
Contents

SECTION I General Considerations

Template Isolation and Preparation

- Chapter 1** Extraction and Amplification of Ancient DNA.....5
Anne C. Stone
- Chapter 2** Long PCR from Damaged DNA.....11
Bernard Fromenty, Philippe Schmitt, and Dominique Pessayre
- Chapter 3** Quantitative mRNA Analysis in Small Cell Samples by RT-PCR
and Flow Cytometry.....23
Veronika Stemme and Sten Stemme
- Chapter 4** Microdissection of Single or Small Numbers of Cells for Analyses
of DNA and RNA by PCR.....29
Rose G. Mage, Robert F. Bonner, and Harold Obiakor
- Chapter 5** Pre-PCR Processing Strategies.....37
Peter Rådström, Maria Lövenklev, Petra Wolffs, Charlotta Löfström, and Rickard Knutsson

PCR Optimization

- Chapter 6** Novel PCR-Enhancing Compounds and Their Modes of Action.....51
Raj Chakrabarti
- Chapter 7** Optimizing PCR with the Aid of Experimental Design.....65
Thomas Weissensteiner

Labeling and Cloning

- Chapter 8** Economic Fluorescent Labeling of PCR Products for Microsatellite-
and Single-Stranded Conformation Polymorphism (SSCP) Analysis.....79
Markus Schuelke
- Chapter 9** Universal Restriction Site-Free Cloning Method Using Chimeric Primers.....87
Guo Jun Chen

SECTION II Analytical Applications

Detection of Nucleic Acid Variation

- Chapter 10** High-Throughput Genotyping and the PCR.....97
Kalim U. Mir and Jiannis Ragoussis
- Chapter 11** High-Throughput Genetic Analysis through Multiplexed PCR
and Multicapillary Electrophoresis111
John M. Butler and Peter M. Vallone
- Chapter 12** The GOOD Assay: A Purification-Free Assay for Genotyping by MALDI
Mass Spectrometry121
Jörg Tost, Ramón Kucharzak, Doris Lechner, and Ivo Glynne Gut
- Chapter 13** Primer Design for Large-Scale Multiplex PCR and Arrayed Primer
Extension (APEX).....131
Maido Remm, Ants Kurg, and Andres Metspalu
- Chapter 14** Surface Plasmon Resonance Based Biosensor Technology for Real-Time
Detection of PCR Products.....141
Giordana Feriotto and Roberto Gambari
- Chapter 15** Fluorescent Amplified Fragment Length Polymorphism (FAFLP) Genotyping.....155
Catherine Arnold
- Chapter 16** Global Analysis of DNA Allelic Variations (GADAV) by Specific
Enrichment of Mismatches and Selective Amplification of Heterohybrids163
Xinghua Pan and Sherman M. Weissman
- Chapter 17** Quantitative DNA-Methylation Analysis by the Bisulfite Conversion Method.....175
Osman El-Maarri, Manfred Kuepper, Johannes Oldenburg, and Jörn Walter
- Chapter 18** Pyrosequencing Technology.....187
Pål Nyrén, Tommy Nordström, and Baback Gharizadeh
- Chapter 19** Octamer-Primed Cycle Sequencing197
Anelia I. Kraltcheva and Susan H. Hardin
- Chapter 20** *In Situ* Amplification of cDNA205
Gerard J. Nuovo
- Chapter 21** Detection of a Single-Copy Sequence on Human Metaphase by Cyclic PRINS.....215
Kirsten Mennicke, Sven Opitz, and Eberhard Schwinger

Nucleic Acid Quantitation

- Chapter 22** Meaningful Quantification of mRNA Using Real-Time PCR225
Stephen A. Bustin
- Chapter 23** Absolute Quantification of Specific Nucleic Acids by RT-PCR Using
a Nonlinear Mathematical Model for Data Analysis235
Huong L. Vu, Serge Troubetzkoy, Vu Q. Nguyen, Michael W. Russell, and Jiri Mestecky
- Chapter 24** Single-Molecule PCR – Basic Protocols and Applications.....245
Paul H. Dear
- Chapter 25** Gene Expression and Discovery: Application of a Genome-Wide Approach.....259
Timothy A. Lohret and Karen M. Kelly
- Chapter 26** The Detection of Differential Gene Expression Changes Using SAGE
(Serial Analysis of Gene Expression)267
Jill Powell
- Chapter 27** Applications of Differential Display in Infectious Diseases277
Irene Bosch, Rajas V. Warke, Marcia F. Fournier, David Magee, and Heather Melichar
- Chapter 28** Restriction Endonucleolytic Analysis of Differentially Expressed
Sequences: READS287
Yerramilli V. B. K. Subrahmanyam and Sherman M. Weissman
- Chapter 29** Suppression Subtractive Hybridization PCR299
Wan Ji and Li Cai

SECTION III Preparative Application

Amplification of Unknown Sequences

- Chapter 30** PCR-Based Techniques for Cloning an Unknown DNA Fragment Adjacent
to a Known Integrant313
Eric Ka-Wai Hui and Szecheng J. Lo
- Chapter 31** Chromosome Walking by Inverse PCR.....323
Jorge A. Garcés, Selwyn A. Williams, and Ray H. Gavin
- Chapter 32** Long Universal Fast Walking.....329
Kyl V. Myrick

Chapter 33 Cloning of Unknown Virus Sequences by DNase Treatment
and Sequence-Independent Single Primer Amplification337
Tobias Allander, Suzanne U. Emerson, Robert H. Purcell, and Jens Bukh

Amplification of Minute Amounts of Nucleic Acids

Chapter 34 Whole Genome Amplification from Single Cells and Minute DNA Samples349
Dagan Wells and Mercedes G. Bermudez

Chapter 35 Primer Extension Preamplification (PEP) of Single Cells: Efficiency and Bias361
Xiao Yan Zhong, Ying Li, Wolfgang Holzgreve, and Sinuhe Hahn

In Vitro Evolution

Chapter 36 *In Vitro* Evolution through PCR-Mediated Mutagenesis and Recombination371
Sarah B. Faulkner, Heather A. Syrett, Eric A. Davidson, and Andrew D. Ellington

Index381
