Foreword, by <i>Samuel P. Hammar</i>	vii
Preface	ix
Acknowledgments	xi
Color Plates	xv
Abbreviations	xix
Explanatory Notes	xxi

Part I Principles of Pulmonary Cytopathology

1 Introduction	3
2 Respiratory Specimen Types for Cytologic Diagnoses Specimen Procurement, Collection Methods, Specimen Submission, Cytopreparation, and Staining	6
<i>Patricia Greenstreet, M. Jane Purslow, and Sudha R. Kini</i>	
3 Anatomy, Histology, and Cytology of Normal Components of the Lower Respiratory Tract	27
4 Nonneoplastic Lesions	38
5 Classification of Lung Tumors: An Overview of Lung Carcinomas	78
6 Squamous Cell Carcinoma	82
7 Pulmonary Adenocarcinoma	91
8 Pulmonary Neuroendocrine Tumors: Carcinoid Tumors, Atypical Carcinoids, Large Cell Neuroendocrine Carcinoma, and Small Cell (Undifferentiated) Carcinoma	103
9 Large Cell Undifferentiated Carcinoma	117

10 Uncommon Tumors and Tumorlike Lesions of the Lower Respiratory Tract and Tracheal Lesions 123

11 Lung Cancer Metastatic to Other Body Sites 141

12 Pulmonary Lymphoproliferative Disorders 145

13 Metastatic Malignancy to the Lung 151

14 Pulmonary Cytopathology in Neonatal and Pediatric Age Groups 165

15 Pulmonary Involvement in Immunocompromised Hosts 175

Part II Pulmonary Cytopathology: A Color Atlas

Index 291

1 Introduction 2

2 Respiratory Specimen Types for Cytologic Diagnosis: Specimen Procurement, Collection Methods, Specimen Submission, Cytopreparation, and Staining 6

3 Anatomy, Histology, and Cytology of Normal Components of the Lower Respiratory Tract 27

4 Nonneoplastic Lesions 38

5 Classification of Lung Tumors: An Overview of Lung Carcinomas 78

6 Squamous Cell Carcinomas 82

7 Pulmonary Adenocarcinoma 91

8 Pulmonary Neuroendocrine Tumors: Carcinoid Tumors, Atypical Carcinoids, Large Cell Neuroendocrine Carcinoma, and Small Cell (Oligodifferentiated) Carcinoma 103

9 Large Cell Undifferentiated Carcinoma 117
