Research papers

- Dual fluorescence system for flow cytometric analysis of *Escherichia coli* transcriptional response in multi-species context  
H. Miao, S. Ratnasingam, C.S. Pu, M.M. Desai and C.C. Sze (Singapore) 109
- Use of the *frc* gene as a molecular marker to characterize oxalate-oxidizing bacterial abundance and diversity structure in soil  
N. Khammar, G. Martin, K. Ferro, D. Job, M. Aragno and E. Verrecchia (Switzerland, France) 120
- Comparative evaluation of Polymerase Chain Reaction–Restriction Enzyme Analysis (PRA) and sequencing of heat shock protein 65 (*hsp65*) gene for identification of aquatic mycobacteria  
F. Pourahmad, K.D. Thompson, A. Adams and R.H. Richards (UK, Iran) 128
- Molecular detection of *Puccinia horiana* in *Chrysanthemum x morifolium* through conventional and real-time PCR  
H. Alaei, S. Baeyen, M. Maes, M. Höfte and K. Heungens (Belgium) 136
- The use of molecular beacons to directly measure bacterial mRNA abundances and transcript degradation  
L.J. Kuechenmeister, K.L. Anderson, J.M. Morrison and P.M. Dunman (United States) 146
- A comparison of DNA extraction procedures for the detection of *Mycobacterium ulcerans*, the causative agent of Buruli ulcer, in clinical and environmental specimens  
L. Durnez, P. Stragier, K. Roebben, A. Ablrdey, H. Leirs and F. Portaels (Belgium, Ghana, Denmark) 152
- Overcoming the anaerobic hurdle in phenotypic microarrays: Generation and visualization of growth curve data for *Desulfovibrio vulgaris* Hildenborough  
S. Borglin, D. Joyner, J. Jacobsen, A. Mukhopadhyay and T.C. Hazen (USA) 159
- A novel method and simple apparatus for the detection of thermophilic *Campylobacter* spp. in chicken meat products  
S. Wisessombat, K. Kittiniyom, P. Srimanote, W. Wonglumsom and S.P. Voravuthikunchai (Thailand) 169
- Evaluation of reverse transcription loop-mediated isothermal amplification in conjunction with ELISA–hybridization assay for molecular detection of *Mycobacterium tuberculosis*  
M.-F. Lee, Y.-H. Chen and C.-F. Peng (Taiwan) 174
- Rapid *in vivo* exploration of a 5S rRNA neutral network  
Z.D. Zhang, M. Nayar, D. Ammons, J. Rampersad and G.E. Fox (USA) 181
- Use of hidden correlations in short oligonucleotide array data are insufficient for accurate quantification of nucleic acid targets in complex target mixtures  
R.A. Rule, A.E. Pozhitkov and P.A. Noble (USA) 188
- Determination of *rpoA* as the most suitable internal control to study stress response in *C. jejuni* by RT-qPCR and application to oxidative stress  
M. Ritz, A. Garenaux, M. Berge and M. Federighi (France) 196
