

Content

1. Introduction	5
2. Physical Properties of Rocks	5
2.1. Mass- and Weight-Related Properties of Rocks	5
2.2. Spaces in the Rock Unfilled with the Solid Phase	7
2.3. Water in Rocks	7
2.3.1. Mass-Related Moisture Content	7
2.3.2. Volumetric Moisture Content	8
2.3.3. Degree of Water Saturation	8
2.3.4. Absorptivity of Rocks	9
2.3.5. Rock Permeability	9
2.3.6. Physical-Chemical Properties of Rocks	9
2.4. Gases in Rocks	11
3. Mechanical Properties of Rocks	14
3.1. Strength Properties	15
3.1.1. Tensile Strengths	15
3.1.2. Compression Strength	19
3.1.3. Tangential Strength	24
3.2. Deformation Properties of Rocks	25
3.2.1. Rock Deformation before Reaching the Ultimate Strength	26
3.2.2. Rock Deformation after Reaching the Ultimate Strength	31
3.3. Rheological Properties of Rocks	32
3.3.1. Rock Creep	32
3.3.2. Rock Relaxation	33
3.4. Energy Response of Rocks	33
3.5. Influences Affecting the Determined Properties of Rocks	34
3.5.1. Influence of the State of Test Piece Machining	34
3.5.2. Influence of the Size of Test Pieces	35
3.5.3. Influence of the Shape of Test Pieces	35
3.5.4. Influence of Loading Rate	36
3.5.5. Influence of Press Stiffness	36
3.5.6. Influence of the Moisture Content of a Rock	38
4. Technological Properties of Rocks	39
4.1. Loosening and Void Content of Rocks	39
4.2. Rock Compressibility	41
4.2.1. Compressibility of Compact Rocks	41
4.2.2. Compressibility of Broken Rocks	42
4.3. External Friction of Rocks	45
4.4. Breaking Characteristic of Rocks	46
4.5. Rock Abrasiveness	46
4.6. Rock Hardness	46
5. Conditions of Limit States	47
