Contents

I. Abstracts **10**

J. Antoch: Linear regression with interval data: computational issues 9

I. Bebčáková, J. Talašová: Interactions among criteria as modelled by fuzzified Choquet integral 10

E. Bohanesová: Rate of return in building savings 11

M. Collan: Thoughts about selected models for the valuation of real options 12

J. Dalík, O. Přibyl: Optimal energy transport by advection 13

S. Donevska, E. Fišerová, K. Hron: Compositional aspects of orthogonal regression 14

J. J. Egozcue, V. Pawlowsky-Glahn: The Hilbert space of density functions 15

P. Fiala: Multiobjective De Novo linear programming 16

P. Filzmoser, K. Hron, M. Templ: Discriminant analysis for compositional data and robust parameter estimation 17

E. Fišerová, K. Hron: Various approaches to orthogonal regression . 18

T. Fürst, M. Mistrík: Automatic analysis of digital images originating in quantitative imunorfluorescent analysis of DNA damage markers 19

T. Fürst, R. Vodák, T. Šír, M. Bíl: On the incompatibility of Richards' equation and finger-like infiltration in unsaturated homogeneous porous media 20

R. Harman, V. Lacko: Algorithms for uniform sampling from n-spheres and n-balls 21

J. Haslinger: Free material optimization 22

J. Hefty, L. Gerhátová: Combination of 3D epoch-wise and permanent geodetic networks observed by global navigation satellite systems 23

P. Holeček, J. Talašová: The software support for fuzzy multiple-criteria evaluation 24

K. Hornišová: Relative influence of copula and marginals on performance of calibration methods 25

I. Horová: Multivariate kernel density estimates 26

K. Hron, E. Fišerová, P. Filzmoser, M. Templ: On the interpretation of orthonormal coordinates for compositional data with applications 27

J. Jablonský: AHP model for ranking of efficient units in DEA models 28

T. Jurczyk: Trimmed estimators in regression framework 29

L. Jüttner: Automotive lighting with improved luminous homogeneity 30

J. Kalina: Least weighted squares applied to robust image analysis . 31

M. Kalina: Evaluation of granules of a fuzzy relation by integrals . . 32

B. Kratochvílová, V. Beneš, D. Klement: Stochastic modelling of neuron activity 33

L. Kubáček, E. Tesaříková: The type A uncertainty 34

L. Kubáček, J. Vrbková: Comments to the Lineweaver–Burke transformation 35
R. Kučera: On optimization algorithms for solving contact problems 36
P. Lachout: Law of large numbers in L_2 37
T. Ligurský, Y. Renard: Computing non-unique solutions of quasi-static contact problems with coulomb friction 38
J. Machalová, H. Netuka: Consider Brouwer 39
J. Machalová, H. Netuka: Linear beams on nonlinear foundation . . 40
M. Mareš: Information measure for vague symbols 41
R. Mesiar: Copulas and their applications in multicriteria decision support 42
J. Michaliková, R. Harman: On criterion robust designs for experiments with blocks of size two 43
M. Mojzeš: Physical heights determination by satellite and gravity measurements 44
I. Moll, K. Myšková, P. Moll: Equidistant general exponential analysis with some known exponents 45
O. Nánásiová, Ľ. Valášková: Applications of bivariable functions on quantum logics 46
O. Nánásiová, E. Pastuchová, Š. Václavíková, M. Sabo: Classification of association coefficients and its application in cluster analysis . 47
M. Navara: Several definitions of probability on systems of fuzzy sets 48
R. Navrátil: Rank tests of symmetry and R-estimation of location parameter under measurement errors 49
V. Novák: Higher-order fuzzy logic 50
O. Pavlačka: Fuzzy extension of the weighted average operation and defuzzification of the resulting fuzzy number 51
A. Pázman: Strange design points in linear regression 52
I. Perfiljeva: F-transform—a new paradigm in fuzzy modeling . . . 53
L. Radová, O. Slabý, M. Hajdúch: Statistical analysis of high-dimensional data in cancer research 54
J. Ramík: Interval and fuzzy linear programming (demonstrated by example) 55
A. Ruiz-Gazen: Exploratory projection pursuit: a review and new proposals 56
J. Stoklasa: Disaster decision making support a linguistic fuzzy model for the emergency medical rescue services 57
R. Šimeček: A note on design optimization of a beam: Algebraic sensitivity analysis 58
J. Talašová, J. Stoklasa, J. Šanovec: Mathematical models of academic staff performance evaluation 59
Z. Talašová: The application of linguistic fuzzy models to the analysis of Adolf Loos' villas 60
M. Templ, A. Alfons, P. Filzmoser, J. Holzer: Estimation of social inclusion indicators with bounded influence of incomes by tail modeling 61

V. Todorov: Robust multivariate analysis in R 62
P. Tuček, V. Pechanec, Z. Janoška, J. Caha, P. Samec, J. Bojko: Delimitation of forest health zones using multivariate statistical analysis 63
M. Tučková, J. Tuček, L. Kubáček: Statistical processing and design of experiment of ϵ-Fe_2O_3 hysteresis loops 64
O. Vencálek: Concept of data depth and depth based classification . 65
R. Viertl: Fuzzy information in statistics 66
M. Vlach: Principles of collective decisions 67
J. Volaufová: On testing problems in linear models with variance-covariance components 68
G. Wimmer, V. Witkovský, G. Wimmer jr.: Continuation of Professor Kubáček's research work: some miscellaneous examples 69
K. Zimmermann: Properties and applications of (max,min)-linear equations and inequalities 70
P. Ženčák, R. Kučera: The preconditioning of linear systems in interior point method 71
I. Žežula, D. Klein: Overview of recent results in multivariate linear models 72

II. Professor Kubáček celebrating his 80th birthday **73**

M. Hušková, J. Volaufová: Profesor Lubomír Kubáček osemdesiatnik 77
Memories and congratulations 79

III. List of Participants **97**
