

CONTENTS

Chapter 1 **AGRICULTURE AS A REARRANGEMENT OF THE ECOSYSTEM..... 5**

- 1.1 Introduction
- 1.2 Agriculture as a rearrangement of the ecosystem
- 1.3 Linkages between tropical and temperate zones
- 1.4 The effect of agricultural techniques and sustainability of intensive farming
- 1.5 Basic terms concerning the agricultural systems

Glossary

References

Chapter 2 **TYPOLOGY OF FARMING SYSTEMS..... 16**

- 2.1 History of cropping systems in temperate regions
- 2.2 Examples of indigenous land-use systems throughout the tropical world
- 2.3 The Green revolution and beyond
- 2.4 Present tropical farming systems and types in general – typology of farming systems
 - 2.4.1 Shifting cultivation systems
 - 2.4.2 Low-land rice-based systems
 - 2.4.3 Upland cereal-based systems
 - 2.4.4 Smallholder mixed systems
 - 2.4.5 Irrigated smallholder systems
 - 2.4.6 Smallholder farming with plantation crops
 - 2.4.7 Agroforestry systems
- 2.5 Stability of tropical agricultural systems - its strengthening through crop rotation patterns

Chapter 3

CROP ROTATION, ITS CHARACTERISTICS AND CROPPING PATTERNS OF A SELECTED WORLDWIDE CULTIVATED CROPS..... 34

- 3.1 Crop rotation
- 3.2 Basic terms used while discussing rotational systems, crop mixtures and special cropping patterns
- 3.3 Basic biological principles employed in crop rotation
- 3.4 Main worldwide cultivated crops and their place in cropping patterns
 - 3.4.1 Cereals
 - 3.4.2 Legumes
 - 3.4.3 Non-cereal energy crops

Chapter 4

SOIL MANAGEMENT CONSIDERATIONS AND SECURING FAVOURABLE SOIL CONDITION FOR CROP GROWTH..... 80

- 4.1 Soil management considerations
 - 4.1.1 Essential constituents of the soil
 - 4.1.2 Managing organic matter
 - 4.1.3 Soil tillage
 - 4.1.4 Managing soil health
 - 4.1.5 Managing microclimate – flows of solar radiation, water and air
 - 4.1.6 Manipulating solar radiation
 - 4.1.7 Manipulating heat and / or moisture flow
 - 4.1.8 Manipulating mechanical impact of wind, rain and hail
- 4.2 Securing favourable climate / soil conditions for crop growth

Chapter 5

WEEDS..... 118

- 5.1 The characteristics of weeds
- 5.2 What are volunteer plants - cultivated plants as a weeds ?
- 5.3 The main effect of weeds
- 5.4 The biology of weeds
- 5.5 World worst weeds
- 5.6 Weed control
 - 5.6.1 Mechanical control
 - 5.6.2 Crop rotation as a weed control
 - 5.6.3 Chemical control
 - 5.6.4 Biological control
