## THANKS

Many people have contributed in various ways in the preparation of this book. I would especially like to thank my former students who have provided me with very valuable feedback on some of the materials and also with ideas and opinions on the contents of the book. I would also like to thank those of my colleagues both within as well as outside the university who (some of them even without knowing it) helped me with both the language and specialist aspects. My special thanks go to my colleagues Marie and Martina for proof-reading most of the material within a VERY limited time, and to Helena for being very helpful with and never tired of the endless copying; to Jara for her many beautiful pictures; and, of course, to Tomáš for being very patient with me during the preparation of the book and for discussing a lot of it with me.
