## Part A:

## INTRODUCTION

<b>Chapter 1</b>	<b>Economic issues</b>	<b>3</b>
1.1	The economic problem	4
	The problem of scarcity	4
	Demand and supply	5
1.2	Dividing up the subject	6
	Macroeconomics	6
	Microeconomics	7
1.3	Modelling economic relationships	10
	The production possibility curve	11
	The circular flow of goods and incomes	15
	Techniques of analysis	16
1.4	Economic systems	17
	The command economy	17
	The free-market economy	20
	Chapter 1 Boxes	
Box 1.1	<i>The opportunity costs of studying economics: What are you sacrificing?</i>	9
Box 1.2	<i>The rise and fall of planning in the former Soviet Union: When everything didn't go according to plan</i>	18

<b>Chapter 2</b>	<b>Markets, demand and supply</b>	<b>29</b>
2.1	<b>Demand</b>	30
	The relationship between demand and price	30
	The demand curve	30
	Other determinants of demand	32
	Movements along and shifts in the demand curve	33
2.2	<b>Supply</b>	35
	Supply and price	35
	The supply curve	36
	Other determinants of supply	36
	Movements along and shifts in the supply curve	38
2.3	<b>The determination of price</b>	39
	Equilibrium price and output	39
	Movement to a new equilibrium	41
2.4	<b>The free-market economy</b>	47
	Advantages of a free-market economy	47
	Problems with a free-market economy	47
	The mixed economy	48
	<b>Chapter 2 Boxes</b>	
<i>Box 2.1</i>	<i>Getting satisfaction: Characteristics, utility and the demand curve</i>	34
<i>Box 2.2</i>	<i>UK house prices: From raising the roof to falling through the floor</i>	42
<i>Box 2.3</i>	<i>Stock market prices: Demand and supply in action</i>	44
<i>Box 2.4</i>	<i>The coffee crisis of 2000 to 2004: An unfair bean count?</i>	48
<b>Chapter 3</b>	<b>Markets in action</b>	<b>55</b>
3.1	<b>Price elasticity of demand</b>	56
	Measuring the price elasticity of demand	57
	Interpreting the figure for elasticity	57
	Determinants of price elasticity of demand	58
3.2	<b>Price elasticity of demand and consumer expenditure</b>	59
3.3	<b>Price elasticity of supply</b>	65
	The determinants of price elasticity of supply	66
3.4	<b>Other elasticities</b>	67
	Income elasticity of demand	67
	Cross-price elasticity of demand	68
3.5	<b>Markets and adjustment over time</b>	69
	Short-run and long-run adjustment	69
	Price expectations and speculation	70
	Dealing with uncertainty and risk	73
3.6	<b>Markets where prices are controlled</b>	75
	Setting a minimum (high) price	75
	Setting a maximum (low) price	78
	<b>Chapter 3 Boxes</b>	
<i>Box 3.1</i>	<i>The measurement of elasticity</i>	62
<i>Box 3.2</i>	<i>Advertising and its effect on demand curves: How to increase sales and price</i>	63

Box 3.3	<i>What we pay to watch sport: How do we get satisfaction from attending matches?</i>	64
Box 3.4	<i>Agriculture and minimum prices: A problem of surpluses</i>	76
Box 3.5	<i>Rent control: Cheap housing for all?</i>	79
Box 3.6	<i>The effect of imposing taxes on goods: Who ends up paying?</i>	80

