|   |           |
|---|-----------|
| Contributors  | page ix   |
| Preface   | xi        |
| <b>Part 1 Water transport and uptake</b>  | <b>1</b>  |
| <b>(A) Mechanisms of epithelial fluid transport</b>   | <b>3</b>  |
| 1 Intracellular gradients in electrical potential and ion activity in absorptive epithelia<br>T. ZEUTHEN  | 3         |
| 2 Fluid transport by corneal endothelium<br>JORGE FISCHBARG   | 21        |
| 3 Fluid transport across <i>Necturus</i> gallbladder epithelium<br>A. E. HILL   | 41        |
| 4 Observations on the action of urea and other substances in opening the paracellular pathway in amphibian skins<br>E. GONZÁLEZ, T. KIRCHAUSEN, H. LINARES & G. WHITTEMBURY | 43        |
| <b>(B) Uptake of water vapour by arthropods</b>   | <b>53</b> |
| 5 Absorption of water vapour by <i>Thermobia domestica</i> and other insects<br>J. NOBLE-NESBITT  | 53        |
| 6 Water vapour uptake by <i>Tenebrio</i> : a new approach to studying the phenomenon<br>JOHN MACHIN   | 67        |
| 7 Uptake of water vapour by mites and mechanisms utilized by the Acaridei<br>G. W. WHARTON  | 79        |
| 8 Uptake of water vapour from the air: process, site and mechanism in ticks<br>DIETER RUDOLPH & WILLI KNÜLLE  | 97        |

vi Contents

|   |  |     |
|---|--|-----|
| 9   | The site of water vapour absorption in <i>Arenivaga investigata</i><br>M. J. O'DONNELL   | 115 |
| <b>Part 2 Osmotic and ionic regulation in unbalanced environments</b> |  | 123 |
| <b>(A) Non-vertebrates</b>  |  | 125 |
| 10  | Some strategies of osmoregulation and ion transport in microorganisms<br>D. J. ELLAR   | 125 |
| 11  | Mechanisms of ionic and osmotic regulation in saline-water mosquito larvae<br>JOHN E. PHILLIPS, T. J. BRADLEY & S. H. P. MADRELL   | 151 |
| 12  | Inhibition of magnesium secretion in the prawn <i>Palaemon serratus</i> by ethacrynic acid and by ligation of the eyestalks<br>S. E. FRANKLIN, B. TEINSONGRUSMEE & A. P. M. LOCKWOOD | 173 |
| <b>(B) Vertebrates</b>  |  | 195 |
| 13  | Electrolyte transport across the bird coprodeum: role in osmoregulation<br>ERIK SKADHAUGE  | 195 |
| 14  | Salt glands in marine birds: what triggers secretion and what makes them grow<br>M. PEAKER   | 207 |
| 15  | Aspects of the adaptation of fish to high external alkalinity: comparison of <i>Tilapia grahami</i> and <i>T. mossambica</i><br>J. MAETZ & G. DE RENZIS                              | 213 |
| 16  | Osmoregulation in <i>Tilapia grahami</i> : a fish in extreme alkalinity<br>G. M. O. MALOIY, G. LYKKEBOE, K. JOHANSEN & O. S. BAMFORD   | 229 |
| 17  | The internal environment of marine fish<br>RAGNAR FÄNGE  | 239 |
| 18  | Control of catecholamine release from chromaffin tissue in teleost fish<br>T. ABRAHAMSSON & S. NILSSON   | 247 |
| <b>Part 3 Fluid mechanics in biology</b>                              |  | 253 |
| 19  | Fluid propulsion by cilia and flagella<br>M. A. SLEIGH   | 255 |

|    |   |     |
|----|---|-----|
| 20 | <b>Fluid skeletons in aquatic and terrestrial animals</b>           | 267 |
|    | <b>H. D. JONES</b>  |     |
| 21 | <b>The fluid mechanics of circulatory systems</b>                   | 283 |
|    | <b>T. J. PEDLEY</b>   |     |
| 22 | <b>Convective flows in mammalian lungs</b>                          | 303 |
|    | <b>R. C. SCHROTER</b>   |     |
| 23 | <b>The aerodynamics of normal hovering flight: three approaches</b> | 327 |
|    | <b>C. P. ELLINGTON</b>  |     |

|              |  |            |
|--------------|--|------------|
