Preface	xi
---------	----

CHAPTER 0	Preliminaries	1
------------------	----------------------	----------

0-1	Sets	2
0-2	Linear Equations and Inequalities in One Variable	10
0-3	Quadratic Equations	20
0-4	Cartesian Coordinate System and Straight Lines	26
0-5	Functions and Graphs	40
0-6	Exponential Functions	59
0-7	Logarithmic Functions	66
0-8	Chapter Review	78

CHAPTER 1	The Derivative	85
------------------	-----------------------	-----------

1-1	Limits	87
1-2	Continuity	110
1-3	Increments, Tangent Lines, and Rates of Change	125
1-4	The Derivative	138
1-5	Derivatives of Constants, Power Forms, and Sums	150
1-6	Derivatives of Products and Quotients	160
1-7	General Power Rule	170
1-8	Marginal Analysis in Business and Economics	178
1-9	Chapter Review	189

CHAPTER 2	Graphing and Optimization	195
------------------	----------------------------------	------------

2-1	First Derivative and Graphs	196
2-2	Second Derivative and Graphs	208

2-3 Optimization; Absolute Maxima and Minima	222
2-4 Curve Sketching Techniques: Unified and Extended	241
2-5 Differentials	255
2-6 Chapter Review	264

CHAPTER 3	Additional Derivative Topics	269
------------------	-------------------------------------	------------

3-1 The Constant e and Continuous Compound Interest	270
3-2 Derivatives of Logarithmic and Exponential Functions	278
3-3 Chain Rule	288
3-4 Implicit Differentiation	299
3-5 Related Rates	306
3-6 Elasticity of Demand (Optional)	314
3-7 Chapter Review	326

CHAPTER 4	Integration	331
------------------	--------------------	------------

4-1 Antiderivatives and Indefinite Integrals	332
4-2 Integration by Substitution	344
4-3 Differential Equations—Growth and Decay	354
4-4 Definite Integral	364
4-5 Area and the Definite Integral	374
4-6 Chapter Review	386

CHAPTER 5	Additional Integration Topics	391
------------------	--------------------------------------	------------

5-1 Definite Integral as a Limit of a Sum	392
5-2 Applications in Business and Economics	407
5-3 Integration by Parts	419
5-4 Improper Integrals	427
5-5 Integration Using Tables (Optional)	437
5-6 Chapter Review	446

CHAPTER 6	Multivariable Calculus	451
------------------	-------------------------------	------------

6-1	Functions of Several Variables	452
6-2	Partial Derivatives	462
6-3	Maxima and Minima	472
6-4	Maxima and Minima Using Lagrange Multipliers (Optional)	482
6-5	Method of Least Squares	491
6-6	Double Integrals over Rectangular Regions	504
6-7	Double Integrals over More General Regions (Optional)	518
6-8	Chapter Review	529

CHAPTER 7	Differential Equations	535
------------------	-------------------------------	------------

7-1	Basic Concepts	536
7-2	Separation of Variables	550
7-3	First-Order Linear Differential Equations	563
7-4	Second-Order Differential Equations	576
7-5	Systems of Differential Equations	584
7-6	Chapter Review	594

CHAPTER 8	Taylor Polynomials and Infinite Series; L'Hôpital's Rule	597
------------------	---	------------

8-1	Taylor Polynomials	598
8-2	Taylor Series	615
8-3	Operations on Taylor Series	627
8-4	Approximations Using Taylor Series	638
8-5	Indeterminate Forms and L'Hôpital's Rule	651
8-6	Chapter Review	657

CHAPTER 9	Numerical Techniques	661
------------------	-----------------------------	------------

9-1	Root Approximation	662
9-2	Interpolating Polynomials and Finite Differences	678

9-3 Numerical Integration	698
9-4 Euler's Method	719
9-5 Chapter Review	737

CHAPTER 10	Probability and Calculus	745
-------------------	---------------------------------	------------

10-1 Finite Probability Models	746
10-2 Binomial Distributions	760
10-3 Continuous Random Variables	772
10-4 Expected Value, Standard Deviation, and Median of Continuous Random Variables	786
10-5 Uniform, Beta, and Exponential Distributions	795
10-6 Normal Distributions	807
10-7 Chapter Review	821

APPENDIX A	Special Topics	827
-------------------	-----------------------	------------

A-1 Integer Exponents and Square Root Radicals	827
A-2 Rational Exponents and Radicals	834
A-3 Algebraic Expressions; Basic Operations	840
A-4 Algebraic Fractions	850
A-5 Arithmetic Progressions	858
A-6 Geometric Progressions	862
A-7 The Binomial Theorem	869

APPENDIX B	Trigonometric Functions	874
-------------------	--------------------------------	------------

B-1 Trigonometric Functions Review	876
B-2 Derivatives of Trigonometric Functions	887
B-3 Integrals of Trigonometric Functions	892
B-4 Chapter Review	898

APPENDIX C	Tables	901
------------	--------	-----

Table I	Exponential Functions (e^x and e^{-x})	902
Table II	Common Logarithms	906
Table III	Natural Logarithms ($\ln N = \log_e N$)	908
Table IV	Integration Formulas	910
Table V	Areas Under the Standard Normal Curve	914
	Answers	A1
	Index	I1
	Applications Index	I9
