1 Visions of the Future

Introduction

1

The Self-Extinction Premise

1

EXAMPLE 1.1 *Historical Examples of Societal Self-Extinction*

2

Future Environmental Challenges

3

Climate Change

3

Water Accessibility

4

Meeting the Challenges

5

How Will Societies Respond?

6

The Role of Economics

6

DEBATE 1.1 *Ecological Economics versus Environmental Economics*

7

The Use of Models

8

EXAMPLE 1.2 *Experimental Economics: Studying Human Behavior in a Laboratory*

9

The Road Ahead

9

The Issues

10

DEBATE 1.2 *What Does the Future Hold?*

11

An Overview of the Book

11

Summary 13 • Discussion Questions 14 • Self-Test Exercise 14

• Further Reading 14

2 The Economic Approach: Property Rights, Externalities, and Environmental Problems

16

Introduction

16

The Human–Environment Relationship

17

The Environment as an Asset

17

The Economic Approach

19

EXAMPLE 2.1 *Economic Impacts of Reducing Hazardous Pollutant Emissions from Iron and Steel Foundries*

20

Environmental Problems and Economic Efficiency	20
Static Efficiency	20
Property Rights	22
Property Rights and Efficient Market Allocations	22
Efficient Property Rights Structures	23
Producer's Surplus, Scarcity Rent, and Long-Run Competitive Equilibrium	24
Externalities as a Source of Market Failure	25
The Concept Introduced	25
Types of Externalities	26
EXAMPLE 2.2 <i>Shrimp Farming Externalities in Thailand</i>	27
Improperly Designed Property Rights Systems	28
Other Property Rights Regimes	28
Public Goods	31
Imperfect Market Structures	33
EXAMPLE 2.3 <i>Public Goods Privately Provided: The Nature Conservancy</i>	34
Government Failure	35
DEBATE 2.1 <i>How Should OPEC Price Its Oil?</i>	36
The Pursuit of Efficiency	38
Private Resolution through Negotiation	38
The Courts: Property Rules and Liability Rules	39
Legislative and Executive Regulation	41
An Efficient Role for Government	42
<i>Summary 43 • Discussion Questions 43 • Self-Test Exercises 44</i>	
• <i>Further Reading 45</i>	

Evaluating Trade-Offs: Benefit–Cost Analysis and Other Decision-Making Metrics 46

Introduction	46
Normative Criteria for Decision Making	46
Evaluating Predefined Options: Benefit–Cost Analysis	46
EXAMPLE 3.1 <i>Valuing Ecological Services from Preserved Tropical Forests</i>	48
Finding the Optimal Outcome	48
Relating Optimality to Efficiency	50
Comparing Benefits and Costs Across Time	52
Dynamic Efficiency	53
Applying the Concepts	54
Pollution Control	54
EXAMPLE 3.2 <i>Does Reducing Pollution Make Economic Sense?</i>	
<i>Evidence from the Clean Air Act</i>	54
Preservation versus Development	56
EXAMPLE 3.3 <i>Choosing between Preservation and Development in Australia</i>	57
Issues in Benefit Estimation	57

