Introduction	5
List of abbreviations	8
Used symbols and formatting tools	8
1. Organism and environment, adaptation (<i>M. Kuba</i>)	9
2. Health versus disease, Clinical and biological (somatic) death (<i>M. Kuba</i>)	11
3. Etiology and pathogenesis (<i>M. Kuba</i>)	13
4. Pathologic changes in immunoreactions – immunodeficiencies, autoimmune disorders, post-transplantation reaction, allergies (<i>M. Kuba</i>)	15
5. Neoplasia, neoplasm-host interaction (effects) (<i>M. Kuba</i>)	19
6. Alterations in fluid volume (<i>M. Kuba</i>)	23
7. Disorders of osmolarity, etiology and pathogenesis of edema (<i>M. Kuba</i>)	25
8. Hyponatremia, hypernatremia (<i>M. Kuba</i>)	29
9. Hypokalemia, hyperkalemia (<i>M. Kuba</i>)	31
10. Deficiency of trace elements – body dysfunctions (<i>M. Kuba</i>)	33
11. Disorders of Calcium, Phosphorus and Magnesium metabolism (<i>M. Kuba</i>)	35
12. Metabolic osteopathy (<i>M. Kuba</i>)	41
13. Tetany, pathophysiology of cramps (<i>M. Kuba</i>)	43
14. Acidosis (<i>Z. Kubová, M. Kuba</i>)	45
15. Alkalosis (<i>Z. Kubová</i>)	49
16. Disorders of peripheral circulation (<i>Z. Kubová</i>)	53
17. Circulatory Collapse, Syncope (<i>Z. Kubová, M. Kuba</i>)	55
18. Circulatory shock (<i>Z. Kubová, M. Kuba</i>)	57
19. Pathophysiology of inflammation, sepsis (<i>M. Kuba</i>)	59
20. Pathophysiology of pain (<i>Z. Kubová</i>)	63
21. Pathophysiology of thermoregulation, fever, hypothermia (<i>M. Kuba</i>)	67
22. Stress, General adaptation syndrome, Psychosomatic diseases (<i>M. Kuba</i>)	71
23. Etiology and pathogenesis of anemias (<i>M. Kuba</i>)	73
24. Blood transfusion, complications, fetal erythroblastosis (<i>M. Kuba</i>)	75
25. Leukemias – etiology and pathogenesis, lymphoma, myeloma (<i>M. Kuba</i>)	77
26. Polycythemia (<i>M. Kuba</i>)	79
27. Bone marrow depression (<i>M. Kuba</i>)	81
28. Disorders of hemostasis (<i>M. Kuba</i>)	83
29. Thrombosis, DIC (<i>M. Kuba</i>)	87
30. Atherosclerosis, hyperlipoproteinemia (<i>M. Kuba</i>)	89
31. Endothelial dysfunction, effects of nitric oxide (<i>M. Kuba</i>)	93
32. Arterial hypertension (<i>M. Kuba</i>)	95
33. Arterial hypotension (<i>M. Kuba</i>)	97
34. Disorders of cardiac rhythm and conduction (<i>M. Kuba</i>)	99
35. Ischemic heart disease (<i>M. Kuba</i>)	101
36. Myocardial infarction and its complications (<i>M. Kuba</i>)	103
37. Valvular heart disease (<i>M. Kuba</i>)	105
38. Congenital heart defects (<i>M. Kuba</i>)	107
39. Heart failure (<i>M. Kuba</i>)	109

40. Cardiac compensatory mechanisms (<i>M. Kuba</i>)	111
41. Peripheral compensatory mechanisms in heart failure (<i>M. Kuba</i>)	113
42. Pulmonary circulation, ventilation/perfusion ratio, effect of hypoxia (<i>Z. Kubová</i>)	115
43. Ventilatory and diffusion lung dysfunction (<i>Z. Kubová</i>)	117
44. Obstructive respiratory diseases (<i>Z. Kubová</i>)	119
45. Restrictive pulmonary diseases (<i>Z. Kubová</i>)	123
46. Pulmonary arterial hypertension, pulmonary edema (<i>Z. Kubová, M. Kuba</i>)	125
47. Adult respiratory distress syndrome – ARDS (<i>Z. Kubová</i>)	127
48. Respiratory Failure (<i>Z. Kubová, M. Kuba</i>)	129
49. Hypoxia (<i>Z. Kubová</i>)	131
