

PREFACE

1.	An overview	3
2.	Wastewater flowrates	5
3.	Physical, chemical, and biological characteristics of wastewater	6
4.	Physical unit operations	15
5.	Chemical unit processes	17
6.	Biological unit processes	18
7.	Design of facilities for physical and chemical treatment of wastewater	21
8.	Design of facilities for the biological treatment of wastewater	23
9.	Advanced wastewater treatment	24
10.	Design of facilities for the treatment and disposal of sludge	27
11.	Natural treatment systems	32
12.	Small wastewater treatment systems	34
13.	Wastewater reclamation and reuse	36