Approaches to Cost Estimation	58
The Treatment of Risk	59
Distribution of Benefits and Costs	61
Choosing the Discount Rate	62
EXAMPLE 3.4 <i>The Importance of the Discount Rate</i>	63
Divergence of Social and Private Discount Rates	64
A Critical Appraisal	65
Cost-Effectiveness Analysis	66
EXAMPLE 3.5 <i>NO₂ Control in Chicago: An Example of Cost-Effectiveness Analysis</i>	68
Impact Analysis	68
Summary 69 • Discussion Questions 70 • Self-Test Exercises 71	
• Further Reading 71	
Appendix: The Simple Mathematics of Dynamic Efficiency	73
4 Valuing the Environment: Methods	74
Introduction	74
Why Value the Environment?	75
DEBATE 4.1 <i>Should Humans Place an Economic Value on the Environment?</i>	76
Valuing Environmental Services: Pollination as an Example	76
EXAMPLE 4.1 <i>Valuing Ecosystem Services: Pollination, Food Security, and the Collapse of Honeybee Colonies</i>	77
Valuation	78
Types of Values	79
EXAMPLE 4.2 <i>Historical Example: Valuing the Northern Spotted Owl</i>	81
Classifying Valuation Methods	82
Stated Preference Methods	83
DEBATE 4.1 <i>Willingness to Pay versus Willingness to Accept: Why So Different?</i>	86
EXAMPLE 4.3 <i>Leave No Behavioral Trace: Using the Contingent Valuation Method to Measure Passive-Use Values</i>	89
Revealed Preference Methods	90
Travel Cost Method	90
Hedonic Property Value and Hedonic Wage Methods	91
Averting Expenditures	92
Using Geographic Information Systems for Economic Valuation	92
EXAMPLE 4.4 <i>Valuing Damage from Groundwater Contamination Using Averting Expenditures</i>	92
EXAMPLE 4.5 <i>Using GIS to Inform Hedonic Property Values: Visualizing the Data</i>	94
DEBATE 4.2 <i>Is Valuing Human Life Immoral?</i>	95
Summary: Nonmarket Valuation Today 98 • Discussion Questions 99	
• Self-Test Exercises 99 • Further Reading 100	

5	Dynamic Efficiency and Sustainable Development	102
	Introduction	102
	A Two-Period Model	103
	Defining Intertemporal Fairness	107
	Are Efficient Allocations Fair?	108
	EXAMPLE 5.1 <i>The Alaska Permanent Fund</i>	110
	Applying the Sustainability Criterion	110
	EXAMPLE 5.2 <i>Nauru: Weak Sustainability in the Extreme</i>	112
	Implications for Environmental Policy	113
	<i>Summary</i> 114 • <i>Discussion Question</i> 115 • <i>Self-Test Exercises</i> 115	
	• <i>Further Reading</i> 116	
	Appendix: The Mathematics of the Two-Period Model	117

6	Depletable Resource Allocation: The Role of Longer Time Horizons, Substitutes, and Extraction Cost	118
	Introduction	118
	A Resource Taxonomy	119
	Efficient Intertemporal Allocations	123
	The Two-Period Model Revisited	123
	The N-Period Constant-Cost Case	124
	Transition to a Renewable Substitute	125
	Increasing Marginal Extraction Cost	127
	Exploration and Technological Progress	129
	EXAMPLE 6.1 <i>Historical Example of Technological Progress in the Iron Ore Industry</i>	130
	Market Allocations of Depletable Resources	131
	Appropriate Property Rights Structures	131
	Environmental Costs	132
	<i>Summary</i> 134 • <i>Discussion Question</i> 135 • <i>Self-Test Exercises</i> 135	
	• <i>Further Reading</i> 136	
	Appendix: Extensions of the Constant Extraction cost Depletable Resource Model: Longer Time Horizons and the Role of an Abundant Substitute	137

7	Energy: The Transition from Depletable to Renewable Resources	140
	Introduction	140
	EXAMPLE 7.1 <i>Hubbert's Peak</i>	141
	Natural Gas: Price Controls	142
	Oil: The Cartel Problem	146
	Price Elasticity of Oil Demand	147

