

CONTENTS

1	Introduction.....	7
1.1	Floodplain forests in Central Europe.....	7
1.2	Forest management of floodplain forests	8
2	Methods and sources.....	10
2.1	Historical development of floodplain forests.....	10
2.2	The analysed attributes and data sources used to determine the fragmentation and ecological stability of floodplain forest.....	10
2.3	Biotope mapping – methodology.....	12
2.4	Inventory of the coppice-with-standards forest type in the floodplain forest of Litovelské Pomoraví.....	12
2.5	Proposals for forest management of PLA Litovelské Pomoraví.....	13
3	Area of study.....	14
3.1	The Litovelské Pomoraví Protected Landscape Area.....	14
3.1.1	The area of study in the Czech Republic.....	14
3.1.2	Conservation status of the area of study.....	14
3.1.3	Climate regime.....	17
3.1.4	Geology and geomorphology.....	18
3.1.5	Pedology.....	23
3.1.6	River system.....	24
3.1.7	The Morava River and floods	28
3.1.8	Biogeography.....	31
3.1.9	Fauna	32
3.1.10	Human settlements and floodplain forests.....	34
3.2	Literature concerning the area of study.....	36

4	History of floodplain forests in Litovelské Pomoraví	40
4.1	The historical development of the floodplain forests in the PLA Litovelské Pomoraví	40
4.2	Changes in fragmentation and ecological stability of the floodplain forest in the course of the 20 th century.....	43
4.3	Historical development of floodplain forests in the Vrapač National Nature Reserve	49
5	Current state of the floodplain forest geobiocenosis	57
5.1	Type and age structure of the floodplain forest geobiocenosis.....	57
5.2	The coppice-with-standards forest type in the floodplain forest of Litovelské Pomoraví.....	64
5.3	Implications for forest management in the Protected Landscape Area of Litovelské Pomoraví.....	65
6	European ecological network Natura 2000 in Litovelské Pomoraví	67
6.1	Litovelské Pomoraví in Natura 2000 network.....	67
6.2	Overview of biotopes in Litovelské Pomoraví	68
7	Geobiocenological characteristics of floodplain forests in Litovelské Pomoraví	79
7.1	Fluvial seral series of floodplain biotopes	79
7.2	Groups of geobiocene types (GGT) in Litovelské Pomoraví ...	80
7.2.1	GTG <i>Saliceta albae superiora</i>	80
7.2.2	GTG <i>Ulmi-fraxineta populi superiora</i>	83
7.2.3	GTG <i>Querci roboris-fraxineta superiora</i>	85
7.2.4	GTG <i>Ulmi-fraxineta carpini superiora</i>	87
7.2.5	GTG <i>Alni glutinosae-saliceta superiora</i>	91
7.2.6	GTG Intermittent river fleets	93
7.3	Implication for the forest management in the Protected Landscape Area Litovelské Pomoraví	95

8	Conservation and management of floodplain forests in Litovelské Pomoraví	96
8.1	Basic principles	96
8.2	Suggested target condition of biotopes in the floodplain forest of Litovelské Pomoraví.....	97
8.3	Principles of target management for functional zones of biotopes in the Litovelské Pomoraví floodplain forest	98
8.3.1	First functional zone.....	98
8.3.2	Second functional zone.....	100
8.3.3	Third functional zone.....	100
9	Discussion	102
10	Conclusion	107
