I. Electromagnetic field theory

Bartůšek Karel, Hadinec Michal	Magnetic Field Decomposition and Reverse Approximation Method	I-1
Doležel Ivo, Ota Josef, Ulrych Bohuš	Study of Suitable Arrangement of Magnetic Circuits for Realization of Magnetocaloric Effect	I-3
Donátová Martina, Karban Pavel	Rotational Induction Heating of Nonmagnetic Cylindrical Billets	I-5
Filipowicz Stefan F., Rymarczyk Tomasz, Sikora Jan	The Multilevel Sets Idea to Solve the Inverse Problem in Electrical Impedance Tomography	I-7
Hála Aleš	Two Levels Homogeneous Magnetic Flux Density Distribution Generated by Permanent Magnets Arrangement	I-9
Hamar Roman	The Application of the MATLAB and COMSOL Programs for the Computation of a 3D Non-stationary Electric Field	I-11
Košek Miloslav, Malík Michal, Primas Jiří, Richter Aleš	Approximation of Strong Electric Field	I-13
Košek Miloslav, Mikolanda Tomáš, Richter Aleš	3D Magnetic Field of Permanent Magnets, Simulation and Measurement	I-15
Košek Miloslav, Richter Aleš, Truhlář Martin	Fast Numeric Calculation of Massive Conductor 3D Magnetic Field	I-17
Kusiak Dariusz, Piątek Zygmunt, Szczegieliak Tomasz	Power Losses of the Monophase Coaxial High Current Busduct	I-19
Kusiak Dariusz, Piątek Zygmunt, Szczegieliak Tomasz	The Magnetic Field of the Screened Flat Three-Phase High Current Busduct	I-21
Leubner Karel	Electromagnetic Acceleration of Ferromagnetic Bodies	I-23
Machač Jan, Šnajdr Miroslav	Nonlinear Model of Very Thin Conducting Fibers	I-25

II. Network theory and its application

Benešová Zdeňka, Kotlan Václav	Transients on Non-Homogeneous Line with Space Varying Inductance and Capacitance	II-1
Friedl Martin, Frohlich Lubomír, Hadinec Michal, Sedláček Jiří	Arc Coupled Band – Pass Filters	II-3
Pánek David	Wavelet Analysis of Strongly Nonlinear Systems	II-5
Skowronek Konrad	Informational Function of Disturbances in Electromagnetic Devices	II-7

III. Electrical machines and apparatus

Beňová Mariana, Dobrucký Branislav, Šul Róbert	Modelling of Two-Stage Frequency Converter Using Complex Conjugated Magnitudes and Orthogonal Park/Clarke Transformation	III-1
Doležel Ivo, Kotlan Václav, Ulrych Bohuš	Static Characteristic of Components of Controllable Thermoelastic Actuator	III-3
Doležel Ivo, Kotlan Václav, Ulrych Bohuš	Study of Integral Arrangement of MHD Pumps Transporting Molten Metals or Salts	III-5
Jajczyk Jarosław, Stein Zbigniew, Zielinska Maria	Selected Problems of Cooperation Between Asymmetric Receivers and Synchronous Machine in a Low-voltage Network of an Industrial Plant	III-7
Jiříčková Jana, Krasl Milan, Vík Rostislav	Stray Losses in Transformer Tank	III-9
Kasprzyk Leszek, Stein Zbigniew, Zielinska Maria	Selected Problems of the Use of Three-Phase Induction Motors with One Condenser in Single-Phase AC Nets	III-11
Krasl Milan	HTS Transformer - Optimization of Winding Losses	III-13
Mach František	Design of Electromagnetic Actuator and Experimental Verification of its Parameters	III-15