Income Elasticity of Oil Demand	148
Non-OPEC Suppliers	148
Compatibility of Member Interests	149
Fossil Fuels: Climate Considerations and National Security	151
The Climate Dimension	151
The National Security Dimension	152
DEBATE 7.1 <i>How Should the United States Deal with the Vulnerability of Its Imported Oil?</i>	154
EXAMPLE 7.2 <i>Strategic Petroleum Reserve</i>	156
The Other Depletable Sources: Unconventional Oil and Gas, Coal, and Nuclear Energy	157
Unconventional Oil and Gas Sources	157
EXAMPLE 7.3 <i>Fuel from Shale: The Bakken Formation</i>	158
Coal	159
Uranium	159
Electricity	163
EXAMPLE 7.4 <i>Electricity Deregulation in California: What Happened?</i>	166
EXAMPLE 7.5 <i>Tradable Energy Credits: The Texas Experience</i>	167
EXAMPLE 7.6 <i>Feed-in Tariffs</i>	168
Energy Efficiency	169
Transitioning to Renewables	170
Hydroelectric Power	170
Wind	171
Photovoltaics	171
DEBATE 7.2 <i>Dueling Externalities: Should the United States Promote Wind Power?</i>	172
Active and Passive Solar Energy	172
Ocean Tidal Power	173
Liquid Biofuels	173
Geothermal Energy	174
Hydrogen	174
<i>Summary</i> 176 • <i>Discussion Questions</i> 177 • <i>Self-Test Exercises</i> 177	
• <i>Further Reading</i> 178	

8 Recyclable Resources: Minerals, Paper, Bottles, and E-Waste **180**

Introduction	180
An Efficient Allocation of Recyclable Resources	180
Extraction and Disposal Cost	180
Recycling: A Closer Look	182
Recycling and Ore Depletion	183
Factors Mitigating Resource Scarcity	184
Exploration and Discovery	184

EXAMPLE 8.1 <i>Lead Recycling</i>	185
Technological Progress	186
Substitution	186
EXAMPLE 8.2 <i>The Bet</i>	188
Market Imperfections	188
Disposal Cost and Efficiency	189
The Disposal Decision	189
Disposal Costs and the Scrap Market	191
Subsidies on Raw Materials	191
Corrective Public Policies	192
EXAMPLE 8.3 <i>Pricing Trash in Marietta, Georgia</i>	192
DEBATE 8.1 <i>“Bottle Bills”: Economic Incentives at Work?</i>	194
EXAMPLE 8.4 <i>Implementing the “Take-Back” Principle</i>	196
Markets for Recycled Materials	197
E-Waste	197
Pollution Damage	200
<i>Summary</i> 201 • <i>Discussion Questions</i> 202 • <i>Self-Test Exercises</i> 202	
• <i>Further Reading</i> 203	

9 Replenishable but Depletable Resources: Water 204

Introduction	204
The Potential for Water Scarcity	205
The Efficient Allocation of Scarce Water	208
Surface Water	209
Groundwater	211
The Current Allocation System	212
Riparian and Prior Appropriation Doctrines	212
Sources of Inefficiency	214
DEBATE 9.1 <i>What Is the Value of Water?</i>	218
Potential Remedies	219
Water Transfers and Water Markets	219
EXAMPLE 9.1 <i>Using Economic Principles to Conserve Water in California</i>	220
EXAMPLE 9.2 <i>Water Transfers in Colorado: What Makes a Market for Water Work?</i>	221
EXAMPLE 9.3 <i>Water Market Assessment: Australia, Chile, South Africa, and the United States</i>	222
Instream Flow Protection	223
Water Prices	223
EXAMPLE 9.4 <i>Reserving Instream Rights for Endangered Species</i>	224
EXAMPLE 9.5 <i>Water Pricing in Canada</i>	229
Desalination	230
Summary	231
DEBATE 9.2 <i>Should Water Systems Be Privatized?</i>	232

GIS and Water Resources	233
<i>Summary</i> 233 • <i>Discussion Questions</i> 234 • <i>Problems</i> 234	
• <i>Further Reading</i> 235	

