

## Contents

Introduction . . . . .	4
Description of the road under study . . . . .	5
Methods . . . . .	6
Results . . . . .	9
Review of vertebrates killed by traffic on the road under study . . . . .	9
Numbers and dominance . . . . .	9
Diversity . . . . .	9
Differences between motorway and road . . . . .	10
Variation in numbers and diversity of vertebrates killed in successive years of study . . . . .	11
Variation in numbers and diversity of vertebrates killed in successive months . . . . .	13
Numbers and diversity of vertebrates killed by traffic on the road under study in different environments . . . . .	15
Relation between the variation in qualitative and quantitative indices and intensity of traffic . . . . .	17
Impact of traffic on the road under study on individual species . . . . .	17
European hare ( <i>Lepus europaeus</i> ) . . . . .	17
Roe deer ( <i>Capreolus capreolus</i> ) . . . . .	25
Pheasant ( <i>Phasianus colchicus</i> ) . . . . .	27
Partridge ( <i>Perdix perdix</i> ) . . . . .	28
Hedgehogs ( <i>Erinaceus europaeus</i> , <i>E. concolor</i> ) . . . . .	29
Norway rat ( <i>Rattus norvegicus</i> ) . . . . .	29
Domestic cat ( <i>Felis catus</i> ) . . . . .	30
Small rodents . . . . .	31
Remaining mammals . . . . .	31
Small perching birds . . . . .	32
Remaining birds . . . . .	32
Amphibians . . . . .	33
Discussion . . . . .	33
Conclusions . . . . .	39
Резюме . . . . .	41
Literature . . . . .	41
