CONTENTS

PREFACE XIII

1 INTRODUCTION: THE FACTS OF ECONOMIC GROWTH 1

1.1 THE DATA OF GROWTH AND DEVELOPMENT 3

1.2 OTHER "STYLIZED FACTS" 13

1.3 THE REMAINDER OF THIS BOOK 18

2 THE SOLOW MODEL 20

2.1 THE BASIC SOLOW MODEL 22

2.1.1 Solving the Basic Solow Model 26

2.1.2 The Solow Diagram 27

2.1.3 Comparative Statics 30

2.1.4 Properties of the Steady State 32

2.1.5 Economic Growth in the Simple Model 34

2.2 TECHNOLOGY AND THE SOLOW MODEL 36

2.2.1 The Solow Diagram with Technology 38

2.2.2 Solving for the Steady State 39

2.3 EVALUATING THE SOLOW MODEL 43

2.4 GROWTH ACCOUNTING, THE PRODUCTIVITY SLOWDOWN, AND THE NEW ECONOMY 45

APPENDIX: CLOSED-FORM SOLUTION OF THE SOLOW MODEL 50

EXERCISES 51

3 EMPIRICAL APPLICATIONS OF NEOCLASSICAL GROWTH MODELS 54

3.1 THE SOLOW MODEL WITH HUMAN CAPITAL 54

3.2 CONVERGENCE AND EXPLAINING DIFFERENCES IN GROWTH RATES 63

3.3 THE EVOLUTION OF THE INCOME DISTRIBUTION 71

EXERCISES 75

4 THE ECONOMICS OF IDEAS 78

4.1 WHAT IS TECHNOLOGY? 79

4.2 THE ECONOMICS OF IDEAS 80

4.3 INTELLECTUAL PROPERTY RIGHTS AND THE INDUSTRIAL REVOLUTION 86

4.4 DATA ON IDEAS 91

4.5 SUMMARY 94

EXERCISES 94

5 THE ENGINE OF GROWTH 96

5.1 THE BASIC ELEMENTS OF THE MODEL 97

5.1.1 Growth in the Romer Model 101

5.1.2 Growth Effects versus Level Effects 106

5.1.3 Comparative Statics: A Permanent Increase in the R&D Share 106

5.2 THE ECONOMICS OF THE MODEL 110
5.2.1 The Final-Goods Sector 111
5.2.2 The Intermediate-Goods Sector 113
5.2.3 The Research Sector 115
5.2.4 Solving the Model 116
5.3 OPTIMAL R&D 118
5.4 SUMMARY 120
APPENDIX: SOLVING FOR THE R&D SHARE 122
EXERCISES 123

6 A SIMPLE MODEL OF GROWTH AND DEVELOPMENT 124

6.1 THE BASIC MODEL 124
6.2 STEADY-STATE ANALYSIS 127
6.3 TECHNOLOGY TRANSFER 131
6.4 UNDERSTANDING DIFFERENCES IN GROWTH RATES 132
EXERCISES 134

7 SOCIAL INFRASTRUCTURE AND LONG-RUN ECONOMIC PERFORMANCE 136

7.1 A BUSINESS INVESTMENT PROBLEM 137
7.2 DETERMINANTS OF F 138
7.3 DETERMINANTS OF Π 140
7.4 WHICH INVESTMENTS TO MAKE? 142
7.5 EMPIRICAL EVIDENCE 143
7.6 THE CHOICE OF SOCIAL INFRASTRUCTURE 147
7.7 GROWTH MIRACLES AND DISASTERS 149
7.8 SUMMARY 153
EXERCISES 154

8 ALTERNATIVE THEORIES OF ENDOGENOUS GROWTH 156

8.1 A SIMPLE ENDOGENOUS GROWTH MODEL: THE "AK" MODEL 157

8.2 INTUITION AND OTHER GROWTH MODELS 160

8.3 EXTERNALITIES AND AK MODELS 161

8.4 EVALUATING ENDOGENOUS GROWTH MODELS 164

8.5 WHAT IS ENDOGENOUS GROWTH? 166

EXERCISES 167

9 NATURAL RESOURCES AND ECONOMIC GROWTH 169

9.1 LAND IN THE SOLOW MODEL 170

9.2 NONRENEWABLE RESOURCES 173

9.2.1 Setup 173

9.2.2 The Balanced Growth Path 176

9.3 QUANTIFYING THE IMPORTANCE OF NATURAL RESOURCES 178

9.4 PRICES AS INDICATORS OF SCARCITY 180

9.5 IMPLICATIONS AND EXPLANATIONS OF DECLINING FACTOR SHARES 185

9.6 SUMMARY 189

EXERCISES 190

10 UNDERSTANDING ECONOMIC GROWTH 193

10.1 WHY ARE WE SO RICH AND THEY SO POOR? 194

10.2 WHAT IS THE ENGINE OF ECONOMIC GROWTH? 195

10.3 HOW DO WE UNDERSTAND GROWTH MIRACLES? 195

10.4 CONCLUSION 196

APPENDIX A MATHEMATICAL REVIEW 199

A.1 DERIVATIVES 199

A.1.1 What Does $\dot{K}$ Mean? 199

A.1.2 What Is a Growth Rate? 200

A.1.3 Growth Rates and Natural Logs 201

A.1.4 "Take Logs and Derivatives" 202

A.1.5 Ratios and Growth Rates 202

A.1.6 Δlog versus Percentage Change 203

A.2 INTEGRATION 204

A.2.1 An Important Rule of Integration 205

A.3 SIMPLE DIFFERENTIAL EQUATIONS 205

A.3.1 Compound Interest 208

A.4 MAXIMIZATION OF A FUNCTION 209

EXERCISES 211

APPENDIX B READINGS OF INTEREST 213

APPENDIX C DATA ON ECONOMIC GROWTH 215

BIBLIOGRAPHY 221

INDEX 227
