Preface	7
Human Capital – Concept and Situation in the Czech Republic	9
<i>Jakub Sovina</i>	
1. Introduction	9
2. Human capital and its significance	10
3. Demand for investment in human capital	33
4. Measuring aggregate human capital	39
5. The role of human capital at macroeconomic level	45
6. Conclusion	58
Appendix: Figures, tables and data views	60
References	77
The Consequences of Economic Growth and Human Capital Accumulation for Price Convergence	81
<i>Tomáš Holub and Martin Čihák</i>	
1. Introduction	81
2. Price Levels vs. GDP: An Overview of Empirical Evidence	82
3. The Balassa Samuelson Model and its Quantitative Predictions	86
4. Weaknesses and Topics for Further Research	104
5. Summary and Conclusions	111
Appendix I: The “Unimportant” Constants	112
Appendix II: Why is the Czech Price Level so Low?	112
References	115
Diffusion of Technology	119
<i>Michal Hlaváček</i>	
1. Introduction	119
2. The Basic Model	120
3. Model of Technology Diffusion	122
4. Model of Transfer of Technology with an Lag	124
5. The possible Modifications to the Model- Proposals to the Further Development of the Model	135
References	136

Peaks Detection in a Time Sequence of Total Factor Productivity by Means of Growing Hyperspheres Neural Classifier	137
<i>Marcel Jiřina and Tomáš Cahlík</i>	
1. Introduction	137
2. Generating the Data	138
3. GHS Neural Network	139
4. Compiling and Processing of Training Data, Results	146
5. Conclusions	150
References	152
 Integration of the R&D Sector into the World Web of Science	153
<i>Tomáš Cahlík</i>	
1. Introduction	153
2. Co-word analysis in search of fundamental themes and fundamental articles in economics in 1997–1999	155
3. Citation analysis in search of fundamental themes and fundamental articles in economics in 1997–1999	162
4. Conclusions	165
References	166
 Resume	167
