Research papers

<i>Konan Charles Etienne Goli, Assohoun Adjé: Existence of solutions for a coupled system with ϕ-Laplacian operators and nonlinear coupled boundary conditions</i>	79
<i>Gizem S. Oztepe, Fatma Karakoc, Huseyin Bereketoglu: Oscillation and Periodicity of a Second Order Impulsive Delay Differential Equation with a Piecewise Constant Argument</i>	89
<i>Rory Biggs: Isometries of Riemannian and sub-Riemannian structures on three-dimensional Lie groups</i>	99
<i>Tamás Szakács: Convolution of second order linear recursive sequences II.</i>	137
<i>Werner Georg Nowak: Estimating the critical determinants of a class of three-dimensional star bodies</i>	149
<i>David Devadze: The Existence of a Generalized Solution of an m-Point Nonlocal Boundary Value Problem</i>	159
Contents of previous Volumes	171
