

CONTENTS IN BRIEF

Contents vii

Preface xv

PART I OVERVIEW I

- CHAPTER 1 THE FACTS TO BE EXPLAINED 2
CHAPTER 2 A FRAMEWORK FOR ANALYSIS 30

PART II FACTOR ACCUMULATION 47

- CHAPTER 3 PHYSICAL CAPITAL 48
CHAPTER 4 POPULATION AND ECONOMIC GROWTH 83
CHAPTER 5 FUTURE POPULATION TRENDS 124
CHAPTER 6 HUMAN CAPITAL 154

PART III PRODUCTIVITY 185

- CHAPTER 7 MEASURING PRODUCTIVITY 186
CHAPTER 8 THE ROLE OF TECHNOLOGY IN GROWTH 209
CHAPTER 9 THE CUTTING EDGE OF TECHNOLOGY 244
CHAPTER 10 EFFICIENCY 275
CHAPTER 11 GROWTH IN THE OPEN ECONOMY 305

PART IV FUNDAMENTALS 337

- CHAPTER 12 GOVERNMENT 338
CHAPTER 13 INCOME INEQUALITY 370
CHAPTER 14 CULTURE 407
CHAPTER 15 GEOGRAPHY, CLIMATE, AND NATURAL RESOURCES 439
CHAPTER 16 RESOURCES AND THE ENVIRONMENT AT THE GLOBAL LEVEL 471

PART V CONCLUSION 511

- CHAPTER 17 WHAT WE HAVE LEARNED AND WHERE WE ARE HEADED 512

Preface xv

PART I OVERVIEW I**CHAPTER 1
THE FACTS TO BE EXPLAINED 2**1.1 Differences in the Level of Income
Among Countries 5

BOX: Total GDP Versus GDP per Capita 7

1.2 Differences in the Rate of Income
Growth Among Countries 9

Growth's Effect on the Level of Income 9

BOX: Working with Growth Rates 10

Growth During the Last 35 Years 13

BOX: Growth Versus Business Cycles 15

Growth Since 1820 16

Growth Before 1820 16

BOX: Income Inequality Between and Within
Countries 18BOX: Economic Growth as Seen from Outer
Space 20

1.3 Conclusion 22

APPENDIX Measuring and Comparing GDP
Using Purchasing Power Parity 26**CHAPTER 2
A FRAMEWORK FOR ANALYSIS 30**2.1 The Economics of Sylvania and
Freedonia: A Parable 30

2.2 From Parable to Practice 34

The Production Function 35

From Income Levels to Growth Rates 37

2.3 What Can We Learn from Data? 38

Scatter Plots and Correlations 39

BOX: Learning from Historical Data 42

2.4 Conclusion 44

**PART II FACTOR
ACCUMULATION 47****CHAPTER 3
PHYSICAL CAPITAL 48**

3.1 The Nature of Capital 50

3.2 Capital's Role in Production 51

Using a Production Function to Analyze
Capital's Role 51

BOX: Capital's Share of National Income 54

Factor Payments and Factor Shares 54

3.3 The Solow Model 56

Determination of Capital per Worker 57

BOX: The Rise and Fall of Capital 58

BOX: Measuring Change over Time 59

Steady States 60

BOX: Steady State: A Non-economic
Example 61The Solow Model as a Theory of Income
Differences 63The Solow Model as a Theory of Relative
Growth Rates 663.4 The Relationship Between Investment
and Saving 68Explaining the Saving Rate: Exogenous Versus
Endogenous Factors 70

The Effect of Income on Saving 71

BOX: Government Policy and the Saving Rate 72

BOX: The Rise and Fall of Capital Revisited 75

3.5 Conclusion 76

APPENDIX Further Exploration of the Cobb-Douglas Production Function and the Speed of Convergence in the Solow Model 80

CHAPTER 4

POPULATION AND ECONOMIC GROWTH 83

4.1 Population and Output Over the Long Run 85

Population Over the Long Run 85

The Malthusian Model 86

BOX: The Power of Population 87

The Breakdown of the Malthusian Model 91

4.2 Population Growth in the Solow Model 94

Population Growth and Capital Dilution 95

A Quantitative Analysis 96

4.3 Explaining Population Growth 99

Mortality Transition 99

Fertility Transition 102

The Interaction of Fertility and Mortality 103

4.4 Explaining the Fertility Transition 107

Reduced Fertility: The Means 107

BOX: Family-Planning Programs and Their Effects 109

Reduced Fertility: The Motives 111

4.5 Conclusion 115

APPENDIX A More Formal Description of the Total Fertility Rate, Life Expectancy, and Net Rate of Reproduction 119

