

# CONTENTS

Preface . . . . .	4
Notations . . . . .	7
1 Definitions and basic observations . . . . .	10
2 Stringing Lemma . . . . .	18
3 Critical nonstring graphs . . . . .	25
4 Other stringability preserving operations . . . . .	38
5 Subclasses of the class of all string graphs . . . . .	45
6 Algorithmic approach . . . . .	55
6.1 Computational complexity and NP-completeness . . . . .	55
6.2 Recognition algorithm for $Ng^1$ . . . . .	58
6.3 Computational complexity of $SNg$ . . . . .	60
7 Nonstring graphs with minimum numbers of vertices . . . . .	62
8 Miscellaneous results and open problems . . . . .	87
References . . . . .	95
Резюме . . . . .	96
