

## CONTENTS

|   |           |
|---|-----------|
| <b>1. INDEFINITE INTEGRALS .....</b>  | <b>3</b>  |
| 1.1. The Indefinite Integral.....   | 3         |
| 1.2. Computation of Integrals.....  | 3         |
| 1.3. Some Properties of the Indefinite Integral .....                             | 5         |
| 1.4. Substitution .....   | 5         |
| 1.4. Integration by Parts .....   | 7         |
| <b>2. DEFINITE INTEGRALS .....</b>  | <b>9</b>  |
| 2.1. The Definite Integral.....   | 9         |
| 2.2. The Area Problem and the Definite Integral .....                             | 10        |
| 2.3. Rules for Definite Integrals.....  | 11        |
| 2.4. Integration by Parts in Definite Integrals .....                             | 12        |
| 2.5. Substitution in Definite Integrals .....                                     | 12        |
| 2.6. Applications of Integration .....  | 13        |
| Finding Areas under Curves.....   | 13        |
| Area Between Two Curves .....   | 14        |
| Volumes of Revolution.....  | 15        |
| The Length of a Curve .....   | 16        |
| Area of Surface of Revolution .....   | 17        |
| <b>3. DIFFERENTIAL EQUATIONS .....</b>  | <b>18</b> |
| 3.1. Introduction .....   | 18        |
| 3.2. Separable Equations.....   | 20        |
| 3.3. Linear Differential Equations .....  | 21        |
| Homogeneous Linear Differential Equation .....                                    | 21        |
| Nonhomogeneous Linear Differential Equation .....                                 | 23        |
| Method for Solving Linear Differential Equation .....                             | 23        |
| 3.4. Linear Differential Equations $n^{\text{th}}$ order .....                    | 25        |
| 3.5. Homogeneous Equations with Constant Coefficients.....                        | 26        |
| 3.6. Homogeneous $2^{\text{nd}}$ Order Equations with Constant Coefficients ..... | 27        |
| I. Real Distinct Roots:.....  | 27        |
| II. Repeated Roots:.....  | 27        |
| III. Complex Conjugate Roots: .....   | 28        |
| 3.6. Nonhomogeneous Equations with Constant Coefficients.....                     | 29        |
| Method of Variation of Parameters.....  | 30        |
| Method of Undetermined Coefficients.....  | 32        |
| <b>LITERATURE .....</b>   | <b>35</b> |
