success Story 17

Sigurd Tønnessen
Kepler's Analysis of the Dynamics of Planetary Motion 24

Hiroshi Ozaki – Hiroshi Fukuda – Toshiaki Fujiwara
Kepler's Second Law in the Three-Body Problem 32

Jason Ross
Teaching the Astronomia nova: Computer Animations and Pedagogical Techniques 39

Kepler's Mathematics

Gerhard Betsch
Mathematical Subjects in the Correspondence of Kepler, Mästlin, and Wilhelm Schickard 49

Štefan Porubský
Prosthaphaeresis – a Forgotten Algorithm 63

Kepler and Prague

Antonín Švejda
Kepler's Four Residences in Prague 81

Olga Kotková
Portrait of a Man, possibly Johannes Kepler 91

Kepler's Contemporaries

Ernst-Reinhold Mewes
How to Perceive the Precession of the Earth's Axis by Means of Brahe's Star Catalogue – Hipparchos' Method Applied to Celestial Globes in Kepler's Era 95

Michael Rosa
How Really Precise and Accurate are Tycho Brahe's Data? 102

Josef Smolka
Tycho Brahe and Thaddaeus Hagecius in their Lettres II 114

Igor Janovský
Tycho Brahe's Death: Facts and Speculations 126

Tomáš Nejeschleba
The Relationship between Johannes Jessenius and Johannes Kepler 136

Alena Hadravová – Petr Hadrava
Kepler's Conversation with Galilei 143

Kepler's Heritage

Rostislav Rajchl
Astronomy in the Literary Works of Johannes Amos Comenius 154

Suzanne Débarbat
Kepler's Legacy among French Astronomers from 1609 to the Space Age 158

John McFarland
Let Us Share Johannes Kepler with the World 166

Mario Sergio Freitas – Marcos A. Florczak
An Amateur Observation of a Satellite as a Motivation to Learning Kepler's Third Law and Universal Gravitation 167

Terence J. Mahoney
The Creation of a New Astronomical Union Working Group Dedicated to Johannes Kepler 176

Contacts 178

Index personarum 182

Attached CD-ROM: full-text of this volume (PDF-file in colour), animations to some contributions, scan of Kepler's Astronomia nova (Heidelberg 1609)