50. Hyperoxia, hyperbaria, decompression (<i>Z. Kubová</i>)	133
51. Nephritic syndrome (<i>Z. Kubová</i>)	135
52. Pyelonephritis (<i>Z. Kubová</i>)	139
53. Nephrotic syndrome (<i>Z. Kubová</i>)	141
54. Hydronephrosis (<i>Z. Kubová</i>)	143
55. Acute and chronic renal failure (<i>Z. Kubová, M. Kuba</i>)	145
56. Pathophysiology of Hypothalamo-Pituitary system (<i>M. Kuba</i>)	151
57. Decrease of Anterior Pituitary hormones (<i>M. Kuba</i>)	153
58. Hyperfunction of Anterior Pituitary gland (<i>M. Kuba</i>)	155
59. Alterations of the Posterior Pituitary gland hormones (<i>M. Kuba</i>)	157
60. Hyperthyroidism, Hypothyroidism (<i>M. Kuba</i>)	159
61. Adrenal cortex hormones – hypersecretion (<i>M. Kuba</i>)	163
62. Adrenal cortex hormones – acute and chronic deficiency (<i>M. Kuba</i>)	165
63. Adrenal medulla dysfunction (<i>M. Kuba</i>)	167
64. Diabetes mellitus, etiology and pathogenesis (<i>M. Kuba</i>)	169
65. Diabetic coma (ketoacidotic, hyperosmolar, lactic acidotic) (<i>M. Kuba</i>)	173
66. Diabetes mellitus – complications (<i>M. Kuba</i>)	175
67. Pathophysiology of water-soluble vitamins (<i>M. Kuba</i>)	177
68. Pathophysiology of lipid-soluble vitamins (<i>M. Kuba</i>)	179
69. Nausea, Vomiting (<i>M. Kuba</i>)	181
70. Gastric ulcer, duodenal ulcer – pathophysiology (<i>M. Kuba</i>)	183
71. Gastritis, postgastrectomy status – pathophysiology (<i>M. Kuba</i>)	185
72. Gastro-intestinal bleeding (<i>M. Kuba</i>)	187
73. Intestinal malabsorption (<i>M. Kuba</i>)	189
74. Intestinal obstruction – Ileus (<i>M. Kuba</i>)	191
75. Dysfunctions of the colon: diarrhea, constipation, irritable colon, flatulence, Crohn's disease, ulcerative colitis (<i>M. Kuba</i>)	193
76. Acute and chronic pancreatitis (<i>M. Kuba</i>)	197
77. Hepatitis (<i>M. Kuba</i>)	199
78. Cholelithiasis and cholecystitis (<i>M. Kuba</i>)	201
79. Classification of jaundices – etiology and pathogenesis (<i>M. Kuba</i>)	203
80. Cirrhosis of the liver, Portal hypertension (<i>M. Kuba</i>)	205
81. Hepatic failure, hepatic coma (<i>M. Kuba</i>)	207
82. Starvation, malnutrition (<i>Z. Kubová</i>)	209
83. Obesity (<i>Z. Kubová</i>)	213
84. Alterations in peripheral nervous system and motor function (<i>Z. Kubová</i>)	215
85. Pathophysiology of the spinal cord (<i>Z. Kubová</i>)	219
86. Autonomic nervous system dysfunctions (<i>Z. Kubová</i>)	223
87. Brain blood circulation disorders, blood-brain barrier breakdown (<i>Z. Kubová, M. Kuba</i>)	227
88. Brain edema, intracranial hypertension (<i>Z. Kubová, M. Kuba</i>)	231
89. CNS neurotransmitters – disorders (<i>Z. Kubová</i>)	235
90. Epilepsy – etiology and pathogenesis (<i>Z. Kubová</i>)	239
91. Pathophysiology of demyelination (Multiple Sclerosis) (<i>Z. Kubová</i>)	243
92. Pathophysiology of immature newborns (<i>M. Kuba</i>)	245
93. Aging (<i>M. Kuba</i>)	247
94. Pathophysiological view on "alternative/complementary" medicine (<i>M. Kuba</i>)	249
95. Pathophysiology of infertility and sexual disorders (<i>M. Kuba</i>)	251
96. Electric bio-potentials – recording and diagnostic use (<i>M. Kuba</i>)	253
97. Principles and possibilities of (auto)-biofeedback (<i>M. Kuba</i>)	255