**Chapter 4 The supply decision 85**

4.1	Production and costs: short run	86
	Short-run and long-run changes in production	86
7.1	Production in the short run: the law of diminishing returns	87
7.2	Measuring costs of production	87
	Costs and output	89
4.2	Production and costs: long run	93
7.3	The scale of production	93
	Long-run average cost	96
	The relationship between long-run and short-run average cost curves	98
7.4	Long-run cost curves in practice	98
	Postscript: Decision making in different time periods	99
4.3	Revenue	102
	Total, average and marginal revenue	102
	Revenue curves when price is not affected by the firm's output	103
	Revenue curves when price varies with output	104
	Shifts in revenue curves	105
4.4	Profit maximisation	106
	Some qualifications	108
	Chapter 4 Boxes	
Box 4.1	<i>Diminishing returns in the bread shop: Is the baker using his loaf?</i>	87
Box 4.2	<i>Malthus and the dismal science of economics: Population growth + diminishing returns = starvation</i>	88
Box 4.3	<i>The relationship between averages and marginals</i>	92
Box 4.4	<i>Minimum efficient scale: The extent of economies of scale in practice</i>	100
Box 4.5	<i>The logic of logistics: Driving up profits</i>	110

**Chapter 5 Market structures 115**

5.1	The degree of competition	116
5.2	Perfect competition	117
	Assumptions	118
	The short-run equilibrium of the firm	118
	The short-run supply curve	119
	The long-run equilibrium of the firm	120
	Is perfect competition good for consumers?	121
5.3	Monopoly	124
	What is a monopoly?	124
	Barriers to entry	124
	Equilibrium price and output	125
	Monopoly versus perfect competition	126
	The theory of contestable markets	128
5.4	Monopolistic competition	131
	Assumptions	131

	Equilibrium of the firm	132
	Non-price competition	133
	Monopolistic competition and the public interest	134
5.5	Oligopoly	135
	The two key features of oligopoly	136
	Competition and collusion	136
	Collusive oligopoly	137
	Non-collusive oligopoly: the breakdown of collusion	142
	Non-collusive oligopoly: assumptions about rivals' behaviour	142
	Oligopoly and the consumer	145
5.6	Game theory	147
	Single-move games	147
	Repeated games	150
5.7	Price discrimination	152
	Conditions necessary for price discrimination to operate	152
	Advantages to the firm	152
	Price discrimination and the consumer	153
	Chapter 5 Boxes	
Box 5.1	<i>E-commerce: A return of power to the people?</i>	122
Box 5.2	<i>Breaking Sky's monopoly on live Premier League football: The impact of opening up the market</i>	129
Box 5.3	<i>OPEC – the rise and fall and rise again of a cartel: The history of the world's most famous cartel</i>	138
Box 5.4	<i>The prisoner's dilemma</i>	149
Box 5.5	<i>Profit-maximising prices and output for a price discriminating firm: Identifying different prices in different markets</i>	154
<b>Chapter 6</b>	<b>Wages and the distribution of income</b>	<b>159</b>
6.1	Labour market trends	160
6.2	Wage determination in a perfect market	162
	Perfect labour markets	162
	The supply of labour	162
	The demand for labour: the marginal productivity theory	163
	Wages and profits under perfect competition	166
6.3	Wage determination in imperfect markets	168
	Firms with power	168
	The role of trade unions	169
	Bilateral monopoly	170
	The efficiency wage hypothesis	172
6.4	Causes of inequality	173
	Inequality in the UK	173
	Causes of inequality	175
6.5	The redistribution of income	180
	Taxation	181
	Benefits	183
	The tax/benefit system and the problem of disincentives: the 'poverty trap'	184

## Chapter 6 Boxes

<i>Box 6.1</i>	<i>Patterns in UK employment: The story of the disappearing full-time male?</i>	161
<i>Box 6.2</i>	<i>Wages under bilateral monopoly: All to play for?</i>	171
<i>Box 6.3</i>	<i>Equal pay for equal work?: Wage inequalities between men and women</i>	176
<i>Box 6.4</i>	<i>Minimum wage legislation: A way of helping the poor?</i>	178
<i>Box 6.5</i>	<i>UK tax credits: An escape from the poverty trap?</i>	186

