

# CONTENTS

<b>INTRODUCTORY NOTE</b> .....	5
<b>PART 1 ENVIRONMENT AND HUMAN HEALTH</b>	
Chapter 1.1 Global environmental issues .....	11
Chapter 1.2 Biological monitoring and human exposure to xenobiotics .....	16
Chapter 1.3 Outdoor air pollution .....	21
Chapter 1.4 Water and health .....	30
Chapter 1.5 Waste waters and solid wastes .....	39
Chapter 1.6 Indoor Environment .....	47
Chapter 1.7 Physical factors of environment .....	59
<b>PART 2 NUTRITION</b>	
Chapter 2.1 Nutrients .....	89
Chapter 2.2 Malnutrition .....	103
Chapter 2.3 Food composition .....	108
Chapter 2.4 Microbiology of food and food safety .....	119
Chapter 2.5 Food contaminants and food additives .....	125
Chapter 2.6 Dietary guidelines and recommendations .....	129
<b>PART 3 OCCUPATIONAL HEALTH</b>	
Chapter 3.1 Introduction to occupational health .....	137
Chapter 3.2 Environmental and occupational epidemiology of cancer .....	152
<b>PART 4 CHILD AND ADOLESCENT HEALTH</b>	
Chapter 4.1 Life cycle approach to child and adolescent health ...	156
<b>PART 5 RISK FACTORS OF LIFESTYLE</b>	
Chapter 5.1 Tobacco dependence: epidemiology, prevention, and treatment .....	168
Chapter 5.2 Obesity and inactivity .....	183

## **PART 6 EPIDEMIOLOGY**

Chapter 6.1	Principles of epidemiologic studies	187
Chapter 6.2	Statistical methodology in epidemiology	200
Chapter 6.3	Vaccination	214
Chapter 6.4	Cancer epidemiology	227
Chapter 6.5	Ethical issues in environmental and occupational epidemiology	239

## **PART 7 SELECTED SPECIFIC TOPICS**

Chapter 7.1	Indoor air quality in hospitals and other health care facilities	245
Chapter 7.2	Health risk assessment and human exposure to endocrine disrupters	256
Chapter 7.3	Psychosomatic and psychosocial aspects of risk perception	265

## **Acknowledgment**

It is my welcome duty to express my gratitude to both the reviewers, professor Vera Thomas PhD, from the University of Miami, and Hynek Pikhart PhD, from the University of London, for their inspiring suggestions concerning the English version of our supplementary reading for our students undertaking three-week block course devoted to hygiene and epidemiology.

I wish also to thank to all the co-authors, especially Dr. Eva Kudlova PhD, who dedicated substantial efforts also to the organization of the manuscript development. I thank Mr. Martin Ouvin for an enormous amount of meticulous and punctual work devoted to the layout editing of the manuscript. The manuscript would not have been prepared in time without their dedicated efforts.

In advance, we would like to thank all the readers for their kind technical and language suggestions, which we shall include into the next edition of our manual.
