Introduction <i>Stefanie Wulff, Stefan Th. Gries, and Mark Davies</i>	1
--	---

1. Diachronic applications

Online databases and language change: the case of Spanish <i>dizque</i> <i>Viola G. Miglio</i>	7
Toward a comparison of unsupervised diachronic morphological profiles <i>Alfonso Medina Urrea</i>	29
Change and variation in complement selection: a case study from recent English, with evidence from large corpora <i>Juhani Rudanko</i>	47
Journalistic corpus similarity over time <i>Cristina Mota</i>	67

2. Function-oriented applications

“Ah lovely stuff, eh?” – invariant tag meanings and usage across three varieties of English <i>Georgie Columbus</i>	85
Good nouns, bad nouns: what the corpus says and what native speakers think <i>Philip Dilts</i>	103
Subject omission in Russian: a study of the Russian National Corpus <i>Tatiana Zdorenko</i>	119

3. Register/genre applications

Linguistic realizations of rhetorical structure: a corpus-based study of research article abstracts and introductions in applied linguistics and educational technology <i>Phuong Dzung Pho</i>	135
--	-----

Lexical bundle distribution in university classroom talk <i>Eniko Csomay and Viviana Cortes</i>	153
Suggestions and recommendations in academic speech <i>Luciana Diniz</i>	169
Building a forensic corpus to test language-based indicators of deception <i>Eileen Fitzpatrick and Joan Bachenko</i>	183
4. Methodological applications	
Dispersions and adjusted frequencies in corpora: further explorations <i>Stefan Th. Gries</i>	197
Probabilistic tagging of minority language data: a case study using Qtag <i>Christopher Cox</i>	213
Exploring a corpus of scientific texts using data mining <i>Elke Teich and Peter Fankhauser</i>	233
Automated learning of appraisal extraction patterns <i>Kenneth Bloom and Shlomo Argamon</i>	249