## Chapter 7 Market failures and government policy 191

7.1	Social efficiency	192
7.2	Market failures: externalities and public goods	194
	Externalities	194
	Public goods	197
7.3	Market failures: monopoly power	198
	Deadweight loss under monopoly	199
	Conclusions	200
7.4	Other market failures	201
	Ignorance and uncertainty	201
	Protecting people's interests	201
	The principal-agent problem	202
	Immobility of factors and time lags in response	203
	Macroeconomic goals	203
	How far can economists go in advising governments?	203
7.5	Government intervention: taxes and subsidies	205
	The use of taxes and subsidies	206
	Advantages of taxes and subsidies	207
	Disadvantages of taxes and subsidies	207
7.6	Government intervention: laws and regulation	208
	Laws prohibiting or regulating undesirable structures or behaviour	208
	Regulatory bodies	209
7.7	Other forms of government intervention	212
	Changes in property rights	212
	Provision of information	213
	The direct provision of goods and services	213
7.8	More or less intervention?	214
	Drawbacks of government intervention	214
	Advantages of the free market	215
	Should there be more or less intervention in the market?	216
7.9	The environment: a case study in market failure	217
	The environmental problem	217
	Market failures	217
	Policy alternatives	218
	How much can we rely on governments?	226

## Chapter 7 Boxes

<i>Box 7.1</i>	<i>Should health-care provision be left to the market?: A case of multiple market failures</i>	204
<i>Box 7.2</i>	<i>Regulating privatised industries: Is it the best way of dealing with their monopoly power?</i>	210
<i>Box 7.3</i>	<i>A deeper shade of green: How should we treat the environment?</i>	220
<i>Box 7.4</i>	<i>Green taxes: Their growing popularity in the industrialised world</i>	222
<i>Box 7.5</i>	<i>The problem of urban traffic congestion: Does Singapore have the answer?</i>	224

<b>Chapter 8</b>	<b>Aggregate demand and the national economy</b>	<b>233</b>
8.1	Introduction to macroeconomics	234
	Key macroeconomic issues	234
8.2	The circular flow of income model	237
	The inner flow, withdrawals and injections	239
	The relationship between withdrawals and injections	241
	The circular flow of income and the four macroeconomic objectives	242
	Disequilibrium and a chain reaction	242
8.3	The composition of aggregate demand	243
	Household consumption	243
	Investment	248
	Government expenditure	250
	Imports and exports	251
8.4	The equilibrium level of national income	252
	Showing equilibrium in a Keynesian diagram	253
	The withdrawals and injections approach	253
	The income and expenditure approach	254
8.5	The multiplier	256
	The withdrawals and injections approach	256
	The income and expenditure approach	257
	The multiplier: a numerical illustration	258
	Appendix: Measuring national income and output	259
	The product method	259
	The income method	260
	The expenditure method	262
	From GDP to national income	263
	Households' disposable income	263
	Taking account of inflation	264
	Chapter 8 Boxes	
Box 8.1	<i>The explosion of debt: Did it affect households spending?</i>	246
Box 8.2	<i>Surveys of confidence: What can policy-makers learn from their results?</i>	248
Box 8.3	<i>The distinction between real and nominal values: Working out what is real</i>	264
Box 8.4	<i>Trying to make sense of economic data: The apparently puzzling case of Japanese GDP</i>	265
<b>Chapter 9</b>	<b>Aggregate supply and growth</b>	<b>271</b>
9.1	The AD–AS model	272
	The aggregate demand curve	272
	The aggregate supply curve	273
	Equilibrium	274
9.2	Introducing economic growth	275
	The distinction between actual and potential growth	276
9.3	Short-term economic growth and the business cycle	278
	The business cycle in practice	280

