

CONTENTS

1. Introduction 5
2. Methods of laboratory studies and field examination 6
3. Geography 7
4. Geology 8
 - 4.1. Trinidad Zone 8
 - 4.2. Zaza Zone 10
 - 4.3. Las Villas Zone 11
 - 4.4. Manicaragua Zone 11
 - 4.4.1. The Amphibolite Complex 12
 - 4.4.2. "Manicaragua granitoids" 13
5. Fieldwork and microscopic study of rocks 15
 - 5.1. Location and description of the rocks studied 15
 - 5.2. Petrography 17
6. Petrology 19
 - 6.1. Modal rock composition variation 19
 - 6.2. Chemical composition of the rocks 21
7. Rock-forming minerals 25
 - 7.1. Plagioclases 25
 - 7.2. Potassium feldspars 31
 - 7.3. Phyllosilicates 34
 - 7.3.1. Biotite 34
 - 7.3.2. Chlorite 37
 - 7.3.3. Muscovite 38
 - 7.4. Amphiboles 40
 - 7.5. Clinopyroxenes 47
 - 7.6. Garnet 50
 - 7.7. Epidote-zoisite group 50
 - 7.8. Opaque minerals 54
 - 7.8.1. Spinel phases 54
 - 7.8.2. Rhombohedral phases 57
 - 7.9. Accessory minerals 58
 - 7.9.1. Zircon 58
 - 7.9.2. Apatite 58
8. Coexistence of main rock-forming minerals 59
9. The crystallization development 62
10. Conclusion 67
11. References 70
12. Granitoidy centrální Kuby 73
13. Гранитоиды центральной Кубы 74
