1	Introduction	1
1.1	Motivation for the Research	1
1.2	Structure of the Book	2
2	Literature	5
2.1	Knowledge Network Metaphor	5
2.1.1	Structure	6
2.1.2	Understanding	7
2.1.3	Mechanical Understanding	9
2.2	Concept Development Theories	11
2.2.1	Procedural and Conceptual Knowledge in Mathematics	11
2.2.2	APOS Theory	12
2.2.3	Pröcept Theory	13
2.2.4	Operational and Structural Thinking	14
2.2.5	Theory of Abstraction in Context	15
2.2.6	Theory of Isolated and Generic Models	17
2.3	Advanced Mathematical Thinking	20
2.3.1	Generalisation and Abstraction	21
2.3.2	Proving	22
2.3.3	Natural and Formal Learners	23
2.3.4	Concept Image and Concept Definition	24
2.4	Constructivist Approaches to Mathematics Teaching	26
2.5	Problem Solving	27
2.6	Summary	28
3	General Overview of Methodology	31
3.1	Introduction	31
3.2	Purposes of Research	32

3.3	Research Tool	33
3.3.1	Research Question	34
3.3.2	Data Collection – Clinical Interviews	34
3.4	Summary	36
4	Mathematical Background of the Research	37
4.1	Introduction	37
4.2	Description of RA in Mathematical Terms	38
4.2.1	Preliminaries	38
4.2.2	Main Part	39
4.3	Description of RA in Didactic Terms	44
4.3.1	Reduction	44
4.3.2	Operations of z -addition and z -multiplication	46
4.4	Selected Problems	46
4.4.1	Reduction and Inverse Reduction	47
4.4.2	Additive Equations $a \oplus x = b$	48
4.4.3	Multiplicative Equations $c \otimes x = d$	51
4.4.4	On z -divisibility Tests	54
4.4.5	On z -squares and z -square Roots	55
4.4.6	Quadratic Equations	58
4.4.7	Higher Powers and Sequences	59
4.4.8	Abstract Algebra	60
4.4.9	Recreational Mathematics	61
4.5	Restricted Arithmetic and Abstract Algebra	61
4.6	Conclusions	63
5	Methodology – Pilot Study	65
5.1	Pre-Pilot Study – Introspection	65
5.2	Pilot Study	66
5.2.1	Interview 1	67
5.2.2	Interview 2	70
5.2.3	Interview 3	71
5.3	Pragmatics of Data Analysis of the Pilot Study	75
5.4	Students' Comprehension of Structure – First Attempt	76
5.5	Conclusions for the Pilot Study	78
5.6	Implications for the Main Study	78

6	Methodology – Main Study	81
6.1	Research Questions	81
6.2	Data Collection – Clinical Interviews	81
6.3	Participants	82
6.4	Data Analysis of the Main Study	84
6.4.1	Grounded Theory – Theoretical Overview	84
6.4.2	Atomic Analysis	90
6.5	Pragmatics of Data Analysis	93
6.5.1	Open Coding – Pathways and Categories	94
6.5.2	Axial Coding – Structure of Categories	100
6.5.3	Central Category	102
7	Building Networks	103
7.1	Introduction	103
7.2	Note on Theories Used for Interpretation	103
7.3	Abbreviations Used in the Chapter	104
7.4	Epistemic Actions in Building Networks	105
7.5	Interpretation of z -numbers	106
7.6	Concept Development	110
7.6.1	Reduction and its Inverse	110
7.6.2	Equations $a \oplus x = b, c \otimes x = d$	115
7.6.3	Zero Divisors	120
7.6.4	Operation of z -subtraction and z -negation	122
7.6.5	Operation of z -division	126
7.7	Abstract Algebra Concepts	130
7.8	Learning Styles	134
7.9	Analogy Versus New Structure – Theory of Comprehending Structure	135
7.9.1	Analogies as Obstacles	139
7.9.2	Regularities and Anomalies	141
7.10	U-Shape Development	143
7.11	Conclusions for the Chapter	144
8	Case Study – Longitudinal Study	147
8.1	Introduction	147
8.2	Methods	148
8.2.1	Purposes and Research Questions	148
8.2.2	Participant	148

8.2.3	Description of The Interaction	149
8.2.4	Data Collection – Case Study Database	152
8.3	Pragmatics of Data analysis	152
8.3.1	Note on Roles	153
8.3.2	Analysing Situations of The Interaction	154
8.3.3	Motivation	159
8.4	Small Scale Conceptions	160
8.4.1	Understanding of Inverse Reduction	161
8.4.2	Operation of z -subtraction	164
8.4.3	Operation of z -division	167
8.4.4	Zero Divisors	169
8.5	Global Conception	172
8.5.1	Ownership	172
8.5.2	Pythagorean Triples	174
8.5.3	On z -squares and Higher Powers	177
8.5.4	Mathematical Writing	181
8.6	Conclusions for the Chapter	186
9	Findings and Conclusions	191
9.1	Comprehension of Structure	191
9.2	Evaluation of Research Tools	194
9.2.1	Didactic Potential of RA and Other Mathematical Topics	194
9.2.2	Constructivist Approach	196
9.2.3	Methodological Results	198
9.3	Pedagogical Implications and Further Research	198