9.4	Explanations of the business cycle	281
	Fluctuations in aggregate demand	282
	Real business cycles: fluctuations in aggregate supply	285
9.5	Long-term economic growth	287
	Growth over the decades	287
	Comparing the growth performance of different countries	287
9.6	Explanations of long-term growth	289
	The causes of economic growth	289
	Capital accumulation	290
	Technological progress	293
	Endogenous growth theory	293
	Chapter 9 Boxes	
Box 9.1	<i>Output gaps: An alternative measure of excess or deficient demand</i>	278
Box 9.2	<i>The accelerator: an example: Demonstrating the instability of investment</i>	283
Box 9.3	<i>Getting intensive with capital: How quickly does it grow?</i>	294
<b>Chapter 10</b>	<b>Banking, money and interest rates</b>	<b>301</b>
10.1	The meaning and functions of money	302
	The functions of money	302
	What should count as money?	303
10.2	The financial system	303
	The key role of banks in the monetary system	303
	Liquidity and profitability	309
	The central bank	313
	The role of the money market	316
10.3	The supply of money	321
	The creation of credit	322
	The creation of credit: the real world	324
	What causes money supply to rise?	325
	The relationship between money supply and the rate of interest	328
10.4	The demand for money	329
	What determines the size of the demand for money?	330
10.5	Equilibrium	332
	Equilibrium in the money market	332
	The link between the money and goods markets	333
	Chapter 10 Boxes	
Box 10.1	<i>Financial Intermediation: What is it that banks do?</i>	304
Box 10.2	<i>Banks' balance sheets: Whose deposits are they?</i>	306
Box 10.3	<i>Residential mortgages and securitisation: Was this the cause of the credit crunch?</i>	314
Box 10.4	<i>Tackling the credit crunch: Cleansing the banking system</i>	318
Box 10.5	<i>Credit and the money supply: Who's driving the M4?</i>	326
<b>Chapter 11</b>	<b>Inflation and unemployment</b>	<b>339</b>
11.1	Inflation	340
	Introduction to the causes of inflation	341
11.2	Money supply, aggregate demand and inflation	344
	The equation of exchange	344

	Money supply and aggregate demand	345
	Inflation and changes in aggregate demand	347
11.3	Unemployment	353
	The meaning of 'unemployment'	355
	Official measures of unemployment	355
	Unemployment and the labour market	357
	Types of disequilibrium unemployment	358
	Equilibrium unemployment (or natural unemployment)	360
11.4	The relationship between inflation and unemployment: the short run	361
	The recessionary gap	362
	The inflationary gap	363
	The Phillips curve	364
11.5	The relationship between inflation and unemployment: introducing expectations	368
	The expectations-augmented Phillips curve	368
	The accelerationist theory	368
	The long-run Phillips curve and the equilibrium rate of unemployment	370
	Rational expectations	370
	Keynesian views	371
11.6	Inflation rate targeting and unemployment	372
	Long-term changes in unemployment	373
	Inflation targeting	374
	Chapter 11 Boxes	
Box 11.1	<i>Hyperinflation: When prices go crazy: is it the money supply?</i>	348
Box 11.2	<i>The costs of unemployment: Is it just the unemployed who suffer?</i>	354
Box 11.3	<i>Mind the gap: Do output gaps explain inflation?</i>	365
<b>Chapter 12</b>	<b>Macroeconomic policy</b>	<b>381</b>
12.1	Fiscal policy	382
	Deficits and surpluses	382
	The use of fiscal policy	384
	The effectiveness of fiscal policy	386
	Problems of magnitude	386
	The problem of timing	387
	Fiscal rules	388
12.2	Monetary policy	392
	The policy setting	392
	Control of the money supply over the medium and long term	393
	Short-term monetary measures	394
	Techniques to control the money supply	395
	Techniques to control interest rates	397
	Using monetary policy	402
12.3	Demand-side policy	403
	Attitudes towards demand management	403
	The case for rules and policy frameworks	403
	The case for discretion	404
	Constrained discretion in the UK	405
12.4	Supply-side policy	411
	Market-orientated supply-side policies	412
	Interventionist supply-side policies	415

