

Dedicated

to the unknown masons and the now-known smallholders who built the houses of Hološovice.

to all of those who have worked and still work to ensure that the greatest possible part of these structures remains authentically preserved, and no less to the diligence shown by architectural experts in recent decades in recognising the values of the most valuable historic villages of the Czech lands and promoting their declaration as landmark zones and heritage sites. *Hološovice* is the first – and let us hope, far from the last – publication in which the public can see the results of this work.
