Authors	10
Preface	11
1 Dentistry – its description and organisation (<i>Tatjana Dostálová</i>)	13
2 Anatomy of the orofacial region (<i>Kristina Ginzellová, Kateřina Krausová</i>)	15
2.1 Bones	15
2.2 Muscles	15
2.3 Vessels	15
2.4 Nerves	16
2.5 Lymph nodes	17
2.6 Salivary glands	17
2.7 Regions of head and neck	18
3 Teeth (<i>Tatjana Dostálová</i>)	19
3.1 Human teeth	20
3.2 Teeth composition	22
3.3 Developmental stages of teeth	23
3.3.1 Teeth eruption	25
4 Examination in dentistry (<i>Kristina Ginzellová, Kateřina Krausová</i>)	27
4.1 History and examination	27
4.2 Extraoral examination	27
4.3 Intraoral examination	28
4.3.1 Examination of oral mucosa	28
4.3.2 Examination of hard dental tissues	29
4.4 Complementary examinations	29
5 Imaging methods (<i>Leoš Navrátil</i>)	31
5.1 Radiography	31
5.1.1 X-radiation	31
5.1.2 X-ray examination methods	33
5.1.3 Computer tomography	35
5.1.4 Radiographic equipment	35
5.2 Magnetic resonance imaging (MRI, MR)	41
5.3 Ultrasound scanning	41
6 Differential diagnoses of selected symptoms in dentistry (<i>Tatjana Dostálová, Michaela Seydlová, Kateřina Krausová</i>)	43
6.1 Oedema	43
6.2 Oral cavity bleeding	43

6.3	Difficulty in mouth opening (contracture)	43
6.4	Mucosal surface colour changes	44
6.5	Tongue surface changes	44
6.6	Disorders of salivary secretion	44
6.7	Odontogenic pain	45
7	Dental caries (<i>Michaela Seydlová, Petra Hliňáková</i>)	47
7.1	Definition	47
7.2	Aetiology	47
7.3	Classification	48
7.4	Clinical picture (clinical presentation)	49
7.5	Treatment of dental caries	50
7.6	Dental materials in restorative dentistry	52
7.6.1	Temporary dental materials	52
7.6.2	Definitive dental materials	53
8	Endodontics (<i>Michaela Seydlová, Dagmar Švermová</i>)	55
8.1	Anatomy and histology of a dental pulp	55
8.2	Pulp disorders	56
8.2.1	Clinical classification according to Baume	56
8.2.2	Histopathological classification	58
8.3	Inflammation of periapical tissues	59
8.3.1	Phases of periodontitis	60
8.4	Endodontic treatment	62
8.4.1	Root canal filling	62
8.5	Peculiarities of endodontic management in children	63
8.6	Preservative surgical treatment in endodontics	64
9	Teeth extraction (<i>Dagmar Švermová</i>)	67
9.1	Tools for extraction	67
9.1.1	Root elevators	67
9.1.2	Extracting forceps	68
9.2	Tooth extraction	69
9.3	Complicated teeth extraction	74
9.4	Healing of extraction wound	74
9.5	Indication of tooth extraction	74
9.6	Contraindications of tooth extraction	75
9.7	Complications of tooth extraction	76
10	Local anaesthesia (<i>Karel Klíma</i>)	81
10.1	Definition	81
10.2	Pharmacognosy	81
10.2.1	Esteric local anaesthetics	81
10.2.2	Amide local anaesthetics	82
10.3	Pharmacokinetics	82
10.4	Adjuvants used with local anaesthetics	83
10.5	Application forms of local anaesthesia	83

10.5.1	Topical anaesthesia	83
10.5.2	Infiltrative anaesthesia	83
10.5.3	Nerv block anaesthesia	84
10.5.4	Intraosseal anaesthesia	84
10.5.5	Periodontal ligament injection (Intraligamental anaesthesia)	84
10.5.6	Intrapulpal anaesthesia	85
10.6	Complications associated with application of local anaesthetics	85
10.7	General anaesthesia in dentistry	86
10.8	Sedation	88
11	Basics of periodontology (Michaela Seydlová, Pavel Kříž)	89
11.1	Periodontal tissue	89
11.1.1	Gingiva	89
11.1.2	Periodontium	90
11.1.3	Dental cementum	90
11.1.4	Alveolar bone	90
11.2	Dental microbial plaque	91
11.3	Basic classification of periodontal diseases	92
11.4	Examination in periodontology	92
11.5	Gingivitis	94
11.6	Periodontitis	94
11.7	Treatment of periodontal diseases	95
12	Diseases of oral mucosa (Michaela Seydlová)	97
12.1	Painful corners of the mouth	97
12.2	Recurrent aphthous stomatitis	97
12.3	Herpetic infections	97
12.4	Candidiasis	98
12.5	Oral lichen planus	98
12.6	HIV infection, AIDS	98
12.7	Syphilis	99
12.8	Tuberculosis	100
12.9	Sjögren's syndrome	101
13	Teeth injuries (Tomáš Hladío)	103
13.1	Injuries to periodontium	105
13.2	Injuries to hard dental tissues and the dental pulp	105
13.3	Treatment	107
13.3.1	Injuries to periodontium (periodontal ligaments)	108
13.3.2	Injuries to hard dental tissues	109
13.4	Consequences of teeth injuries	110
13.5	Prevention	110
14	Facial injuries (Jiří Kozák)	111
14.1	Soft tissue injuries	112
14.2	Fractures of the facial skeleton	115
14.2.1	Fractures of the alveolar process	115