10 A Locationally Fixed, Multipurpose Resource: Land

237

Introduction	237
The Economics of Land Allocation	238
Land Use	238
Land-Use Conversion	239
Sources of Inefficient Use and Conversion	240
Sprawl and Leapfrogging	240
Incompatible Land Uses	242
Undervaluing Environmental Amenities	242
The Influence of Taxes on Land-Use Conversion	243
DEBATE 10.1 <i>Should Landowners Be Compensated for “Regulatory Takings”?</i>	244
Market Power	245
Special Problems in Developing Countries	246
DEBATE 10.2 <i>What Is a “Public Purpose”?</i>	247
Innovative Market-Based Policy Remedies	249
Establishing Property Rights	249
Transferable Development Rights	249
Wetlands Banking	250
EXAMPLE 10.1 <i>Controlling Land Development with TDRs</i>	250
Conservation Banking	251
EXAMPLE 10.2 <i>Conservation Banking: The Gopher Tortoise</i>	
<i>Conservation Bank</i>	252
Safe Harbor Agreements	252
Grazing Rights	253
Conservation Easements	253
Land Trusts	254
EXAMPLE 10.3 <i>Using a Community Land Trust to Protect Farmland</i>	255
Development Impact Fees	256
Property Tax Adjustments	256
DEBATE 10.3 <i>Does Ecotourism Provide a Pathway to Sustainability?</i>	257
EXAMPLE 10.4 <i>Trading Water for Beehives and Barbed Wire in Bolivia</i>	258
EXAMPLE 10.5 <i>Tax Strategies to Reduce Inefficient Land Conversion:</i>	
<i>Maine’s Open Space Program</i>	259
<i>Summary</i> 258 • <i>Discussion Questions</i> 260 • <i>Self-Test Exercises</i> 260	
• <i>Further Reading</i> 261	

11

Reproducible Private Property Resources: Agriculture and Food Security

Introduction	262
Global Scarcity	263
Formulating the Global Scarcity Hypothesis	264
Testing the Hypotheses	266
Outlook for the Future	267
EXAMPLE 11.1 <i>Can Eco-Certification Make a difference? Organic Costa Rican Coffee</i>	277
DEBATE 11.1 <i>When Organic Goes Mainstream: Do You Get What You Pay For?</i>	278
The Role of Agricultural Policies	278
Summing Up: Agriculture in the Industrialized Nations	280
DEBATE 11.2 <i>Should Genetically Modified Organisms Be Banned?</i>	281
EXAMPLE 11.2 <i>Are Consumers Willing to Pay a Premium for GMO-Free Foods?</i>	282
Distribution of Food Resources	282
Defining the Problem	283
Domestic Production in Developing Countries	283
Climate Change	286
Feast and Famine Cycles	286
<i>Summary</i> 290 • <i>Discussion Questions</i> 291 • <i>Self-Test Exercises</i> 291	
• <i>Further Reading</i> 292	

12

Storable, Renewable Resources: Forests

Introduction	293
Characterizing Forest Harvesting Decisions	294
Special Attributes of the Timber Resource	294
The Biological Dimension	295
The Economics of Forest Harvesting	296
Extending the Basic Model	299
Sources of Inefficiency	301
Perverse Incentives for the Landowner	301
Perverse Incentives for Nations	304
Poverty and Debt	305
Sustainable Forestry	306
Public Policy	307

EXAMPLE 12.1 <i>Producing Sustainable Forestry through Certification</i>	308
EXAMPLE 12.2 <i>Conservation Easements in Action: The Blackfoot Community Project</i>	310
Royalty Payments	311
Carbon Sequestration Credits	311
EXAMPLE 12.3 <i>Does Pharmaceutical Demand Offer Sufficient Protection to Biodiversity?</i>	312
EXAMPLE 12.4 <i>Reducing Emissions from Deforestation and Forest Degradation (REDD): A Twofer?</i>	313
EXAMPLE 12.5 <i>Trust Funds for Habitat Preservation</i>	314
Summary 314 • Discussion Questions 316 • Self-Test Exercises 316	
• Further Reading 317	
<i>Appendix: The Harvesting Decision: Forests</i>	318
13 Common-Pool Resources: Fisheries and Other Commercially Valuable Species	320
Introduction	320
Efficient Allocations	321
The Biological Dimension	321
Static Efficient Sustainable Yield	323
Dynamic Efficient Sustainable Yield	325
Appropriability and Market Solutions	327
EXAMPLE 13.1 <i>Open-Access Harvesting of the Minke Whale</i>	330
EXAMPLE 13.2 <i>Harbor Gangs of Maine and Other Informal Arrangements</i>	331
Public Policy toward Fisheries	332
Aquaculture	332
DEBATE 13.1 <i>Aquaculture: Does Privatization Cause More Problems than It Solves?</i>	335
Raising the Real Cost of Fishing	336
Taxes	338
Individual Transferable Quotas (ITQs) and Catch Shares	339
EXAMPLE 13.3 <i>The Relative Effectiveness of Transferable Quotas and Traditional Size and Effort Restrictions in the Atlantic Sea Scallop Fishery</i>	344
Subsidies and Buybacks	345
Marine-Protected Areas and Marine Reserves	345
The 200-Mile Limit	347
The Economics of Enforcement	347
Preventing Poaching	349
DEBATE 13.2 <i>Bluefin Tuna: Is Its High Price Part of the Problem or Part of the Solution?</i>	350
EXAMPLE 13.4 <i>Local Approaches to Wildlife Protection: Zimbabwe</i>	352
Summary 351 • Discussion Questions 353 • Self-Test Exercises 353	
• Further Reading 354	
<i>Appendix: The Harvesting Decision: Fisheries</i>	356

