

CONTENTS

1	VALID TECHNICAL RULES	7
1.1	The Low No. 142/1991 (technical standards)	7
1.2	Notice No. 50/1978 (qualification of persons)	7
1.3	Notice No. 20/1978 (important electrical equipment)	8
2	BASIC ELECTROTECHNICAL STANDARDS	9
2.1	General	9
2.2	International and European standardization	10
2.3	IEC Basic Standards	11
3	BASIC TERMS AND DEFINITIONS FOR ELECTROTECHNICAL SAFETY AND ELECTRICAL INSTALLATIONS	13
4	EFFECT OF CURRENT PASSING THROUGH THE HUMAN BODY	18
4.1	Principles	18
4.2	Safety limits of current passing through the human body	21
4.3	Resistance (impedance) of the human body	22
4.4	Conventional touch voltage limits	23
5	FUNDAMENTAL RULES FOR PROTECTION AGAINST ELECTRIC SHOCK	25
5.1	Protection against direct contact	26
5.1.1	Protection by insulation of live parts	27
5.1.2	Protection by barriers or enclosures	27
5.1.3	Protection by obstacles	27
5.1.4	Protection by placing live parts out of reach	27
5.1.5	Use of protective measures	28
5.1.6	Additional protection	29
5.2	Protection against indirect contact	29
5.2.1	Classification of electrical and electronic equipment with regard to protection against electric shock in the event of insulation fault	31
5.2.2	Protection by automatic disconnection of supply	32
5.2.2.1	Types of system earthing	32
5.2.2.2	Measures for protection by automatic disconnection of supply	38
5.2.2.3	Main equipotential bonding	38
5.2.2.4	Supplementary equipotential bonding	38
5.2.2.5	Protective measures in TN systems	38
5.2.2.6	Protective measures in TT systems	40

5.2.2.7	Protective measures in IT systems	40
5.2.3	Protection by use of Class II equipment or by equivalent insulation	42
5.2.4	Protection by electrical separation	42
5.3	Protection against both direct and indirect contact	44
6	CONSTRUCTION OF ELECTRICAL INSTALLATION AND EQUIPMENT	45
6.1	Degrees of protection provided by enclosures (IP Code)	45
6.1.1	Elements of the IP Code and their meaning	45
6.1.2	Examples of designation with the IP Code	50
6.2	Rules for installation of electrical equipment (apparatus and appliances)	51
6.3	Proper installation of protective conductor	52
6.3.1	PEN conductor	53
6.3.2	Preservation of electrical continuity of protective conductors	53
6.3.3	Terminals for protective conductors	53
6.4	Proper installation of electrical equipment	53
6.4.1	Protection against thermal effects	54
6.4.2	Type of wiring and methods of installation	54
6.4.3	Nature of demand	55
6.4.4	Selection of electrical equipment	55
6.4.5	Characteristics	55
6.4.6	Cross-section of conductors	56
6.4.7	Protection against overcurrent	56
6.4.8	Protection against fault currents	57
6.4.9	Protection against overvoltage	57
6.4.10	Disconnecting devices	57
6.4.11	Emergency control	57
6.4.12	Conditions of installation	57
6.4.13	Prevention of mutual influence	57
6.4.14	Accessibility of electrical equipment	58
6.5	Erection and initial verification of electrical installations	58
6.5.1	Erection	58
6.5.2	Initial verification	58
7	SAFETY SYMBOLS AND SAFETY IDENTIFICATION FOR USE ON ELECTRICAL EQUIPMENT	59
7.1	Identification of conductors and terminals	59
7.2	Graphical symbols for use on electrical equipment	60
7.3	Safety information on electrical equipment and devices	60

7.3.1	Safety colours	61
7.3.2	Example of use of safety colours and contrast colours	62
7.3.3	Geometric form and meaning of safety signs	62
7.3.4	Safety signs	63
7.3.5	Examples of safety signs	64
7.4	Coding of indicating devices and actuators by colours (IEC 73)	66
7.4.1	Indicating devices	66
7.4.2	Marking of actuators	68
7.4.3	Colours of actuators	68
8	EXTERNAL INFLUENCE EFFECTING ELECTRICAL EQUIPMENT AND INSTALLATION	70
8.1	Climate	72
8.2	Selection and erection of electrical equipment according to external influences	75
9	VERIFICATION OF ELECTRICAL EQUIPMENT AND INSTALLATION	76
9.1	General	76
9.2	Visual inspection	76
9.3	Testing	76
9.3.1	Continuity of protective conductors, including main and supplementary equipotential bonding	77
9.3.2	Insulation resistance of the electrical installation	77
9.3.3	Protection by separation of circuits (electrical separation)	78
9.3.4	Polarity test	78
9.3.5	Automatic disconnection of supply	78
9.3.6	Measurement of the resistance of protective conductors	79
10	OPERATION OF ELECTRICAL INSTALLATIONS	80
10.1	Standard operational procedures	82
10.2	Working procedures	83
10.3	Maintenance procedures	83
10.4	Personnel	84
11	FIRST AID TREATMENT OF THE ELECTRIC SHOCK	84
12	VOCABULARY	86
13	BIBLIOGRAPHY	90
