

<b>1. METHODS OF EXPLOITATION OF DEPOSITS IN THE EARTH'S CRUST .....</b>	<b>1</b>
<b>2. OVERVIEW OF MINING PROBLEMS OF UNDERGROUND MINES IN RELATION TO THE RAW MATERIAL MINED.....</b>	<b>1</b>
2.1. Coal Mines.....	1
2.2. Metalliferous Mines .....	2
2.3. Nonmetalliferous Mines .....	2
2.4. Uranium Mines .....	3
<b>3. EVALUATION OF NATURAL CONDITIONS OF THE DEPOSIT BASED ON GEOLOGICAL EXPLORATION DATA.....</b>	<b>3</b>
<b>4. DETERMINATION OF BASIC PARAMETERS OF MINES .....</b>	<b>4</b>
4.1. Protected Deposit Area and Mining Claim .....	4
4.2. Mine Capacity.....	5
4.3. Height of the Level and Life of the Level .....	5
4.4. Load of Productive Mining Claim .....	6
4.4.1. <i>Target Figure Given in <math>t \cdot ha^{-1}</math> of Daily Output</i> .....	6
4.4.2. <i>Target Figure Given in <math>m^2 \cdot ha^{-1}</math> of Daily Output</i> .....	7
4.5. Operational Range of Mine Transport .....	7
4.6. Evaluation of Hydrogeological, Gas and Formation Conditions.....	7
4.6.1. <i>Evaluation of Hydrogeological Conditions of the Mining Claim</i> .....	7
4.6.2. <i>Evaluation of Gas Conditions of the Mining Claim</i> .....	8
4.6.3. <i>Evaluation of Formation Conditions in the Mining Claim</i> .....	8
<b>5. CONCEPTUAL DESIGN OF THE BASIC EARLY DEVELOPMENT OF MINES .....</b>	<b>8</b>
5.1. Location of the First Opening and Solving of the Surface Situation of the Mine ..	9
5.2. Design of Basic Early Development of the Mine .....	9
5.2.1. <i>Simple Methods of Early Development</i> .....	9
5.2.2. <i>Combined Methods of Basic Early Development</i> .....	9
5.3. Non-Traditional Basic Early Development of the Mine .....	9
5.3.1. <i>Opening of the Ore Deposit by Ramp</i> .....	10
5.3.2. <i>Early Development of the Coal Deposit by Inclined Openings</i> .....	10
<b>6. EARLY DEVELOPMENT OF THE LEVEL .....</b>	<b>10</b>
6.1. Hard Coal Mines.....	10
6.1.1. <i>Early Development without Levels</i> .....	10
6.1.2. <i>Early Development by Striking the Seams</i> .....	11
6.1.3. <i>Early Development by Seam Undermining</i> .....	11
6.2. Brown Coal and Lignite Mines.....	11
6.3. Metalliferous, Nonmetalliferous and Uranium Mines .....	12
6.4. Time Schedule for Early Development of the Mine .....	12

<b>7. PRODUCTIVE DEVELOPMENT OF THE DEPOSIT ON THE LEVEL .....</b>	<b>13</b>
7.1. Coal Mines.....	13
7.1.1. <i>Basic Schemes of Preparatory Works</i> .....	13
7.1.2. <i>Target Figure of Preparation</i> .....	14
7.2. Metalliferous, Nonmetalliferous and Uranium Mines .....	14
7.2.1. <i>Preparatory Mine Workings – in General</i> .....	14
7.2.2. <i>Chute Systems inside Stopes</i> .....	14
7.2.3. <i>Principles for the Design of Preparatory Works</i> .....	15
<b>8. OPTIMISATION OF THE CROSS-SECTIONS OF LONG MINE WORKINGS.....</b>	<b>15</b>
<b>9. STRATEGY FOR THE MINING OF RESERVES.....</b>	<b>15</b>
9.1. Coal Mines with Multi-Seam Deposits .....	15
9.2. Metalliferous Mines .....	17
<b>10. DESIGNS OF HORIZONTAL AND VERTICAL TRANSPORT.....</b>	<b>17</b>
10.1. Horizontal Transport .....	17
10.2. Vertical Transport .....	18
<b>11. PRINCIPLES FOR PLANNING IN DEEP MINES .....</b>	<b>18</b>
11.1. Coal Mines.....	18
11.1.1. <i>Mine Capacity and Life</i> .....	18
11.1.2. <i>Design of Development</i> .....	19
11.1.3. <i>Mining Methods and Advance</i> .....	19
11.1.4. <i>Support of Mine Workings</i> .....	19
11.1.5. <i>Protection of Mine Workings</i> .....	20
11.1.6. <i>Ventilation, Degasification and Worsening Influences</i> .....	21
11.1.7. <i>Dealing with Microclimatic Conditions</i> .....	21
11.1.8. <i>Hoisting and Drainage</i> .....	22
11.1.9. <i>Organisation of Building</i> .....	22
11.1.10. <i>Backfilling Management</i> .....	22
11.2. Ore and Uranium Mines .....	23
<b>12. TECHNICAL- ECONOMIC INDICES CHARACTERISING THE OVERALL MINE CONCEPTION.....</b>	<b>23</b>
<b>13. DEVELOPMENT AND MINING PLANS AND TECHNOLOGICAL PROCESS .....</b>	<b>25</b>
13.1. Development and Mining Plans.....	25
13.2. Technological Process.....	28
<b>14. GENERAL DIVISION OF THE DESIGN OF THE MINE .....</b>	<b>28</b>

The high level of mechanisation in faces and passage driving is typical mainly of hard coal; a somewhat lower level of mechanisation is characteristic of the driving of openings