14	Economics of Pollution Control: An Overview	359
	Introduction	359
	A Pollutant Taxonomy	359
	Defining the Efficient Allocation of Pollution	361
	Stock Pollutants	361
	Fund Pollutants	362
	Market Allocation of Pollution	365
	Efficient Policy Responses	366
	EXAMPLE 14.1 <i>Environmental Taxation in China</i>	367
	Cost-Effective Policies for Uniformly Mixed Fund Pollutants	368
	Defining a Cost-Effective Allocation	368
	Cost-Effective Pollution-Control Policies	370
	DEBATE 14.1 <i>Should Developing Countries Rely on Market-Based Instruments to Control Pollution?</i>	375
	Cost-Effective Policies for Nonuniformly	
	Mixed Surface Pollutants	376
	The Single-Receptor Case	376
	EXAMPLE 14.2 <i>Emissions Trading in Action: The NO_x Budget Program</i>	377
	The Many-Receptors Case	381
	Other Policy Dimensions	383
	The Revenue Effect	383
	EXAMPLE 14.3 <i>The Swedish Nitrogen Charge</i>	384
	EXAMPLE 14.4 <i>RGGI Revenue: The Maine Example</i>	385
	Responses to Changes in the Regulatory Environment	386
	Price Volatility	387
	Instrument Choice under Uncertainty	387
	Product Charges: An Indirect Form of Environmental Taxation	388
	EXAMPLE 14.5 <i>The Irish Bag Levy</i>	389
	Summary 390 • Discussion Question 391 • Self-Test Exercises 392	
	• Further Reading 393	
	Appendix: The Simple Mathematics of Cost-Effective Pollution Control	395

15	Stationary-Source Local and Regional Air Pollution	397
	Introduction	397
	Conventional Pollutants	397
	The Command-and-Control Policy Framework	398
	The Efficiency of the Command-and-Control Approach	400
	DEBATE 15.1 <i>Does Sound Policy Require Targeting New Sources via the New Source Review?</i>	401
	DEBATE 15.2 <i>The Particulate and Smog Ambient Standards Controversy</i>	402
	Cost-Effectiveness of the Command-and-Control Approach	404

EXAMPLE 15.1 <i>Controlling SO₂ Emissions by Command-and-Control in Germany</i>	406
Air Quality	407
Innovative Approaches	409
Smog Trading (RECLAIM)	409
Emissions Charges	410
Regional Pollutants	411
Acid Rain	412
EXAMPLE 15.2 <i>Adirondack Acidification</i>	413
EXAMPLE 15.3 <i>The Sulfur Allowance Trading Program</i>	415
EXAMPLE 15.4 <i>Why and How Do Environmentalists Buy Pollution?</i>	417
EXAMPLE 15.5 <i>Technology Diffusion in the Chlorine-Manufacturing Sector</i>	420
Summary 419 • Discussion Questions 421 • Self-Test Exercises 422	
• Further Reading 422	

