

Content

Preface

| | |
|---|----|
| <i>Petr Sulovský, Josef Zeman</i> Anthropogenic Impacts on Weathering Processes | 9 |
| <i>Renáta Adamcová, Fritz T. Madsen</i> Environmental impact of sludge from ore dressing – an example from Slovakia | 19 |
| <i>Susan L. Brantley</i> Chemical weathering rates of pyroxenes and amphiboles | 29 |
| <i>Andrey G. Bulakh</i> Finnish stone in Saint-Petersburg architecture | 31 |
| <i>Vaclav Cílek</i> Sandstone phenomenon: antagonism between surface hardening and salt weathering | 33 |
| <i>Pavla Češková, Oldřich Janiczek, Martin Mandl</i> Isotachophoretic study of the long-term oxidation of pyrite and sulfur by <i>Thiobacillus ferrooxidans</i> | 39 |
| <i>Ján Čurlík</i> Acidic sulphate weathering and its impact on soil (water) acidification - a case study in Slovakia | 43 |
| <i>Ondrej Ďurža</i> Soil kappametry – a new method for studying soil heavy metals contamination | 44 |
| <i>Jiří Faimon</i> Kinetic modeling of Na ⁺ release from alkali feldspar | 48 |
| <i>Bernd Fitzner, Kurt Heinrichs</i> Evaluation of the weathering state of natural stones by monument mapping | 55 |
| <i>Miroslava Gregerová, Pavel Pospíšil</i> Neogenic minerals of Zbrašov aragonite caves | 65 |

| | |
|---|-----|
| <i>Miroslava Gregerová, Pavel Pospíšil</i> | |
| Causes of degradation of Lednice mansion building materials | 72 |
| <i>Edeltrauda Helios Rybicka, Magdalena Strzebońska, Leokadia Budek</i> | |
| Contaminated alluvia as the sources of heavy metals (Example Przemsza River, Upper Silesia, Poland) | 75 |
| <i>Edeltrauda Helios Rybicka, Adam Piestrzyński</i> | |
| Clay minerals as scavengers and sources of metals in the environment; experimental studies | 83 |
| <i>Edeltrauda Helios Rybicka</i> | |
| Factors describing the mobilization processes of heavy metals in the dusts, wastes, contaminated soils, and sediments from the area of a smelting industry | 89 |
| <i>Mark E. Hodson, Simon J. Langan</i> | |
| Practical and theoretical problems in applying the PROFILE model to calculate soil mineral weathering rates | 98 |
| <i>Simona Jarc, Breda Mirtič</i> | |
| Weathering of some Slovenian building stones under wet and dry conditions | 99 |
| <i>M. S. Jones, R. D. Wakefield</i> | |
| Methodologies and techniques associated with a study of biodeterioration at Hermitage Castle, United Kingdom | 107 |
| <i>M. Jovanovic, V. Jovic and A. Rosic</i> | |
| Weathering of stone columns in the Sveti Sava temple (Belgrade) | 116 |
| <i>V. Jovic</i> | |
| The use of some physical and chemical parameters in the rock weathering study | 117 |
| <i>K. Jiang, T. Esaki, K. Takashima</i> | |
| Physical aspect of weathering evaluation on a stone bridge in Japan | 118 |
| <i>Miloš Klíma, Petr Sulovský</i> | |
| Corrosion of ancient glasses and their conservation by plasma-treatment | 126 |
| <i>Martin Komárek, Josef Zeman</i> | |
| The influence of feldspars on pyrite dissolution | 127 |
| <i>P. Kotlík, K. Bayer, V. Heidingsfeld, J. Kaše, J. Váňa, I. Vaněček, J. Weber</i> | |
| The Sandstone Sculptures by M.B.Braun in Betlém near Kuks | 128 |
| <i>Simon J. Langan, Mark E. Hodson, D. C. Bain</i> | |
| The calculation of weathering rates for natural ecosystems | 141 |
| <i>Otília Lintnerová</i> | |
| Weathering of rock minerals in extremely acid environment of mine waters | 142 |
| <i>Martin Mandl, Iva Bartáková</i> | |
| Laboratory investigation of pyrite waste (bio)oxidation as a weathering process in sulfide deposits | 143 |
| <i>Martin Mandl, Vít Prudil, Josef Zeman</i> | |
| Electrochemical parameters of pyrite (bio)oxidation | 148 |
| <i>Andrzej Manecki, Mariola Marszałek, Marzena Schejbal-Chwastek,</i> <i>Andrzej Skowroński</i> | |
| Stone decay in some historic buildings of Cracow (Poland) and its reasons | 149 |
| <i>P. Martinec, M. Mašlán, D. Jančík</i> | |
| Mössbauer Study of Fe-bearing minerals in weathered crust of upper carboniferous sedimentary rocks | 157 |

