<b>Preface</b> .....	<b>3</b>
<b>Acknowledgements</b> .....	<b>4</b>
<b>Abstract – Aim and Scope of Thesis</b> .....	<b>5</b>
<b>Abstract – Aim and Scope of Thesis in Czech</b> .....	<b>7</b>
<b>1 Introduction</b> .....	<b>9</b>
<b>2 Electroactive polymers</b> .....	<b>11</b>
2.1 $\pi$ conjugated polymers.....	11
2.2 Charge carriers.....	13
<b>3 Polysilanes</b> .....	<b>16</b>
3.1 Synthesis of polysilanes.....	16
3.2 Electronic properties of polysilanes.....	18
3.3 $\sigma$ conjugation.....	21
3.4 Dimensionality of organosilicon materials.....	22
3.5 UV degradation of polysilanes.....	24
<b>4 Overview of experimental techniques</b> .....	<b>27</b>
4.1 Plasma discharges.....	27
4.2 Plasma deposition of organosilicon thin films.....	29
4.3 Characterization of plasma by the mass spectroscopy.....	36
4.4 Non-plasmatic preparation techniques of organosilicon materials.....	38
4.5 Characterization of prepared thin films.....	40
4.6 Experimental polysilane UV degradation studies.....	46
<b>5 Goals of the thesis</b> .....	<b>47</b>
<b>6 Theoretical calculations of vibrational spectra</b> .....	<b>48</b>
6.1 Computational methods.....	49
6.2 Wavenumber calculations.....	51
6.3 Internal rotation in methylphenylsilane.....	54
6.4 Vibrational spectra of methylphenylsilane.....	56
6.5 Homolytic bond dissociation energies.....	60
6.6 Infrared absorption spectra of chlorinated monomer.....	61
6.7 Infrared absorption spectra of poly(methylphenylsilylene).....	63
6.8 Conclusion – Interpretation of polysilanes vibrational spectra.....	66
<b>7 Polysilanes – UV degradation</b> .....	<b>67</b>
7.1 Experimental results.....	68
7.2 Discussion of UV polysilylene degradation process.....	74

7.3 Conclusions – Polysilylene degradation .....	79
<b>8 Plasma deposited polymers .....</b>	<b>80</b>
8.1 Characterisation of plasma deposition process .....	81
8.2 Plasmatic polysilanes .....	100
8.3 UV light degradation of plasmatic polysilanes .....	121
8.4 Conclusions – Plasma polymerisation and plasmatic polysilanes .....	123
<b>9 Thermal desorption analysis and spectroscopy of plasmatic materials .....</b>	<b>127</b>
9.1 Theoretical analysis of TDA method .....	127
9.2 Testing of Thermal Desorption Analysis .....	129
9.3 Temperature growth rate influence to TDA spectra.....	132
9.4 Thermal treatment of plasmatic materials .....	136
9.5 Conclusions – TDA of plasmatic polysilanes .....	144
<b>10 Conclusions of thesis .....</b>	<b>145</b>
<b>11 Suggestions for the future research – A quest for polysilane application .....</b>	<b>149</b>
<b>Notation – Used abbreviations, quantities and their units.....</b>	<b>151</b>
<b>References .....</b>	<b>155</b>
<b>Curriculum Vitae .....</b>	<b>170</b>
<b>List of papers .....</b>	<b>173</b>

I would like to thank my supervisor, Prof. Dr. ... for his sense of humour and for his sense of humour.

To Pavel Broza for helping me by plasma-enhanced synthesis.

To all former physics group members and colleagues not explicitly mentioned here for the friendship and discussions of peculiar physics ideas.

Lastly, I would like to thank my mother, father, and brother for their love and support they have always shown me. Their confidence in my abilities and encouragement with my research has helped me grow as a researcher.
