

# Table of Contents

Introduction . . . . .	1
1. Related Research . . . . .	3
1.1 Generation of Triangular Meshes . . . . .	3
1.2 Generation of Quadrilateral Meshes . . . . .	5
1.3 Indirect Discretization of 3D Surfaces . . . . .	7
1.4 Direct Discretization of 3D Surfaces . . . . .	7
1.5 Discretization of Discrete 3D Surfaces . . . . .	8
1.6 Mesh Optimization . . . . .	9
2. Indirect Triangulation of 3D Surfaces . . . . .	11
2.1 Surface Representation . . . . .	11
2.2 Surface Metric Tensor . . . . .	13
2.3 Parametric Space Meshing . . . . .	16
2.4 Singularities . . . . .	17
2.5 Smoothing . . . . .	20
2.6 Control Space . . . . .	21
2.7 Examples . . . . .	22
3. Direct Triangulation of 3D Surfaces . . . . .	27
3.1 Mesh Density Control . . . . .	27
3.2 Octree Control Space . . . . .	29
3.3 Projection . . . . .	33
3.4 Real Space Meshing . . . . .	35
3.5 Computational Complexity . . . . .	46
3.6 Examples . . . . .	47
4. Triangulation of Discrete 3D Surfaces . . . . .	52
4.1 Surface Representation . . . . .	52
4.2 Reconstruction of Limit Surface . . . . .	52
4.3 Discrete Surface Meshing . . . . .	60
4.4 Surface Projection . . . . .	61
4.5 Examples . . . . .	65
5. Generation of Quad-dominant Meshes . . . . .	70
5.1 Mixed Mesh Generation . . . . .	70
5.2 Quadrilateral Generation . . . . .	70
5.3 Mesh Optimization . . . . .	72
5.4 Mesh Refinement . . . . .	75
5.5 Examples . . . . .	75
Summary . . . . .	81
Bibliography . . . . .	83