CHAPTER 5

FUTURE POPULATION TRENDS 124

5.1 Forecasting Population 125

BOX: AIDS in Africa 128

Forecasting Mortality 128

Forecasting Fertility 130

BOX: The Tempo Effect 133

Demographic Momentum 135

Population in the Very Long Run 136

BOX: How Many People Can the Earth Support? 138

5.2 The Economic Consequences of Demographic Change 140

The Slowdown in Population Growth 140

Population Aging 141

Redrawing the World Map 146

BOX: Going for the Gold 148

5.3 Conclusion 150

CHAPTER 6

HUMAN CAPITAL 154

6.1 Human Capital in the Form of Health 155

The Effect of Health Differences on Income 155

Modeling the Interaction of Health and Income 157

6.2 Human Capital in the Form of Education 161

Changes in the Level of Education 161

BOX: Health and Income per Capita: Two Views 162

BOX: The Economic Effects of Malaria 164

Education and Wages 166

Human Capital's Share of Wages 167

BOX: The College Premium in the United States 168

6.3 How Much of the Variation in Income Across Countries Does Education Explain? 173

A Quantitative Analysis of the Impact of Schooling Differences Among Countries 173

6.4 Conclusion 180

BOX: Human Perfectability and the Growth Slowdown 181

PART III PRODUCTIVITY 185

CHAPTER 7

MEASURING PRODUCTIVITY 186

7.1 Productivity in the Production Function 187

7.2 Differences in the Level of Productivity Among Countries 190

Measuring Productivity Differences Among Countries 190

BOX: Problems with Measuring Capital—and Their Implications for Measuring Productivity 195

The Contribution of Productivity to Income Differences Among Countries 196

7.3 Differences in the Growth Rate of Productivity Among Countries 198

Measuring Countries' Productivity Growth 200

The Contribution of Productivity to Growth Differences Among Countries 202

7.4 Conclusion 204

BOX: A Tale of Two Cities 205

CHAPTER 8

THE ROLE OF TECHNOLOGY IN GROWTH 209

8.1 The Nature of Technological Progress 210

Technology Creation 211

BOX: Patents, Trade Secrets, and the Terminator Gene 212

Transfer of Technology 212

Determinants of Research and Development Spending 214

8.2 Modeling the Relationship Between Technology Creation and Growth 216

One-Country Model 216

Two-Country Model 220

BOX: International Technology Transfer 222

8.3 Barriers to International Technology Transfer 229

Appropriate Technology 229

Tacit Knowledge 231

8.4 Conclusion 233

BOX: Embodied Technological Progress and Leapfrogging 234

MATHEMATICAL APPENDIX Incorporating Technological Progress into the Solow Model 239

CHAPTER 9

THE CUTTING EDGE OF TECHNOLOGY 244

9.1 The Pace of Technological Change 245

Technological Progress Before the 18th Century 246

BOX: Some Milestones of Technological Progress 248

The Industrial Revolution 248

Technological Progress Since the Industrial Revolution 252

9.2 The Technology Production Function 254

BOX: General-Purpose Technologies 255

The Relationship Between Technology Level and the Speed of Technological Progress 257

BOX: Science and Technology 258

Decreasing Returns to Scale in Technology
Production 259

Implications for the Future of Technological
Progress 259

BOX: Where Is the Cutting Edge
of Technology? 261

9.3 Differential Technological Progress 263

Differential Technological Progress: Two
Theoretical Examples 263

BOX: Predicting Technological Progress 264

Technological Progress in the Real World:
Goods Versus Services 267

Technological Progress in the Real World:
Information Technology 268

9.4 Conclusion 269

MATHEMATICAL APPENDIX An Improved
Version of the Technology Production
Function 273

CHAPTER 10 EFFICIENCY 275

10.1 Decomposing Productivity into
Technology and Efficiency 276
Analyzing Cross-Country Data 277

10.2 Differences in Efficiency:
Case Studies 280
Central Planning in the
Soviet Union 280
Textiles in 1910 282
Cross-Country Differences in Productivity
by Industry 283
Subsurface Coal Mining in the United States,
1949–1994 285

10.3 Types of Inefficiency 286
Unproductive Activities 287
Idle Resources 288

Misallocation of Factors Among
Sectors 289

Misallocation of Factors Among Firms 294

BOX: Finance and Growth 296

Technology Blocking 297

BOX: Attack of the Patent Trolls 301

10.4 Conclusion 302

MATHEMATICAL APPENDIX Sectoral
Reallocation and the Growth Rate
of Aggregate Productivity (available online
at www.aw-bc.com/weil)

CHAPTER 11 GROWTH IN THE OPEN ECONOMY 305

11.1 Autarky Versus Openness 306
Measuring Output in an Open Economy 307
Globalization: The Facts 308
Globalization: The Causes 310
BOX: Tariffs, Quotas, and Other Trade
Restrictions 312

11.2 The Effect of Openness on Economic
Growth 313
Growth in Open Versus Closed
Economies 315
How Changes in Openness Affect
Growth 316
The Effect of Geographical Barriers
to Trade 317

