

CONTENTS

INDEX OF ACRONYMS IN TEXT, FIGURES AND TABLES.....	8
1 INTRODUCTION	9
2 GEOLOGICAL CONDITIONS OF THE LANDSCAPE AFFECTED BY UNDERGROUND MINING OF COAL SEAMS	12
2.1 South Moravian Lignite District.....	12
2.1.1 Geological evolution and its effect on the landscape.....	12
2.1.2 Development of extraction in the South Moravian Lignite District.....	12
2.1.3 Hydrogeology in the South Moravian Lignite District.....	13
2.2 The Kladno District.....	15
2.2.1 Geological conditions and stratigraphy.....	15
2.2.2 Hydrogeological and gas conditions.....	18
2.2.3 Coal extraction.....	19
2.3 The Ostrava-Karviná Coalfield.....	22
2.3.1 Mining operations.....	22
2.3.2 Balance of materials taken from lithosphere.....	24
2.3.3 Methane in Carboniferous massif.....	25
2.3.4 Natural seismic activity in the region.....	26
2.4 Assessment method for coal reserves.....	27
3 IMPACT ON ENVIRONMENT BY UNDERGROUND COAL AND LIGNITE MINING	28
3.1 Deformation of surface by undermining.....	28
3.1.1 The South Moravian Lignite District.....	28
3.1.2 The Kladno District.....	30
3.1.3 The Ostrava-Karviná Coalfield.....	33
3.2 Impacts of mining operations on watercourses, water reservoirs and/or on the change of streamflow conditions.....	37
3.2.1 The South Moravian Lignite District.....	37
3.2.2 The Kladno District.....	38
3.2.3 The Ostrava-Karviná Coalfield.....	40
3.3 Methane in coal seam in the carboniferous massif affected by coal extraction in the Ostrava-Karviná Coalfield.....	42
3.4 Seismic activity.....	43
3.4.1 Seismic activity in the Kladno District.....	43
3.4.2 Seismic activity of the Ostrava-Karviná Coalfield.....	44
3.5 Surface dumping sites of extracted materials.....	46
3.5.1 Mine dumps in the South Moravian Lignite District.....	47
3.5.2 Mine dumps in the Kladno District.....	47
3.5.3 Mine dumps, flotation and coal settling pits as a lasting impact on landscape in the Ostrava-Karviná Coalfield.....	50
3.6 Landscape reclamation.....	60
3.6.1 Protection of surface buildings and the impact of mining activity on forest and soil in the South Moravian Lignite District.....	60
3.6.2 Reclamation in the Kladno District.....	60
3.6.3 Reclamation in the Ostrava-Karviná Coalfield.....	62
4 LIMITATION OF UNDERGROUND EXTRACTION OF HARD COAL AND LIGNITE SINCE 1990	65
4.1 Procedure of the coal mine closure and changes in use of the South Moravian Lignite District.....	65
4.2 The closure of coal mines in the Kladno District.....	71
4.3 The decline of coal extraction in the Ostrava-Karviná Coalfield.....	71
5 SUBSIDENCE OF LANDSCAPE AFTER THE TERMINATION OF UNDERGROUND MINING	72
5.1 Situation in the South Moravian Lignite District.....	72
5.2 Evolution of the subsidence in the Kladno District.....	72
5.3 Affected area and evolution of the subsidence in the Ostrava-Karviná Coalfield.....	77
6 THE IMPACT OF END OF WATER PUMPING FROM COAL MINE ON HYDROLOGICAL CONDITIONS OF AREA	78
6.1 The expected effects of pumping mine water ending in the South Moravian Lignite District.....	78
6.2 The impact of mine water pumping ending on surface rivers in the Kladno District.....	81
6.3 The protection of yet active coal mines in the Ostrava-Karviná Coalfield against a water breakout hazard and uncontrolled water overflows from inundated coal mines.....	81
7 COAL BED METHANE IN THE OSTRAVA-KARVINÁ COALFIELD	84
8 SEISMIC ACTIVITY AFTER THE TERMINATION OF UNDERGROUND COAL MINING	87
8.1 The Kladno District.....	87
8.2 The assumed development after the closure of mines in the eastern part of the Ostrava-Karviná Coalfield.....	88
8.3 Rock bursts during the decline of coal extraction and after the closure of a coal mine.....	89
9 RECLAMATION AFTER 1990	92
9.1 Reclamation in the Kladno District.....	92
9.2 Reclamation in the Ostrava-Karviná Coalfield.....	92

10 BROWNFIELDS LEFT BY MINING COMPANIES	95	12.3 Some features of demographic development in the Ostrava region	109
10.1 Definition, categorization, specific features.....	95	13 SOCIAL AND DEMOGRAPHIC IMPACT OF TRANSFORMATION AFTER 1990 ON SOUTH MORAVIAN LIGNITE DISTRICT, Kladno DISTRICT AND ON OSTRAVA-KARVINÁ COALFIELD	111
10.2 Mining museum at the Mayrau Mine	95	14 PRESENT SITUATION AND LANDSCAPE DEVELOPMENT TO BE	112
10.3 Brownfields left by mining companies in the Ostrava-Karviná Coalfield	96	15 FINAL SUMMARY OF THE KNOWLEDGE FROM THE PERIOD OF THE COALMINING DECLINE AND THE PROPOSED MEASURES FOR ITS FURTHER USE	116
10.3.1 Mining museums in OKR.....	97	15.1 The period after the decline of deposit extraction	116
10.3.2 Potential utilization of brownfields.....	98	15.2 The measures towards reduction of mining activity on new sites	117
11 OTHER IMPACTS OF MINING ACTIVITY ON SURFACE	100	16 CONCLUSION	118
11.1 The South Moravian Lignite District.....	100	LITERATURE	121
11.2 Biota conditions in the Kladno District.....	100		
11.3 Development and the changes of biota in the Ostrava-Karviná Coalfield	100		
12 ECONOMIC DEVELOPMENT AND SETTLEMENT STRUCTURE	109		
12.1 Economic development and settlement in the South Moravian Lignite District	109		
12.2 History and development of settlement structure in the Kladno District	109		

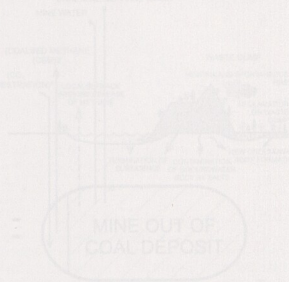

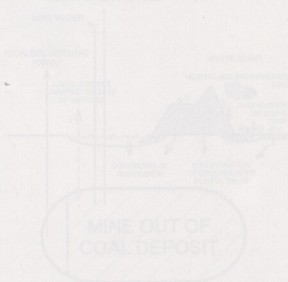

Fig. 1 Coal deposit - stage and history from the beginning of mining