## Chapter 12 Boxes

Box 12.1	<i>Boosting the US economy: Using fiscal policy to tackle the credit crunch</i>	385
Box 12.2	<i>From golden to temporary rules: Putting the discretion back into fiscal policy</i>	390
Box 12.3	<i>The daily operation of monetary policy: What goes on at Threadneedle Street?</i>	396
Box 12.4	<i>Monetary policy in the eurozone: The role of the ECB</i>	398
Box 12.5	<i>Quantitative easing: Rethinking monetary policy in hard times</i>	401
Box 12.6	<i>Interest rate responses and the financial crisis of 2007/8: Passive or aggressive?</i>	408

## Part D:

## INTERNATIONAL ECONOMICS

<b>Chapter 13</b>	<b>Globalisation and international trade</b>	<b>423</b>
13.1	Global interdependence	424
	Interdependence through trade	424
	Financial interdependence	424
	Global policy response	425
13.2	The advantages of trade	428
	Trading patterns	428
	Specialisation as the basis for trade	428
	The gains from trade based on comparative advantage	432
	Other reasons for gains from trade	433
	The terms of trade	434
13.3	Arguments for restricting trade	434
	Arguments in favour of restricting trade	435
	Problems with protection	437
13.4	The world trading system and the WTO	440
13.5	Trading blocs	443
	Types of preferential trading arrangement	443
	The direct effects of a customs union: trade creation and trade diversion	444
	Longer-term effects of a customs union	445
	Preferential trading in practice	445
13.6	The European Union	447
	From customs union to common market	448
	The benefits and costs of the single market	450
	Completing the internal market	451
	The effect of the new member states	452
13.7	Trade and developing countries	452
	Trade strategies	453
	Approach 1: Exporting primaries – exploiting comparative advantage	453
	Approach 2: Import-substituting industrialisation (ISI)	455
	Approach 3: Exporting manufactures – a possible way forward?	457
	<b>Chapter 13 Boxes</b>	
Box 13.1	<i>Doctor, the world has caught a cold!: Global answers to global problems?</i>	426
Box 13.2	<i>Trading places: Patterns and trends in world trade</i>	430
Box 13.3	<i>Do we exploit foreign workers by buying cheap foreign imports?</i>	435
Box 13.4	<i>The Doha Development Agenda: A new direction for the WTO?</i>	441
Box 13.5	<i>Features of the single market</i>	449
Box 13.6	<i>The Chinese ‘economic miracle’: Riding the dragon</i>	460

<b>Chapter 14</b>	<b>Balance of payments and exchange rates</b>	<b>467</b>
14.1	The balance of payments account	468
	The current account	468
	The capital account	470
	The financial account	470
14.2	Exchange rates	472
	Determination of the rate of exchange in a free market	473
14.3	Exchange rates and the balance of payments	476
	No government or central bank intervention	476
	With government or central bank intervention	477
14.4	Fixed versus floating exchange rates	479
	Advantages of fixed exchange rates	479
	Disadvantages of fixed exchange rates	479
	Advantages of a free-floating exchange rate	481
	Disadvantages of a free-floating exchange rate	481
	Exchange rates in practice	483
14.5	The origins of the euro	486
	The ERM	487
	The Maastricht Treaty and the road to the single currency	488
14.6	Economic and monetary union (EMU) in Europe	489
	Birth of the euro	489
	How desirable is EMU?	490
14.7	Debt and developing countries	493
	The oil shocks of the 1970s	493
	Coping with debt: rescheduling	494
	Dealing with the debt	495
	<b>Chapter 14 Boxes</b>	
Box 14.1	<i>Dealing in foreign currencies: A daily juggling act</i>	476
Box 14.2	<i>The importance of international financial movements: How a current account deficit can coincide with an appreciating exchange rate</i>	483
Box 14.3	<i>The euro/dollar seesaw: Ups and downs in the currency market</i>	484
Box 14.4	<i>Optimal currency areas: When it pays to pay in the same currency</i>	492
	<b>Web appendix</b>	<b>W:1</b>
	<b>Key ideas and glossary</b>	<b>K:1</b>
	<b>Index</b>	<b>I:1</b>
