

# CONTENTS

Preface *xiii*

## **Part I Origin and Transport of Sedimentary Materials 1**

### **Chapter 1 Weathering and Soils 3**

- 1.1 Introduction 3
- 1.2 Subaerial Weathering Processes 3
  - Physical Weathering 3
  - Chemical Weathering 6
- 1.3 Submarine Weathering Processes and Products 12
- 1.4 Soils 13
  - Soil-Forming Processes 13
  - Soil Profiles and Soil Classification 14
- 1.5 Concluding Remarks 17

### **Chapter 2 Transport and Deposition of Siliciclastic Sediment 19**

- 2.1 Introduction 19
- 2.2 Fundamentals of Fluid Flow 19
  - Laminar versus Turbulent Flow 21
  - Reynolds Number 22
  - Boundary Layers and Velocity Profiles 22
  - Froude Number 23
- 2.3 Particle Transport by Fluids 24
  - Particle Entrainment by Currents 24
  - Role of Particle Settling Velocity in Transport 27
  - Sediment Loads and Transport Paths 29
  - Transport by Wind 30
  - Transport by Glacial Ice 30
  - Deposits of Fluid Flows 30
- 2.4 Particle Transport by Sediment Gravity Flows 31
  - Turbidity Currents 33
  - Turbidity Current Deposits 36
  - Liquefied Flows 38
  - Grain Flows 38
  - Debris Flows and Mud Flows 39

## **Part II Physical Properties of Sedimentary Rocks 43**

### **Chapter 3 Sedimentary Textures 45**

- 3.1 Introduction 45
- 3.2 Grain Size 45
  - Grain-Size Scales 45
  - Measuring Grain Size 47
  - Graphical and Mathematical Treatment of Grain-Size Data 48
  - Application and Importance of Grain-Size Data 54

- 3.3 Particle Shape 56
  - Particle Form (Sphericity) 57
  - Fourier Shape Analysis 58
  - Significance of Particle Shape 58
  - Surface Texture 59
- 3.4 Fabric 60
  - Grain Orientation 60
  - Grain Packing, Grain-to-Grain Relations, and Porosity 61

## **Chapter 4 Sedimentary Structures 65**

- 4.1 Introduction 65
- 4.2 Kinds of Primary Sedimentary Structures 65
- 4.3 Stratification and Bedforms 65
  - Bedding and Lamination 65
  - Irregular Stratification 80
- 4.4 Bedding-Plane Markings 84
  - Markings Generated by Erosion and Deposition 84
  - Markings Generated by Deformation: Load Casts 86
  - Biogenic Structures 87
  - Bedding-Plane Markings of Miscellaneous Origin 94
- 4.5 Other Structures 96
- 4.6 Paleocurrent Analysis from Sedimentary Structures 97

## **Part III Composition, Classification, and Diagenesis of Sedimentary Rocks 99**

### **Chapter 5 Siliciclastic Sedimentary Rocks 101**

- 5.1 Introduction 101
- 5.2 Sandstones 101
  - Framework Mineralogy 102
  - Mineral Cements 106
  - Matrix Minerals 107
  - Chemical Composition 107
  - Classification of Sandstones 108
  - Sandstone Maturity 110
  - General Characteristics of Major Classes of Sandstones 110
- 5.3 Conglomerates 114
  - Particle Composition 115
  - Classification 115
  - Origin and Occurrence of Conglomerates 116
- 5.4 Mudstones and Shales 117
  - Terminology 117
  - Composition 119
  - Classification of Mudstones and Shales 121
  - Origin and Occurrence of Mudstones and Shales 122
- 5.5 Diagenesis of Siliciclastic Sedimentary Rocks 122
  - Stages and Realms of Diagenesis 123

