

TABLE OF CONTENTS

PREFACE	12
ABBREVIATIONS AND SYMBOLS	15
GENERAL PART	
BASIC CATEGORIES AND CONCEPTS	19
INDICATION FOR GRAFT BIOPSY	22
TECHNIQUE OF GRAFT BIOPSY	25
COLLECTION AND PROCESSING OF THE BIOPTIC SAMPLE	26
GENERAL DESCRIPTION OF THE BIOPTIC SAMPLE	33
Morphology of glomeruli	34
Morphology of tubules	36
Morphology of the interstitial structures	38
Morphology of graft vessels	39
Morphology of extrarenal tissues	42
Conclusion	42
CLASSIFICATION OF GRAFT DAMAGE	43
SPECIAL PART	
NORMAL BIOPTIC FINDING	53
REJECTION DAMAGE IN THE INITIAL POST-TPL PERIOD	55
Graft damage by hyperacute rejection	58
ABO incompatibility and cold haemagglutinins	59
Initial leukostasis in graft and disseminated microthrombosis	60
Differential diagnosis of initial graft necrosis	61
Clinical aspects of initial graft destruction	64
REJECTION LESIONS OF THE EARLY TYPE	66
EARLY CELLULAR-TUBULOINTERSTITIAL REJECTION DAMAGE (TIC)	66
The cells of rejection infiltrate	66
Topography of the cellular infiltrate	68
Graft parenchyma in TIC	72
Ultrastructure of TIC	75
Immunofluorescence microscopy of TIC	85
Immunohistochemistry of TIC	86
Modification of TIC by antirejection therapy	96
Quantitative assessment of TIC	100
Qualitative assessment of TIC	101

The authors' evaluation of TIC	104
Differential diagnosis of TIC	105
Discrete or minimal TIC	108
Interpretation and assessment of TIC	112
TIC – clinical aspects and conclusion	114
EARLY VASCULAR REJECTION DAMAGE	115
MINIMAL VASCULAR CHANGES	116
EARLY REJECTION ARTERIOPATHIES	118
Cellular arteriopathy (CA)	118
Light microscopy of CA	118
Ultrastructure of CA	122
Interpretation and assessment of CA	126
CA – conclusion	131
Obliterative and necrotizing arteriopathy (OA, NA)	132
Light microscopy of OA	132
Light microscopy of NA	137
Ultrastructure of OA and NA	138
Immunohistochemistry of CA, OA and NA	141
Semiquantitative assessment of rejection arteriopathies	147
Differential diagnosis of early rejection arteriopathies	147
Interpretation and assessment of OA and NA	149
Clinical aspects of early rejection arteriopathies	155
OA – conclusion	158
NA – conclusion	160
EARLY SEGMENTAL GLOMERULOPATHY (SG)	161
Light microscopy of SG	161
Ultrastructure of SG	165
Immunohistochemistry of SG	174
Differential diagnosis of SG	175
Interpretation and assessment of SG	176
Clinical aspects of SG	182
SG – conclusion	182
REJECTION LESIONS OF THE LATE TYPE	186
CELLULAR INFILTRATION IN THE LATE STAGE	187
Light microscopy and differential diagnosis	187
Interpretation and significance of the late infiltration	189
LATE TUBULOINTERSTITIAL SCLEROSIS (TIS)	189
Light microscopy of TIS	190
Differential diagnosis of TIS	192
Interpretation and significance of TIS	194
LATE REJECTION ENDARTERITIS (EA)	194
Light microscopy of EA	195
Ultrastructure of EA	198
Immunohistochemistry of EA	201
Differential diagnosis of EA	202
Interpretation and assessment of fibrous EA (EAF)	203
Interpretation and assessment of degenerative EA (EAD)	207
EA – conclusion	212
LATE MEMBRANOUS REJECTION GLOMERULOPATHY (MG)	213
Light microscopy of MG	214
Ultrastructure of MG	215
Immunohistochemistry of MG	218

Differential diagnosis of MG	218
MG – conclusion	220
Late rejection damage – clinical aspects and summary	220
NON-REJECTION GRAFT LESIONS	224
RENAL DAMAGE BEFORE TPL (<i>by P. Rossmann and M. Chadimová</i>)	224
Nephroangiosclerosis of the zero-hour kidney	225
Transfer of glomerulonephritis	227
Microthrombosis of donor kidney	228
Transfer of infection and tumour	228
Terminal-period and preservation injury	230
NON-IMMUNE GRAFT NECROSIS AND RELATED CONDITIONS	233
Total graft necrosis	234
Thrombosis of main graft vessels	235
Graft infarct	237
Post-TPL microthrombosis; necrosis without main vessel occlusion	238
ACUTE TUBULOINTERSTITIAL NEPHROPATHY (ATN)	239
Light microscopy of ATN	239
Ultrastructure of ATN	242
Immunohistochemistry of ATN	244
Persistent (protracted) ATN	245
Differential diagnosis of ATN	246
Interpretation and assessment of ATN	247
ATN – clinical aspects	253
ATN – conclusion	254
SURGICAL AND OTHER COMPLICATIONS	255
GRAFT DAMAGE BY INFECTION	256
Tubulointerstitial nephritis (TIN) of graft	257
Interpretation and assessment of TIN	261
Clinical aspects of TIN	264
Tuberculosis and fungal infection of graft	265
Viral infection of graft	267
GRAFT DAMAGE BY CYCLOSPORIN A TOXICITY	273
CyA-associated tubular damage	274
Differential diagnosis of toxic tubulopathy	279
Interpretation and significance of toxic tubulopathy	280
CyA-associated insudative vasculopathy (IVA)	281
Differential diagnosis of IVA	290
Interpretation and significance of IVA	291
CyA-associated glomerulopathy (CAG)	294
Differential diagnosis of CAG	295
Interpretation and significance of CAG	296
CyA-associated vascular thrombosis	297
Differential diagnosis of graft microthrombosis	299
CyA-associated tubulointerstitial changes	300
Clinical aspects of CyA toxicity	301
CyA-toxic damage – conclusion	304
TOXIC DAMAGE BY OTHER DRUGS	306
GRAFT DAMAGE BY RECURRENCE AND TRANSMISSION OF RECIPIENT'S DISEASE	307
Recurrent and <i>de novo</i> glomerulonephritis (GN)	308
Light microscopy of graft GN	309
Ultrastructure of graft GN	310
Immunofluorescence microscopy of graft GN	311

Individual types of graft GN and focal-segmental glomerulosclerosis (FSG)	311
Clinical aspects of graft GN	323
Other recurrent and <i>de novo</i> diseases	324
RENOVASCULAR GRAFT LESION	327
TUMOURS OF THE GRAFT	328
