

## Obsah

<b>Beran L., Troják J.:</b> A lower estimate of the Euler phi function.....	5
<b>Batíková B.:</b> Reflective Subcategories of Tsunif.....	9
<b>Otavová M.:</b> Hanojská věž a možnosti matematické reprezentace problému.....	16
<b>Henzler J.:</b> Various criteria on function monotony.....	21
<b>Valentová E.:</b> Something about Ultramodular Functions.....	27
<b>Horský R.:</b> Real Numbers. A New Conception in Basic Concepts.....	32
<b>Hladíková H.:</b> From ideal towards practically viable block diagonal preconditioners for symmetric indefinite linear systems.....	40
<b>Smrčka M.:</b> Some models of closed union conjecture.....	46
<b>Burýšek S.:</b> Singular Points of Multivalued Analytic Operators and the Monodromy Theorem.....	52
<b>Henzler J.:</b> How to lecture infinite sums for non-mathematicians.....	56
<b>Hladíková H.:</b> Nová kapitálová pravidla dle Basel II.....	64
<b>Petrášková V., Mrkvička T.:</b> Index PX 50 versus index Dow Jones EURO STOXX 50.....	71
<b>Coufal J.:</b> Charles Loewner (Karel Löwner).....	78
<b>Nešverová E.:</b> Johann Bernoulli.....	83

**Coufal J.:**

Armand Borel's view of mathematics.....86

**Kozma P.:**

Renewable energy market forecast based of demand elasticity model.....92
