

Content

The effect of extrusion conditions on the adsorption-desorption isotherms of water vapour for potato and wheat extrudates Piotr Bańka, Zofia Sokołowska	1
Spectroscopic Analysis of White Wine Dora Bělohávková, Veronika Havelková, Sandra Lajtkepová	7
PV System Installed at the CUA – Big Tracking Stand Usage Petr Bican	13
Hidden and Masked in Biological Physics Jiri Blahovec	19
Hardness tree cross section difference as a climatic indicator Jiri Blahovec, Viktor Mareš	27
Influence of Conventional and Ecological Farming System on Granulometric Composition of Pseudopodzolic Soil Aneta Čalka, Zofia Sokołowska	34
Potentiometric sensors in soil chemical studies Jolanta Cieśla	38
Changes of Cellular Structure of Potato Tuber Parenchyma Tissues During Storage Marek Gancarz, Krystyna Konstankiewicz	45
Processing of roentgenograms of wheat kernels infested by granary weevil Jaroslav Grodek	50
Disintegration Ability of Potatoes in Dependence on Variety and Cultivation Conditions Anna Hejlová	54
Physical properties of granular raw materials of plant origin Józef Horabik, Marek Molenda	64
Spectroscopic Analysis of Beer Jiri Klima, Michal Mesaros	69
Magnetic susceptibility and its use in environmental research Izabela Krzemińska	76
The Usage of PV Systems for Battery Charging Jan Mareš	79
Methods of particle size distribution measurement for soil samples - review Magdalena Ryzak	83
Electric Permittivity of Potato during Compression Test Jiří Sobotka, Jaroslav Krejčí, Jiří Blahovec	89
Spectroscopic Study of Red Wine Jakub Tůma, Veronika Vítková	95
Some Aspects of Soil Denitrification Tereza Włodarczyk, Paweł Szarlip, Małgorzata Brzezińska, Urszula Kotowska	101