| | | |
|--|---|-----|
| <i>A. Melegy, T. Pačes</i> | Rate of weathering estimated from monitoring of small catchments and PROFILE modelling | 158 |
| <i>Marek Michalík, Wanda Wilczynska-Michalik</i> | The influence of air pollution on weathering of building stones in Kraków | 159 |
| <i>Luděk Minařík, Miloš Burian, Jiří K. Novák</i> | Mobility of some metals during leaching of the rocks | 168 |
| <i>P. W. Mirwald, St. Brüggerhoff, R. Fimmel, G. Laidig</i> | Stone materials as sensors for environmental monitoring – results of field exposure studies | 173 |
| <i>Pavel Ondráček, Josef Zeman</i> | The dynamics of matter exchange in Nové Mlýny basins (South Moravia) | 182 |
| <i>Lioudmila A. Pavlova, M. J. Wilson</i> | Environmental pollution by industrial waste in Ukraine and its impact upon weathering processes | 183 |
| <i>Jan Šrámek</i> | Weathering of rocks on historical monuments - influence of clay minerals | 191 |
| <i>Jozef Stankovič, Eva Šamajová, Lida Turanová, Ján Turan</i> | Occurrences of halloysite in the zone of weathering processes on ore deposits of Slovenské Rudohorie Mts. | 193 |
| <i>Jozef Stankovič, Jozef Krištín, Mária Čaplovičová, Ondrej Chreňo</i> | Electron-microscopical study of environmental pollutions: investigation of asbestos minerals in disintegrating and weathering processes | 195 |
| <i>Vladimír Šucha, Ivan Kraus, Marian Zlocha, Viera Banášová, Vladimír Streško, Otília Lintnerová, Peter Uhlík</i> | Environmental impact of pyrite dissolution in mining region of Banská Štiavnica (Slovakia) | 197 |
| <i>Petr Sulovský</i> | Fly ash: a burdensome waste or a secondary raw material? | 198 |
| <i>Harald Sverdrup</i> | Experimental kinetics of hornblende and epidote and their importance in integrated soil modeling | 208 |
| <i>Harald Sverdrup, Mattias Alveteg</i> | PROFILE - The integrated model for transferring laboratory weathering kinetics to field conditions | 218 |
| <i>S. Trtíková, M. Chovan, M. Kušnierová</i> | Oxidation of pyrite and arsenopyrite in the mining wastes (Pezinok - Malé Karpaty Mts., Slovakia) | 225 |
| <i>Myrsini Varti - Matarangas</i> | The weathering of carbonate building stones controlled by their facies features. Case studies | 232 |
| <i>Wanda Wilczynska-Michalik, Marek Michalík</i> | Differences of the mechanisms of weathering of the Jurassic limestones related to the concentration of air pollution | 233 |
| <i>M. J. Wilson, J. C. L. Meeussen</i> | Weathering of a sandstone monument in a polluted environment: a case study | 240 |

| | |
|---|-----|
| <i>M. J. Wilson, L. Blake, K. Goulding</i> | |
| Impact of acid deposition on soil clay mineralogy | 248 |
| <i>Josef Zeman</i> | |
| Dynamics of limestone dissolution and secondary carbonates formation in the Moravian Karst | 249 |