11.3 Openness and Factor
Accumulation 318
Growth with Capital Mobility 319
Assessing the Free-Capital-Flow Model 321

11.4 Openness and Productivity 323
Trade as a Form of Technology 323
BOX: The Rise and Fall of Consolidated
Alchemy 324

Openness and Technological Progress 326

Openness and Efficiency 327

11.5 Opposition to Openness 329

BOX: Anti-Globalization 331

11.6 Conclusion 334

PART IV FUNDAMENTALS 337

CHAPTER 12

GOVERNMENT 338

12.1 Defining Government's Proper Role
in the Economy 342

The Case for Government Intervention
in the Economy 342

The Case Against Government Intervention
in the Economy 343

Swings of the Pendulum 344

12.2 How Government Affects
Growth 345

Rule of Law 346

Taxation, Efficiency, and the Size of
Government 347

Planning and Other Industrial Policies 351

BOX: The Other Path 352

BOX: Planning Is Not Always a Failure 353

12.3 Why Governments Do Things That Are
Bad for Growth 354

Some Other Goal 355

Corruption and Kleptocracy 355

Self-Preservation 357

BOX: Government Regulation: Helping Hand
or Grabbing Hand? 358

12.4 Why Poor Countries Have Bad
Governments 360

Causation Running from Income
to Government Quality 360

Causation Running from Government
Quality to Income 362

BOX: Democracy and Economic
Growth 364

12.5 Conclusion 366

CHAPTER 13

INCOME INEQUALITY 370

13.1 Income Inequality: The Facts 371

Using the Gini Coefficient to Measure
Income Inequality 372

The Kuznets Hypothesis 375

BOX: Is Growth Good for the Poor? 378

13.2 Sources of Income Inequality 380

Explaining the Recent Rise in Income
Inequality 386

13.3 Effect of Income Inequality
on Economic Growth 388

Effect on the Accumulation of Physical
Capital 388

Effect on the Accumulation of Human
Capital 389

Income Inequality, Income Redistribution,
and Efficiency 392

Sociopolitical Unrest in Response to Income
Inequality 396

Empirical Evidence 397

13.4 Beyond Income Distribution: Economic
Mobility 400

13.5 Conclusion 403

CHAPTER 14

CULTURE 407

14.1 The Effect of Culture on Economic
Growth 408

Openness to New Ideas 408

Hard Work 410

Saving for the Future 411

Trust 412

BOX: What Parking Tickets Say About Culture 413

BOX: Pitfalls of Cultural Explanations for Economic Growth 415

Social Capital 417

BOX: Importance of Social Capital at the Village Level 418

Social Capability 419

BOX: Changes in Appropriate Culture 422

14.2 What Determines Culture? 424

Climate and Natural Resources 424

Cultural Homogeneity and Social Capital 425

Population Density and Social Capability 428

14.3 Cultural Change 430

Economic Growth and Cultural Change 430

BOX: Determinants of Cooperation: An Experimental Approach 431

Government Policy and Cultural Change 433

14.4 Conclusion 435

CHAPTER 15

GEOGRAPHY, CLIMATE, AND NATURAL RESOURCES 439

15.1 Geography 440

Location, Trade, and Growth 441

Geographic Concentration and Spillovers 443

BOX: Guns, Germs, and Geography 444

Geography's Effect on Government 446

15.2 Climate 449

Climate and Agricultural Productivity 452

Climate and Disease 454

Climate and Human Effort 457

15.3 Natural Resources 458

The Relationship Between Natural Resources and Growth 458

Explanations for the Resource Curse 461

15.4 Conclusion 465

BOX: Resources and Early Industrial Development: The Case of Coal 467

CHAPTER 16

RESOURCES AND THE ENVIRONMENT AT THE GLOBAL LEVEL 471

16.1 Natural Resource Concepts 472

Nonrenewable Resources 472

Renewable Resources 475

Property Rights over Resources 477

Resources and Production 479

16.2 Incorporating Natural Resources into the Analysis of Economic Growth 481

Revising National Accounts 482

BOX: Resource Disasters 484

Resource Prices 486

BOX: The Bet 490

Why Resource Limitations Do Not Prevent Economic Growth 490

BOX: Resource-Saving Technologies 494

16.3 Growth and the Environment 495

The Environmental Kuznets Curve 496

Global Warming 499

BOX: The Environmental Kuznets Curve in London 500

16.4 Conclusion 504

MATHEMATICAL APPENDIX Technological Improvement Versus Resource Depletion 508

CHAPTER 17

**WHAT WE HAVE LEARNED
AND WHERE WE ARE HEADED 512**

- 17.1 What We Have Learned 512
 - Factor Accumulation 513
 - Productivity 513
 - Fundamentals 515
- 17.2 What the Future Holds 516
 - What Will Happen to the World Income Distribution? 517
 - Will Technological Progress Continue Apace? 517

BOX: Will Growth Make Us Happy? 518

- What Is the Future of World Demographics? 521
- Will Global Economic Integration Continue? 521
- Will Shortages of Natural Resources Constrain Economic Growth? 522

17.3 A Final Thought 522

References 523

Glossary 537

Index 543

Credits 565