IV. Power engineering theory

Baron Bernard, Kraszewski Tomasz, Pasierbek Artur, Połomski Marcin, Sokół Radosław	Power Flow Analysis and Optimisation	IV-1
Baron Bernard, Kraszewski Tomasz, Pasierbek Artur, Połomski Marcin, Sokół Radosław	Power System Graph Partitioning	IV-3
Bugaj Andrzej, Cebulski Włodzimierz, Nawrowski Ryszard	Cooperation of Diffused Sources of Electric Energy with Electro-Energetic System	IV-5
Bugaj Andrzej, Cebulski Włodzimierz, Nawrowski Ryszard	The Quality of Electric Energy in the Pick-Up Point of Water Power Station Versus PN-EN 50160 Norm Requirements	IV-7
Bula Dawid, Pasko Marian	Passive and Hybrid Filters under Distorted Source Condition	IV-9
Haller Rainer, Kožený Jiří	Influence of Thermal Radiation for Heat Transfer on Electrical Equipment	IV-11
Irving Malcolm, Veleba Jan	Load Flow Analysis with Voltage and Reactive Power Optimization in Distribution Networks	IV-13
Ježek Václav	Generator Circuit Breaker for Perspective Nuclear Power Plant	IV-15
Královcová Veronika, Martinek Zbyněk	The Reliability Analysis of Power Plant Unit	IV-17
Majka Łukasz, Paszek Stefan	Use of Selected Optimisation Algorithms for Estimation of Excitation System Model Parameters	IV-19
Sosnowski Jacek	Selected Electromagnetic Problems of the Application HTc Superconductors for Electric Current Transport	IV-21

V. Material modeling and measuring

Bartůšek Karel, Buchta Zdeněk, Rychnovský Jan	Spectral Line Amplitudes of Thermally Polarized 129 Xenon in Comparison with Hyperpolarized 129 Xenon	V-1
Čáповá Klára, Gombárska Daniela, Janoušek Ladislav, Smetana Milan	Recent Trends and Developments in Eddy Current Non-Destructive Evaluation	V-3
Čáповá Klára, Janoušek Ladislav, Smetana Milan	Pulsed Eddy Current Evaluation of Conductive Materials Using Virtual Instrumentation	V-5
Dejmek Jiří, Štekl Pavel	Innovation in the electrochemistry in range fuel cells	V-7
Dejmek Jiří, Štekl Pavel	Possibilities of using the thermocamera in the thermodynamic processes	V-9
	Carbon Based Materials - Their Properties and Application as Electrodes in Electrochemical Double Layer Capacitors	V-11
Dvořák Petr, Sedlaříková Marie, Vondrák Jiří		
Kováč Dobrosław, Kováčová Irena, Petko Milan, Šimko Vojtech	Simulation Model of Elastomagnetic Sensors	V-13
Molnár Ján, Vince Tibor	Telemetric Expert System Based on Interent	V-15
Skowronek Konrad, Trzmiel Grzegorz	The Model of Photovoltaic Cell with Consideration of Load Variability	V-17
Stanisławski Marek, Trzmiel Grzegorz	The Use of a Multidimensional Approximation in Determining a Model of a Photovoltaic Cell	V-19

VI. Biomedicine

Büllow Jiří	Educational Simulation of Bioelectromagnetism Features of Living Organism	VI-1
Büllow Jiří	Modelling of Electric Activity in Cardiac Cell	VI-3
Czippelová Barbora, Čáp Ivo	Modelling of Cardiovascular System Dynamics Using Electromechanical Analogy	VI-5
Čáповá Klára, Strapáčová Tatiana	Influence of Selected Parameters on Detection of Heart Valves Outlet Strut Fractures Using Ect Method	VI-7
Dědková Jarmila, Drexler Petr	Improvement of Image Reconstructions Using Level Set Method	VI-9
Faktorová Dagmar	Dielectric Spectroscopy of Glucose Turnover in Cancerous Tissue Model	VI-11
Faktorová Dagmar, Zmík Juraj	Numerical Modelling of Electromagnetic Wave Interaction with Heterogeneous Biological Structure	VI-13
Panczyk Maciej, Sikora Jan	Infinite Boundary Element Application in Optical Mammography	VI-15
