Preface	xi
Štefan Schwabik – an outstanding mathematician and colleague	xiii
List of contributions	
S. M. Afonso, E. M. Bonotto, M. Federson, L. P. Gimenes	1
<i>Boundedness of solutions of retarded functional differential equations with variable impulses via generalized ordinary differential equations</i>	
Luciano Barbanti, Berenice C. Damasceno	3
<i>Generalized Riemann–Stieltjes integral on time scales</i>	
Cristian Bereanu	5
<i>Periodic solutions of pendulum-like perturbations of singular and bounded ϕ-Laplacians</i>	
Mieczysław Cichoń	6
<i>Dynamic equations and non-absolute integrals in Banach spaces</i>	
Jan Čermák	8
<i>A note on asymptotic stability conditions for a three-term linear difference equation</i>	
Berenice C. Damasceno, Luciano Barbanti	10
<i>Probability and measure theory on time scales</i>	
Luisa Di Piazza	12
<i>Variational measures in the theory of integration</i>	
Zuzana Došlá	13
<i>Boundary value problems on infinite intervals for second order differential equations</i>	
Ondřej Došlý	16
<i>Variational principle and half-linear oscillation criteria</i>	
Pavel Drábek	18
<i>The second eigenfunction of the p-Laplacian on the planar disc</i>	
Marián Fabian	21
<i>On the coincidence of Pettis and McShane integrals and Hilbert generated spaces</i>	
Márcia Federson	23
<i>Linear FDEs in the frame of Generalized ODEs: a justification for using Kurzweil equations</i>	
Márcia Federson, Jaqueline B. Godoy	24
<i>Averaging for impulsive functional differential equations: a new approach</i>	
Luis A. Fernandes de Oliveira, Maria do Rosário de Pinho	26
<i>Clarke's generalized gradient of locally Lipschitz integral functional: Dushnik sense</i>	

Rubén Figueroa, Rodrigo López Pouso	28
<i>Discontinuous differential equations with deviated arguments depending on the unknown</i>	
Simona Fišnarová	30
<i>Perturbation principle and Riccati technique in oscillation criteria for half-linear differential equations</i>	
Eduard Fuchs	32
<i>Štefan Schwabik and the history of mathematics</i>	
István Győri	34
<i>Sharp results on growth and decay rates in population model equations</i>	
Robert Hakl, Pedro J. Torres	35
<i>A combined variational–topological approach for dispersion–managed solitons in optical fibers</i>	
Petr Hasil	37
<i>Critical oscillation constant for half-linear differential equations with periodic coefficients</i>	
Jaroslav Jaroš	39
<i>Picone-type identities in comparison theory of nonlinear equations</i>	
Pedro Levit Kaufmann	40
<i>On two-dimensional nonabsolute integration</i>	
D. Ya. Khusainov, J. Baštinec, J. Diblík, A. Rývolová	42
<i>Stability and estimation of solutions of linear differential systems of neutral type with constant coefficients</i>	
Jaroslav Kurzweil	44
<i>Generalized differential equations</i>	
Eduardo Liz	46
<i>Bubbles, chaos, and the Hydra effect in delayed population models</i>	
Jan Malý	48
<i>New nonabsolutely convergent integrals</i>	
Robert Mařík	50
<i>Picone type inequality for half-linear differential operators with anisotropic p-Laplacian</i>	
Bohdan Maslowski	52
<i>Linear stochastic PDEs with fractional noise</i>	
Jean Mawhin	53
<i>Periodic solutions of generalized ordinary differential equations</i>	
Milan Medved'	55
<i>Asymptotic integration of nonlinear Φ-Laplacian differential equations</i>	
Giselle Antunes Monteiro	56
<i>Generalized linear differential equations in a Banach space: Continuous dependence on a parameter</i>	

Pat Muldowney	58
<i>Feynman Diagrams</i>	
Kazimierz Musiał	61
<i>A decomposition of Henstock–Kurzweil–Pettis integrable multifunctions</i>	
Hana Petzeltová	63
<i>Regularity and long-time behavior of a nonlocal phase separation system</i>	
Vita Pylypenko, András Rontó	65
<i>On the existence and uniqueness of a slowly growing solution of singular linear functional differential systems</i>	
Irena Rachůnková	67
<i>Singular second-order boundary value problem on an unbounded domain</i>	
Pavel Řehák	69
<i>Asymptotic properties of solutions to second order dynamic equations in the framework of regular variation with emphasis on q-calculus case</i>	
Jana Řezníčková	72
<i>Oscillation properties of the half-linear differential equations</i>	
Aneta Sikorska - Nowak	74
<i>Dynamic equations $x^{(\Delta^m)}(t) = f(t, x(t))$ on time scales</i>	
Zdeněk Svoboda	75
<i>System of linear differential equations of second order with constant coefficients and constant delay</i>	
Roman Šimon Hilscher	77
<i>Sturmian theory for abnormal linear Hamiltonian systems</i>	
Erik Talvila	79
<i>Distributional integrals</i>	
Eduard Toon	81
<i>Autonomous functional differential equations in the frame of generalized ODEs</i>	
Michal Veselý	83
<i>On almost periodic sequences and functions in metric spaces</i>	
Jeff R. L. Webb, Mirosława Zima	85
<i>Resonant and non-resonant non-local fourth order boundary value problems</i>	
Manuel Zamora	86
<i>On periodic solution of second-order differential equation with singularities</i>	
Petr Zemánek	88
<i>Overview of Weyl–Titchmarsh theory for second order Sturm–Liouville equations on time scales</i>	
Program	91
List of participants	97