16 Climate Change 424

Introduction	424
The Science of Climate Change	425
Negotiations over Climate Change Policy	427
Characterizing the Broad Strategies	427
DEBATE 16.1 <i>Should Carbon Sequestration in the Terrestrial Biosphere Be Credited?</i>	428
The Precedent: Reducing Ozone-Depleting Gases	428
EXAMPLE 16.1 <i>Tradable Permits for Ozone-Depleting Chemicals</i>	430
The Policy Focus of the Climate Change Negotiations	431
The Evolution of International Agreements on Climate Change	432
EXAMPLE 16.2 <i>The European Union Emissions Trading System (EU ETS)</i>	433
Complementary Strategies	434
Controversies	435
DEBATE 16.2 <i>Is Global Greenhouse Gas Trading Immoral?</i>	435
Policy Timing	436
Creating Incentives for Participation in Climate Change	
Agreements	437
Summary 438 • Discussion Question 440 • Self-Test Exercises 440	
• Further Reading 440	

17 Mobile-Source Air Pollution 442

Introduction	442
The Economics of Mobile-Source Pollution	444
Implicit Subsidies	444
Externalities	445
Consequences	446

Policy toward Mobile Sources	446
History	446
Structure of the U.S. Approach	447
CAFE Standards	449
DEBATE 17.1 <i>CAFE Standards or Fuel Taxes?</i>	451
Alternative Fuels and Vehicles	452
EXAMPLE 17.1 <i>Project XL—The Quest for Effective, Flexible Regulation</i>	452
European Approaches	453
EXAMPLE 17.2 <i>Car-Sharing: Better Use of Automotive Capital?</i>	454
An Economic and Political Assessment	455
Technology Forcing and Sanctions	456
Differentiated Regulation	457
Uniformity of Control	457
The Deterioration of New-Car Emissions Rates	457
Lead Phaseout Program	459
EXAMPLE 17.3 <i>Getting the Lead Out: The Lead Phaseout Program</i>	460
Possible Reforms	460
Fuel Taxes	460
Congestion Pricing	461
EXAMPLE 17.4 <i>Zonal Mobile-Source Pollution-Control Strategies: Singapore</i>	463
Private Toll Roads	463
Parking Cash-Outs	464
Feebates	464
Pay-As-You-Drive (PAYD) Insurance	464
Accelerated Retirement Strategies	464
EXAMPLE 17.5 <i>Modifying Car Insurance as an Environmental Strategy</i>	465
EXAMPLE 17.6 <i>The Car Allowance Rebate System: Did it Work?</i>	466
EXAMPLE 17.7 <i>Counterproductive Policy Design</i>	467
<i>Summary</i> 467 • <i>Discussion Questions</i> 469 • <i>Self-Test Exercises</i> 469	
• <i>Further Reading</i> 469	

18 Water Pollution	471
Introduction	471
Nature of Water Pollution Problems	472
Types of Waste-Receiving Water	472
Sources of Contamination	472
Types of Pollutants	476
DEBATE 18.1 <i>Toxics in Fish Tissue: Do Fish-Consumption Advisories Change Behavior?</i>	478
Traditional Water Pollution Control Policy	479
Early Legislation	480
Subsequent Legislation	481

The TMDL Program	483
The Safe Drinking Water Act	483
Ocean Pollution	484
Citizen Suits	485
Efficiency and Cost-Effectiveness	485
Ambient Standards and the Zero-Discharge Goal	485
National Effluent Standards	486
Watershed-Based Trading	490
EXAMPLE 18.1 <i>Effluent Trading for Nitrogen in Long Island Sound</i>	492
Municipal Wastewater Treatment Subsidies	493
Pretreatment Standards	494
Nonpoint Source Pollution	494
Atmospheric Deposition of Pollution	497
The European Experience	498
Developing Country Experience	499
EXAMPLE 18.2 <i>Economic Incentives for Water Pollution Control:</i>	
<i>The Case of Colombia</i>	500
Oil Spills from Tankers	500
Citizen Suits	502
An Overall Assessment	503
<i>Summary</i> 504 • <i>Discussion Questions</i> 505 • <i>Self-Test Exercises</i> 506	
• <i>Further Reading</i> 506	

