<b>FOREWORD . . . . .</b>	<b>7</b>
<b>1 INTRODUCTION . . . . .</b>	<b>9</b>
<b>2 FUNCTIONAL ANATOMY . . . . .</b>	<b>11</b>
<b>3 BIOMECHANICS OF THE SUBTALAR JOINT . . . . .</b>	<b>17</b>
<b>4 INCIDENCE AND MECHANISM OF INJURY . . . . .</b>	<b>19</b>
<b>4.1 Incidence . . . . .</b>	<b>19</b>
<b>4.2 Mechanism of injury . . . . .</b>	<b>19</b>
Analysis of mechanism of injury in patients operated on in the period of 2007–2014, at the Department of Trauma Surgery of the Slovak Medical University (KÚCH SZU) in Bratislava, Slovakia . . . . .	19
<b>5 PATHOANATOMY OF FRACTURES . . . . .</b>	<b>23</b>
<b>5.1 Fracture patterns and the course of fracture lines . . . . .</b>	<b>23</b>
<b>5.2 Factors influencing the course and number of fracture lines . . . . .</b>	<b>23</b>
<b>5.3 Primary and secondary fracture lines . . . . .</b>	<b>25</b>
<b>5.4 Major fragments . . . . .</b>	<b>26</b>
<b>6 DIAGNOSIS . . . . .</b>	<b>27</b>
<b>6.1 Patient´s medical history . . . . .</b>	<b>27</b>
<b>6.2 Clinical examination . . . . .</b>	<b>27</b>
<b>6.3 Radiographic diagnosis . . . . .</b>	<b>28</b>
6.3.1 Standard radiographic projections . . . . .	29
6.3.2 Other radiographic views . . . . .	31
<b>6.4 Computed tomography, 3D reconstruction . . . . .</b>	<b>32</b>
<b>7 CLASSIFICATIONS . . . . .</b>	<b>35</b>
<b>7.1 Radiography based classifications . . . . .</b>	<b>35</b>
<b>7.2 CT based classifications . . . . .</b>	<b>37</b>
<b>8 SCORING SYSTEMS . . . . .</b>	<b>41</b>
<b>9 THERAPY . . . . .</b>	<b>45</b>
<b>9.1 Non-operative treatment . . . . .</b>	<b>45</b>
9.1.1 Historical review . . . . .	45
9.1.2 Indications for non-operative treatment . . . . .	45
9.1.3 Non-operative treatment used at our institution . . . . .	46
<b>9.2 Operative treatment . . . . .</b>	<b>47</b>
9.2.1 Historical review . . . . .	47
9.2.2 Non-operative versus operative treatment . . . . .	48
9.2.3 Factors influencing the choice of operative technique . . . . .	49
9.2.4 Timing of surgery . . . . .	50
<b>9.3 Open reduction and internal fixation (ORIF) . . . . .</b>	<b>51</b>
9.3.1 ORIF indications . . . . .	52
9.3.2 ORIF indication criteria used at our institution . . . . .	52
9.3.3 ORIF contraindications used at our institution . . . . .	53
9.3.4 ORIF – surgical approaches . . . . .	53
<b>9.4 MIO (minimally invasive osteosynthesis) . . . . .</b>	<b>69</b>
9.4.1 MIO in tongue type fractures . . . . .	69
9.4.2 MIO in joint-depression type fractures . . . . .	71
<b>9.5 External fixation . . . . .</b>	<b>73</b>
<b>9.6 MIO versus ORIF . . . . .</b>	<b>75</b>
<b>10 INTRAOPERATIVE CONTROL . . . . .</b>	<b>77</b>
<b>10.1 Two-dimensional intraoperative control . . . . .</b>	<b>77</b>
<b>10.2 ISO-C-3D image intensifier . . . . .</b>	<b>78</b>

<b>10.3 Arthroscopically assisted procedure . . . . .</b>	<b>78</b>
<b>11 POSTOPERATIVE CARE AND IMPLANT REMOVAL . . . . .</b>	<b>81</b>
<b>  11.1 Postoperative care after ORIF . . . . .</b>	<b>81</b>
Wound care . . . . .	81
Immobilization . . . . .	81
Antibiotic and thromboembolic prophylaxis . . . . .	81
Antiedema therapy . . . . .	81
Rehabilitation . . . . .	81
Weight bearing of the limb . . . . .	82
Radiographic control and CT examination . . . . .	82
<b>  11.2 Postoperative care after percutaneous reduction and fixation . . . . .</b>	<b>82</b>
<b>  11.3 Postoperative care after external fixation . . . . .</b>	<b>82</b>
<b>  11.4 Implant removal . . . . .</b>	<b>82</b>
Examination before implant removal . . . . .	83
<b>12 COMPLICATIONS IN TREATMENT OF CALCANEAL FRACTURES . . . . .</b>	<b>85</b>
<b>  12.1 Iatrogenic complications . . . . .</b>	<b>85</b>
12.1.1 Neurological complications . . . . .	85
12.1.2 Injuries to tendons . . . . .	86
12.1.3 Choice of an improper operative technique . . . . .	86
<b>  12.3 Complications caused by the patient . . . . .</b>	<b>86</b>
<b>  12.4 Infectious complications . . . . .</b>	<b>86</b>
<b>  12.5 Compartment syndrome of the foot . . . . .</b>	<b>87</b>
<b>  12.6 Algoneurodystrophic (Sudeck´s) syndrome . . . . .</b>	<b>89</b>
<b>13 POLYTRAUMA AND CALCANEAL FRACTURES . . . . .</b>	<b>91</b>
<b>14 OPEN FRACTURES . . . . .</b>	<b>95</b>
<b>15 ATYPICAL INTRA-ARTICULAR CALCANEAL FRACTURES . . . . .</b>	<b>97</b>
<b>  15.1 Transcalcaneal talonavicular dislocation . . . . .</b>	<b>97</b>
<b>  15.2 Calcaneal fracture-dislocations . . . . .</b>	<b>99</b>
15.2.1 Lateral dislocation . . . . .	99
15.2.2 Medial dislocation . . . . .	100
<b>  15.3 Intra-articular fractures of the anterior process . . . . .</b>	<b>101</b>
<b>  15.4 Beak-type fractures . . . . .</b>	<b>102</b>
<b>16 EXTRA-ARTICULAR CALCANEAL FRACTURES . . . . .</b>	<b>105</b>
<b>  16.1 Calcaneal tuberosity fractures (avulsion) . . . . .</b>	<b>105</b>
<b>  16.2 Extra-articular fractures of the body of the calcaneus and the sustentaculum . . . . .</b>	<b>105</b>
<b>17 OUR GROUP OF PATIENTS . . . . .</b>	<b>109</b>
<b>  17.1 Characteristics . . . . .</b>	<b>109</b>
<b>  17.2 Distribution of fracture patterns in the series . . . . .</b>	<b>109</b>
<b>  17.3 Choice of the operative technique . . . . .</b>	<b>110</b>
<b>  17.4 Surgical approaches, types of internal fixation and timing of surgery . . . . .</b>	<b>110</b>
<b>  17.5 Evaluation of results . . . . .</b>	<b>112</b>
<b>  17.6 Complications encountered in the cohort . . . . .</b>	<b>116</b>
<b>  17.7 Summary of the results and the author´s recommendations . . . . .</b>	<b>117</b>
17.7.1 Summary of the results . . . . .	117
17.7.2 The author´s recommendations . . . . .	119
<b>CONCLUSION . . . . .</b>	<b>121</b>
<b>REFERENCES . . . . .</b>	<b>123</b>
