

Contents

Part I Multicellularity in the Tree of Life

Timing the Origins of Multicellular Eukaryotes Through Phylogenomics and Relaxed Molecular Clock Analyses	3
--	---

Susan C. Sharpe, Laura Eme, Matthew W. Brown
and Andrew J. Roger

Fossil and Transcriptomic Perspectives on the Origins and Success of Metazoan Multicellularity	31
---	----

James W. Valentine and Charles R. Marshall

Origin of Metazoan Developmental Toolkits and Their Expression in the Fossil Record	47
--	----

Sarah M. Tweedt and Douglas H. Erwin

Multicellularity in Bacteria: From Division of Labor to Biofilm Formation	79
--	----

Claudio Aguilar, Catherine Eichwald and Leo Eberl

Part II Model-Systems

Choanoflagellates: Perspective on the Origin of Animal Multicellularity	99
--	----

Stephen R. Fairclough

Filastereans and Ichthyosporeans: Models to Understand the Origin of Metazoan Multicellularity	117
---	-----

Hiroshi Suga and Iñaki Ruiz-Trillo

Volvocine Algae: From Simple to Complex Multicellularity	129
---	-----

Matthew D. Herron and Aurora M. Nedelcu

Emergence of <i>Ectocarpus</i> as a Model System to Study the Evolution of Complex Multicellularity in the Brown Algae	153
J. Mark Cock, Olivier Godfroy, Martina Strittmatter, Delphine Scornet, Toshiki Uji, Garry Farnham, Akira F Peters and Susana M Coelho	

Part III Theoretical Approaches

Evolutionary Transitions in Individuality and Recent Models of Multicellularity	165
Erik R. Hanschen, Deborah E. Shelton and Richard E. Michod	

Multicellular Life Cycles as an Emergent Property in Filamentous Bacteria	189
Valentina Rossetti and Homayoun C Bagheri	

The Evolutionary Ecology of Multicellularity: The Volvocine Green Algae as a Case Study	201
Cristian A. Solari, Vanina J. Galzenati and John O. Kessler	

Cells Acting as Lenses: A Possible Role for Light in the Evolution of Morphological Asymmetry in Multicellular Volvocine Algae	225
John O. Kessler, Aurora M. Nedelcu, Cristian A. Solari and Deborah E. Shelton	

In Silico Transitions to Multicellularity	245
Ricard V. Solé and Salva Duran-Nebreda	

Part IV Genomics Insights

A Comparative Genomics Perspective on the Origin of Multicellularity and Early Animal Evolution	269
Mansi Srivastava	

The Evolution of Transcriptional Regulation in the Viridiplantae and its Correlation with Morphological Complexity	301
Daniel Lang and Stefan A. Rensing	

Independent Emergence of Complex Multicellularity in the Brown and Red Algae	335
J. Mark Cock and Jonas Collén	

Social Amoebae and Their Genomes: On the Brink to True Multicellularity	363
Gernot Glöckner	

Part V Molecular Mechanisms

- Transcription Factors and the Origin of Animal Multicellularity** 379
Arnau Sebé-Pedrós and Alex de Mendoza
- How to Build an Allorecognition System: A Guide for Prospective Multicellular Organisms** 395
Laura F. Grice and Bernard M. Degnan
- Developmental Signalling and Emergence of Animal Multicellularity** 425
Maja Adamska
- The Evolution of Developmental Signalling in Dictyostelia from an Amoebozoan Stress Response** 451
Yoshinori Kawabe, Christina Schilde, Zhi-hui Chen, Qingyou Du, Hajara Lawal and Pauline Schaap
- Signaling in Swarming and Aggregating Myxobacteria** 469
Dale Kaiser
- Index** 487