19 Toxic Substances and Environmental Justice 508

Introduction	508
Nature of Toxic Substance Pollution	509
Health Effects	510
Policy Issues	510
EXAMPLE 19.1 <i>The Arduous Path to Managing Risk: Bisphenol A</i>	512
Market Allocations and Toxic Substances	512
Occupational Hazards	513
EXAMPLE 19.2 <i>Susceptible Populations in the</i>	
<i>Hazardous Workplace</i>	515
Product Safety	516
Third Parties	517
The Incidence of Hazardous Waste Siting Decisions	518
History	518
Recent Research and the Emerging Role of Analysis Using GIS	519
The Economics of Site Location	520
EXAMPLE 19.3 <i>Do New Polluting Facilities Affect</i>	
<i>Housing Values and Incomes? Evidence in New England</i>	520
EXAMPLE 19.4 <i>Which Came First—The Toxic Facility or the Minority</i>	
<i>Neighborhood?</i>	522
The Policy Response	522

Creating Incentives through Common Law 525

DEBATE 19.1 *Does Offering Compensation for Accepting an Environmental Risk Always Increase the Willingness to Accept the Risk?* 526

Statutory Law 527

The Toxic Release Inventory Program 529

Proposition 65 530

International Agreements 530

EXAMPLE 19.5 *Regulating through Mandatory Disclosure: The Case of Lead* 531

The Efficiency of the Statutory Law 532

Performance Bonds: An Innovative Proposal 534

Summary 535 • *Discussion Questions* 536 • *Self-Test Exercises* 537

• *Further Reading* 537

20

The Quest for Sustainable Development 538

Introduction 538

Sustainability of Development 539

Market Allocations 541

Efficiency and Sustainability 542

Trade and the Environment 545

EXAMPLE 20.1 *Has NAFTA Improved the Environment in Mexico?* 548

Trade Rules under GATT and the WTO 550

DEBATE 20.1 *Should an Importing Country Be Able to Use Trade Restrictions to Influence Harmful Fishing Practices in an Exporting Nation?* 551

The Natural Resource Curse 551

EXAMPLE 20.2 *The “Natural Resource Curse” Hypothesis* 552

The Growth–Development Relationship 552

Conventional Measures 553

Alternative Measures 555

EXAMPLE 20.3 *Happiness Economics: Does Money Buy Happiness?* 560

Summary 561 • *Discussion Questions* 562 • *Self-Test Exercise* 563

• *Further Reading* 563

21

Population and Development 564

Introduction 564

Historical Perspective 565

World Population Growth 565

Population Growth in the United States 565

Effects of Population Growth on Economic Development 568

The Population/Environment Connection 574

DEBATE 21.1 *Does Population Growth Inevitably Degrade the Environment?* 575

Effects of Economic Development on Population Growth 576

The Economic Approach to Population Control	578
EXAMPLE 21.1 <i>Achieving Fertility Declines in Low-Income Countries: The Case of Kerala</i>	583
Urbanization	584
EXAMPLE 21.2 <i>Income-Generating Activities as Fertility Control: Bangladesh</i>	585
Using GIS to Map Population Data	586
Summary 586 • Discussion Questions 587 • Self-Test Exercises 587 • Further Reading 588	

22

Visions of the Future Revisited	589
Addressing the Issues	589
Conceptualizing the Problem	589
Institutional Responses	591
EXAMPLE 22.1 <i>Private Incentives for Sustainable Development: Can Adopting Sustainable Practices Be Profitable?</i>	592
Sustainable Development	594
EXAMPLE 22.2 <i>Public-Private Partnerships: The Kalundborg Experience</i>	596
A Concluding Comment	598
Discussion Questions	599
<i>Answers to Self Test Exercises</i>	600
<i>Glossary</i>	623
<i>Name Index</i>	635
<i>Subject Index</i>	642