## **Chapter 6 Carbonate Sedimentary Rocks 135**

6.1 Introduction 135

6.2 Chemistry and Mineralogy 135

6.3 Limestone Textures 137

Carbonate Grains 137

Microcrystalline Calcite 140

Sparry Calcite 141

6.4 Dolomite Textures 141

6.5 Structures in Carbonate Rocks 142

6.6 Classification of Carbonate Rocks 143

6.7 Origin of Carbonate Rocks 147

Limestones 147

Dolomite 154

6.8 Diagenesis 159

Regimes of Carbonate Diagenesis 159

Major Diagenetic Processes and Changes 160

Summary Results of Carbonate Diagenesis 164

## **Chapter 7 Other Chemical/Biochemical and Carbonaceous Sedimentary Rocks 168**

7.1 Introduction 168

7.2 Evaporites 168

Kinds of Evaporites 170

Origin of Evaporite Deposits 173

Diagenesis of Evaporites 175

7.3 Siliceous Sedimentary Rocks (Cherts) 175

Varieties of Chert 176

Origin of Chert 178

7.4 Iron-Bearing Sedimentary Rocks 183

Kinds of Iron-Rich Sedimentary Rocks 183

Origin of Iron Formations and Ironstones 187

7.5 Sedimentary Phosphorites 189

Mineralogy and Chemistry 190

Distinguishing Characteristics 190

Principal Kinds of Phosphorite Deposits 191

Origin of Phosphorites 192

Summary of Phosphorite Deposition 193

7.6 Carbonaceous Sedimentary Rocks: Coal, Oil Shale, Bitumens 194

Kinds of Organic Matter in Sedimentary Rocks 194

Classification of Carbonaceous Sedimentary Rocks 194

## **Part IV Depositional Environments 207**

### **Chapter 8 Continental (Terrestrial) Environments 211**

8.1 Introduction 211

8.2 Fluvial Systems 211

- Alluvial Fans 211
- River Systems 215
- 8.3 Eolian Desert Systems 220
  - Transport and Depositional Processes in Deserts 221
  - Deposits of Modern Deserts 222
  - Kinds of Eolian Systems 225
  - Ancient Desert Deposits 226
- 8.4 Lacustrine Systems 228
  - Origin and Size of Lakes 228
  - Lake Settings and Principal Kinds of Lakes 229
  - Factors Controlling Lake Sedimentation 230
  - Characteristics of Lacustrine Deposits 231
  - Ancient Lake Deposits 233
- 8.5 Glacial Systems 235
  - Environmental Setting 235
  - Transport and Deposition in Glacial Environments 236
  - Glacial Facies 238
  - Continental Ice Facies 239
  - Facies of Proglacial and Periglacial Environments 241
  - Marine Glacial Facies 241
  - Vertical Facies Successions 242
  - Ancient Glacial Deposits 242

## **Chapter 9 Marginal-Marine Environments 246**

- 9.1 Introduction 246
- 9.2 Deltaic Systems 247
  - Delta Classification and Sedimentation Processes 248
  - Physiographic and Sediment Characteristics of Deltas 254
  - Delta Cycles 256
  - Ancient Deltaic Systems 257
- 9.3 Beach and Barrier Island Systems 260
  - Depositional Setting 261
  - Beaches 261
  - Barrier-Island Systems 263
  - Characteristics of Modern Beach and Barrier-Island Systems 264
  - Ancient Beach and Barrier-Island Sediments 266
- 9.4 Estuarine Systems 268
  - Physiographic, Hydrologic, and Sediment Characteristics of Estuaries 268
  - Ancient Estuarine Facies 269
- 9.5 Lagoonal Systems 269
  - General Characteristics 269
  - Ancient Lagoonal Deposits 272
- 9.6 Tidal-Flat Systems 272
  - Depositional Setting 273