14.2.2	Mandibular fractures	116
14.2.3	Fractures of the lower facial region	117
14.2.4	Gunshot injuries	121
15	Prosthodontics (<i>Tatjana Dostálová, Marie Bartoňová</i>)	123
15.1	Protheses of short-term durability (Adhesive fixed bridge)	123
15.2	Fixed prosthesis	124
15.3	Removable prosthodontics	126
16	Dental implants (<i>Tatjana Dostálová, Marie Bartoňová</i>)	129
17	Orthodontics (<i>Tomáš Hlaďo</i>)	133
17.1	Orthodontic treatment	136
18	Orthognatic surgery (<i>Michaela Seydlová</i>)	139
18.1	Basic interventions	140
19	Temporomandibular joint (<i>Petra Hlišáková, Tatjana Dostálová</i>)	143
19.1	Basic anatomy	143
19.2	Mechanics of the temporomandibular joint	143
19.3	Diseases of temporomandibular joint	144
19.4	Symptoms of temporomandibular joint diseases	146
19.5	Treatment	147
19.5.1	Mini-invasive treatment – arthrocentesis, arthroscopy	147
20	Head and neck tumours (<i>Jiří Kozák</i>)	149
20.1	Benign tumours	149
20.2	Pseudotumours	152
20.3	Epithelial tumours	153
20.4	Nerve-tissue tumours	153
20.5	Pigment tumours	153
20.6	Odontogenic tumours	153
20.7	Premalignant changes	154
20.8	Malignant tumours	154
20.8.2	Epidemiology	154
20.8.2	Diagnosis and staging	155
20.9	Mesenchymal malignant tumours	157
20.10	Tumours of pigment tissue	157
20.11	Tumour treatment	157
20.12	Preventive oncology	159
21	Cystic structures in the orofacial region (<i>Dagmar Švermová</i>)	161
21.1	Odontogenic cysts	163
21.2	Radicular cysts	164
21.3	Developmental cysts	164
21.4	Other cysts	165
21.5	Diagnostics	166

21.6	Differential diagnostics	167
21.7	Therapy	168
22	Salivary gland disorders (<i>Milan Hubáček</i>)	169
22.1	Anatomy notes	169
22.2	Clinical examination	170
22.3	Complementary examinations	171
22.4	The most frequent salivary gland disorders	172
22.4.1	Epidemic parotitis (mumps)	172
22.4.2	Chronic recurrent parotitis (morbus Payen)	172
22.4.3	Acute suppurative sialoadenitis	173
22.4.4	Sialolithiasis	174
22.4.5	Hypoptyalism	175
22.4.6	Ptyalism	175
22.4.7	Salivary gland tumours	176
22.4.8	Salivary gland cysts	176
23	Orofacial pain (<i>Katarína Veličová</i>)	179
23.1	Pathophysiology of pain	179
23.2	Examination of a patient in pain	179
23.3	Pain classification	181
23.3.1	Odontogenic pain	181
23.3.2	Toothache caused by extradental irritation	183
23.3.3	Orofacial pain except odontalgia	184
23.3.4	Perignathic inflammation	185
23.3.5	Osteomyelitis of jawbones	185
23.3.6	Joint and myofascial pain	185
23.3.7	Injuries	186
23.3.8	Tumours	186
23.3.9	Salivary gland disorders	188
23.3.10	Lymph node disorders	188
23.4	Neuralgia	188
23.4.1	Trigeminal neuralgia	188
23.4.2	Glossopharyngeal neuralgia	189
23.4.3	Atypical facial pain	189
23.5	Painful disorders in ENT region	189
23.6	Eye pain	190
24	Preventive dentistry (<i>Jana Fendrychová</i>)	191
24.1	Primary prevention	191
24.2	Secondary prevention	195
24.3	Tertiary prevention	195
	Literature	197
	Abbreviations	199
