

# CONTENT

INTRODUCTION .....	8
1 THEORETICAL FRAMEWORK .....	9
1.1 Characteristics of biathlon .....	9
1.1.1 Biathlon sprint competition .....	10
1.2 Sport performance .....	11
1.2.1 Specific demands on sport performance in biathlon .....	13
1.3 The structure of complex sport performance in biathlon .....	15
1.3.1 Skiing speed .....	16
1.3.2 Range time .....	17
1.3.3 Shooting result .....	19
1.3.3.1 Factors affecting the shooting results .....	20
1.4 The stage of high-level sports training in biathlon .....	27
1.5 Biological rhythms .....	28
2 RESEARCH GOAL, HYPOTHESIS AND TASKS .....	33
2.1 Research goal .....	33
2.2 Research hypothesis .....	33
2.3 Research tasks .....	33
3 METHODOLOGY .....	34
3.1 The assessment of the research situation .....	34
3.2 Characteristics of the research object .....	35
3.3 Research conditions .....	36
3.4 Methods of data collection .....	36
3.5 Methods of data evaluation .....	37
3.5.1 Quantitative methods of data evaluation .....	38
3.5.2 Qualitative methods of data evaluation .....	38
4 RESULTS AND DISCUSSION .....	40
4.1 Dynamics of the sport performance parameter – course time lag .....	40
4.2 Dynamics of the sport performance parameter – shooting success rate .....	47
4.3 Dynamics of the sport performance parameter – preparation time for the first shot .....	52
4.4 Dynamics of the complex sport performance level .....	54
CONCLUSION .....	60
