

FOREWORD	8
CHAPTER 1. A BRIEF INTRODUCTION TO RELIABILITY	9
1.1 Basic System Reliability Terminology	9
1.2 Reliability	11
1.3 Availability.....	24
1.3.1 A Brief Introduction to Renewal Theory.....	24
1.3.2 Availability Classifications	25
1.4 Maintainability.....	30
1.5 Failure.....	31
1.5.1 Reliability Centered Maintenance Approach to Failure.....	31
1.5.2 Failure rate	36
1.5.3 The Mean Time Between Failure (MTBF)	37
1.5.4 Inspections.....	38
1.5.5 Downtime Distributions.....	38
1.6 Maintenance	39
1.6.1. Corrective Maintenance	39
1.6.2 Preventive Maintenance.....	39
1.6.3 Optimum Age Replacement Policy.....	41
1.7 Non-Repairable and Repairable Systems.....	42
1.7.1 Series Systems	43
1.7.2 Simple Parallel Systems.....	45
1.8 Using Maintenance Policies.....	47
CHAPTER 2. FRICTION AND WEAR	50
2.1 Friction.....	50
2.1.1 Friction Forces:.....	50
2.2 Wear	52
2.2.1 Adhesive Wear.....	52
2.2.2 Abrasive Wear.....	52
2.2.3 Corrosive Wear	52
2.2.4 Wear by Fatigue.....	53
2.2.5 Contact Corrosion (Fretting Corrosion)	53
2.2.6 Erosion by Cavitation	53
2.2.7 Wear of Electrical Origin.....	54

2.3 Precautions to Be Taken in Order to Minimize Wear on Tractors.....	54
CHAPTER 3 OIL ANALYSIS TESTS.....	55
3.1 Methods for Oil Analysis.....	55
3.1.1 Spectrometry.....	55
3.1.2 Viscosity (Engine Oils).....	55
3.1.3 Viscosity (Industrial Oils).....	55
3.1.4 Dilution.....	56
3.1.5 Water Detection.....	56
3.1.6 Acid Number (AN).....	56
3.1.7 Base Number (BN).....	56
3.1.8 Particle Counting.....	57
3.1.9 Microscopy.....	57
3.2 Interpretation.....	57
3.2.1 Engine Oil Condition.....	59
3.2.2 The Frictional Elements of the Internal Combustion Engine and their Respective Lubrication Modes.....	61
3.2.3 Hydraulic Fluid Condition.....	62
3.3 Determining What Tests to Run.....	64
3.3.1 Engine Oils.....	64
3.3.2 Industrial Hydraulic Fluids.....	65
3.3.3 Lubricant Additives.....	66
3.3.4. Lubricant Protective Additives.....	68
3.4 Ferrography.....	70
3.4.2 Direct Reading (DR) Ferrograph.....	71
3.4.3 Analytical Ferrogram.....	72
CHAPTER 4. ENGINE PERFORMANCE ANALYSIS.....	78
4.1 Renew limit determination through technical diagnostics.....	78
4.2 Engine rehabilitation.....	82
4.3 Ecologically Friendly Use of Farm Machinery.....	84
4.3.1 Five Strategies for Extending Machinery.....	85
4.4 Current trends in fuel economy and emission control.....	88
4.4.1 Quasi-static measurement of fuel consumption through engine exhaust emission.....	88
CHAPTER 5 GUIDELINE FOR REBUILDING REPLACEMENT PARTS AND ASSEMBLIES.....	90

5.1 Support for Mechanization.....	90
5.1.2 Service Support Systems.....	90
5.1.3 The Supply of Replacement Parts.....	91
5.1.4 Inventory Management.....	95
5.2 Objectives.....	98
5.2.1 Economic Objectives.....	98
5.2.2 Material Objectives.....	99
5.2.3 Efficiency Enhancement.....	99
5.2.4. Industrial Development.....	99
5.2.5 Government Support.....	100
5.2.6 Establishment of a Rebuilding Scheme.....	100
5.2.7 Organisational Support.....	101
5.2.8 Logistic Arrangements.....	102
5.3 Types of parts and assemblies for rebuilding.....	103
5.3.1 Assemblies.....	103
5.4 Rebuilding individual parts.....	107
5.4.1 Wom Parts.....	108
5.5 Rebuilding Technologies.....	110
5.5.1 Management techniques.....	110
5.5.2 Workshop techniques.....	113
5.5.3 Test Methods.....	122
5.6 Economic Aspects of Rebuilding Parts and Assemblies.....	124
5.6.1 Economic objectives.....	124
5.6.2 Demand.....	125
5.6.3 Competition.....	125
5.6.4 Marketing.....	126
5.6.5 Durability.....	126
5.6.6 Income.....	127
5.6.7 Costs.....	127
5.6.8 Capital Structure.....	129
5.6.9 Financing Methods.....	129
5.6.10 Operating Costs.....	130
5.6.11 Profit.....	132

5.6.12 Prices	133
5.6.13 Feasibility at local level.....	133
5.6.14 National Feasibility	134
5.6.15 Individual Feasibility Studies	135
5.7 Human Resources.....	135
5.7.1 Staff Planning.....	136
5.7.2 Selection	137
5.7.3 Training	137
5.7.4 Training Programmes.....	138
5.7.5 Topics for Training.....	139
CHAPTER 6 REHABILITATION ISSUES	142
6.1 Some Definitions	143
6.3 The Problem of Premature Failure	144
6.3.1 The Causes of Premature Failure	144
6.3.2 Direct Causes of Premature Failure	147
6.3.3 Prevention and Reduction of Premature Failure.....	147
6.4 The Considerations Surrounding Machinery Renovation Programmes	152
6.4.1 The Objectives of Renovation Programmes.....	152
6.4.2 Renovation Experiences to Date.....	152
6.4.3 The Attitude and Involvement of Machinery Manufacturers with Respect to Rehabilitation Programmes.....	153
6.4.4 Criteria and Supporting Conditions for Rehabilitation Programmes	154
6.4.5 Some conclusions from the in-country experiences described.....	157
6.5 Researching, Planning and Operating Renovation Programmes.....	163
6.5.1 Farm Surveys.....	163
6.5.2 Objectives of the survey	164
6.5.3 The Operational Stages in Tractor Renovation	168
6.5.4 Monitoring and Evaluation.....	170
ANNEX I ENGINE REBUILDING.....	171
REFERENCES	181
