

Table of contents

Acknowledgements	5
Introduction	6
Chapter 1: Synthesis of existing knowledge	8
1.1 Non related driving functions	8
1.2 Driving-related functions.....	9
1.3 Needs of further research.....	12
1.5 Summary and conclusions.....	13
1.6 References.....	13
Chapter 2: Methodology	16
2.1 Introduction	16
2.2 Experiments in the laboratory and in the simulator	16
2.2.1 Methods for experiments in the laboratory	17
2.2.2 Evaluating the impacts of IVIS use in the simulator	18
2.3 Exploring IVIS use in everyday life and real traffic	19
2.3.1 In-depth interviews.....	19
2.3.2 Observation of driving behaviour in the field: The Vienna Driving Test (VDT)	20
2.4 Summary.....	22
2.5 References.....	22
Chapter 3: Driver behaviour – simulator studies	25
3.1 Introduction	25
3.2 Consistency of results through experiments.....	27
3.2.1 Experiment 1	27
3.2.1.1 Introduction	27
3.2.1.2 Main results and discussion	28
3.3 Simultaneous use of information systems.....	29
3.3.1 Experiment 2	29
3.3.1.1 Introduction	29
3.3.1.2 Main results and discussion	30
3.3.2 Experiment 3	31
3.3.2.1 Introduction	32
3.3.2.2 Main results and discussion	33
3.4 Taking into account drivers' representations	34
3.4.1 Introduction	34
3.4.2 Driver Skill Inventory (DSI)	34
3.4.3 Questionnaire on the Representations of new Technologies in vehicle (QRT).....	35
3.4.4 Main results and discussion	35
3.4.4.1 Global results from questionnaires	35
3.4.4.2 Drivers' representations and driving performances.....	36
3.5 Conclusion	37
3.6 References.....	39
Chapter 4: Risk indicators – Unsafe traffic conditions	44
4.1 Introduction	44
4.2 Study Site.....	44
4.3 Risk Indicators	47
4.4 Simulation Model.....	50
4.5 Conclusion	52
4.6 References.....	53

Chapter 5: Driver behaviour – Real traffic research studies	55
5.1 Introduction	55
5.2 Experiment 1: Switzerland, UNI/ETH Zurich	55
5.2.1 Introduction	55
5.2.2 Participants.....	55
5.2.3 Description of experimental vehicle	56
5.2.3.1 In-Vehicle Information Systems (IVIS).....	56
5.2.3.2 Video camera.....	56
5.2.3.3 Auditory simple reaction time task (ASRTT)	57
5.2.3.4 Black box computer for data acquisition	57
5.2.4 Procedure and experimental design.....	58
5.2.4.1 Dependent variables	59
5.2.4.2 Independent variables, experimental factors	59
5.2.4.3 Interfering variables, side factors.....	61
5.2.4.4 Experimental design	61
5.2.4.5 Test drive procedure.....	62
5.2.5 Data analysis.....	62
5.2.5.1 Section breakdown of experimental routes	62
5.2.5.2 Mobile phone task and ASRTT	63
5.2.5.3 Dependent variables from traffic engineering point of view.....	63
5.2.6 Main results from traffic engineering point of view.....	63
5.2.6.1 Single driver analysis.....	63
5.2.6.2 ANOVA analysis	65
5.2.6.3 Conclusion regarding road safety.....	68
5.2.7 Perspectives	68
5.3 Experiment 2: Poland	68
5.3.1 Introduction	68
5.3.2 Participants.....	69
5.3.3 Description of experimental vehicle	69
5.3.3.1 In-Vehicle Information Systems (IVIS).....	70
5.3.3.2 HD in-car video camera.....	70
5.3.3.3 HD outside video cameras	70
5.3.3.4 Sensors registering speed and acceleration/breaking.....	71
5.3.4 Procedure and experimental design.....	73
5.3.4.1 Dependent variables	73
5.3.4.2 Independent variables, experimental factors	75
5.3.4.3 Test drive procedure.....	76
5.3.4.4 Interfering variables, side factors.....	76
5.3.5 Data results	76
5.3.6 Data analysis.....	79
5.3.7 Conclusion.....	81
5.3.8 Perspectives	81
Final thoughts	82
List of COST Action 352 participants	84

Annex: CD-Rom containing detailed research results submitted by the authors of the above as well as additional video illustrations.
