

CONTENTS

CONTENTS	3
PREFACE	4
CHAPTER 1 INTRODUCTION TO GENERAL CHEMISTRY	5
1.1 Some basic definitions	5
1.2 Atomic structure	7
1.3 Periodic table of elements and chemical bonding	11
1.4 Properties of matter	13
1.4.1 Properties of the three phases	13
1.5 Chemical reactions	16
1.5.1 Thermochemistry	16
1.5.3 Chemical equilibrium	18
1.6 Electrolyte solutions	19
1.6.1 Brønsted acids and bases	19
1.7 Oxidation and reduction	21
1.7.1 Oxidation-reduction reactions	21
1.7.2 Electrochemistry	23
CHAPTER 2 INTRODUCTION TO CHEMISTRY OF ELEMENTS	25
2.1 Basic elements – hydrogen, oxygen	25
2.2 The s – block elements	28
2.2.1 The s^1 elements. Sodium, potassium	28
2.2.2 The s^2 elements. Magnesium, calcium	29
2.3 The p – block elements	30
2.3.1 The p^1 elements. Aluminium	30
2.3.2 The p^2 elements. Carbon, silicon, tin, lead	31
2.3.3 The p^3 elements. Nitrogen, phosphorus	36
2.3.4 The p^4 elements. Sulphur	39
2.3.5 The p^5 elements – halogens	40
2.3.6 The p^6 elements – noble gases	42
2.4 The d-block elements	43
2.5 The f-block elements	46
CHAPTER 3 SOME ORGANIC COMPOUNDS OF CARBON	46
3.1 Hydrocarbons	47
3.2 The derivatives of hydrocarbons	49
3.3 Coal, crude oil and natural gas	50