Sedimentary Processes and Sediment Characteristics of  
Tidal Flats 274

Ancient Tidal-Flat Sediments 276

## **Chapter 10 Siliciclastic Marine Environments 280**

10.1 Introduction 280

10.2 The Shelf Environment 280

Physiography and Depositional Setting 281

Shelf Sediment Transport and Deposition 282

Wave- and Storm-Dominated Shelves 283

Tide-Dominated Shelves 287

Shelves Affected by Intruding Ocean Currents 289

Shelf Transport by Density Currents 290

Effects of Sea-Level Change on Shelf Transport 290

Biological Activities on Shelves 290

Ancient Siliciclastic Shelf Sediments 291

10.3 The Oceanic (Deep-Water) Environment 292

Depositional Setting 293

Transport and Depositional Processes to and within Deep  
Water 295

Sediment Plumes, Wind Transport, Ice Rafting, Nepheloid  
Transport 296

Principal Kinds of Modern Deep-Sea Sediments 298

Ancient Deep-Sea Sediments 304

## **Chapter 11 Carbonate and Evaporite Environments 308**

11.1 Introduction 308

Carbonates 308

Evaporites 308

11.2 Carbonate Shelf (Nonreef) Environments 309

Depositional Setting 309

Sedimentation Processes 312

Skeletal and Sediment Characteristics of Carbonate Deposits 313

Examples of Modern Carbonate Platforms 315

Examples of Ancient Carbonate Shelf Successions 317

11.3 Slope/Basin Carbonates 319

11.4 Organic Reef Environments 321

Modern Reefs and Reef Environments 321

Ancient Reefs 325

11.5 Mixed Carbonate-Siliciclastic Systems 328

11.6 Evaporite Environments 328

Modern Evaporite Environments 328

Ancient Evaporite Environments 329

## **Part V Stratigraphy and Basin Analysis 335**

### **Chapter 12 Lithostratigraphy 337**

12.1 Introduction 337

12.2 Types of Lithostratigraphic Units 337

- 12.3 Stratigraphic Relations 338
  - Contacts Between Conformable Strata 338
  - Contacts Between Laterally Adjacent Lithostratigraphic Units 340
  - Unconformable Contacts 340
- 12.4 Vertical and Lateral Successions of Strata 342
  - Nature of Vertical Successions 342
  - Cyclic Successions 342
  - Sedimentary Facies 346
  - Walther's Law of Succession of Facies 348
- 12.5 Nomenclature and Classification of Lithostratigraphic Units 351
  - Development of the Stratigraphic Code 351
  - Major Types of Stratigraphic Units 351
  - Formal Lithostratigraphic Units 352
- 12.6 Correlation of Lithostratigraphic Units 354
  - Definition of Correlation 355
  - Lithocorrelation 357

## **Chapter 13 Seismic, Sequence, and Magnetic Stratigraphy 365**

- 13.1 Introduction 365
- 13.2 Seismic Stratigraphy 365
  - Early Development of Seismic Methods 365
  - Principles of Reflection Seismic Methods 366
  - Application of Reflection Seismic Methods to Stratigraphic Analysis 369
- 13.3 Sequence Stratigraphy 380
  - Fundamental Principles 380
  - Fundamental Units of Sequence Stratigraphy 381
  - Methods and Applications of Sequence Stratigraphy 383
  - Summary Remarks 388
- 13.4 Magnetostratigraphy 389
  - General Principles 389
  - Sampling, Measuring, and Displaying Remanent Magnetism 391
  - Magnetic Polarity Time Scales 392
  - Terminology in Magnetostratigraphy 394
  - Applications of Magnetostratigraphy and Paleomagnetism 396

## **Chapter 14 Biostratigraphy 406**

- 14.1 Introduction 406
- 14.2 Fossils as a Basis for Stratigraphic Subdivision 406
  - Principle of Faunal Succession 407
  - Concept of Stage 407
  - Concept of Zone 408
- 14.3 Biostratigraphic Units 409
  - Principal Categories of Zones 410
  - Rank of Biostratigraphic Units 411
  - Naming Biostratigraphic Units 411
- 14.4 The Basis for Biostratigraphic Zonation: Changes in Organisms Through Time 411

Evolution 411

Taxonomic Classification and Importance of Species 412

Changes in Species Through Time 413

14.5 Distribution of Organisms in Space: Paleobiogeography 414

14.6 Combined Effects of the Distribution of Organisms in Time and Space 419

14.7 Applications of Biostratigraphy 424

14.8 Biocorrelation 424

Correlation by Assemblage Biozones 425

Correlation by Abundance Biozones 425

Chronocorrelation by Fossils 427

Correlation by Taxon-Range and Interval Biozones 427

Correlation by Biogeographical Abundance Biozones 431

## **Chapter 15 Chronostratigraphy and Geologic Time 434**

15.1 Introduction 434

15.2 Geologic Time Units 435

15.3 The Geologic Time Scale 437

Purpose and Scope 437

Development of the Geologic Time Scale 437

15.4 Chronocorrelation 449

Event Correlation and Event Stratigraphy 449

Correlation by Stable Isotope Events 453

Problems with Isotopic Chronocorrelation 461

## **Chapter 16 Basin Analysis, Tectonics, and Sedimentation 463**

16.1 Introduction 463

16.2 Mechanisms of Basin Formation (Subsidence) 463

16.3 Plate Tectonics and Basins 464

16.4 Kinds of Sedimentary Basins 466

Basins in Divergent Settings 467

Basins in Intraplate Settings 469

Basins in Convergent Settings 473

Basins in Strike-Slip/Transform-Fault-Related Settings 475

Basins in Hybrid Settings 476

16.5 Sedimentary Basin Fill 477

16.6 Techniques of Basin Analysis 479

Measuring Stratigraphic Sections 479

Preparing Stratigraphic Maps and Cross Sections 480

Siliciclastic Petrofacies (Provenance) Studies 485

Geophysical Studies 486

16.7 Applications of Basin Analysis 486

Interpreting Geologic History 486

Economic Applications 487

# **Appendices 491**

**Appendix A Form and Roundness of Sedimentary Particles 491**

**Appendix B Paleothermometry 493**

**Appendix C North American Stratigraphic Code 495**

**Appendix D Nomenclature of Global and Northern American  
Chronostratigraphic Units 534**

**Appendix E Web Sites Pertaining to Sedimentology  
and Stratigraphy 538**

*Bibliography 542*

*Index 575*
