

CONTENTS

1. Embryology of the Reproductive Tract	1	4. Disorders of Sex Development	57
Development of the Ovary	2-4	Maturation of Germ Cells: Meiosis	58
Development of Uterus and Fallopian Tubes	5, 6	Genetic Abnormalities	59-61
Development of External Genitalia	7, 8	Congenital Abnormalities	62, 63
Development of Male External Genitalia	9	Abnormalities of Ovary and Tube	64
		Abnormalities of the Uterus	65, 66
		Abnormalities of the Vagina	67
		Abnormalities of the Vulva	68
2. Anatomy of the Reproductive Tract	11	5. History and Examination	69
The Perineum	12	Taking the History	70, 71
The Vulva	13, 14	Pelvic Pain	72, 73
Bartholin's Gland	15	Other Gynaecological Symptoms	74
Muscles of the Perineum	16	Abdominal Examination	75-77
The Urogenital Diaphragm	17	Examination of the Vulva	78
Ischiorectal Fossa	18	Bimanual Pelvic Examination	79
Muscles of the Pelvis	19	Speculum Examination	80, 81
Pelvic Diaphragm	20	Examination of the Breasts	82
Pelvic Fascia	21	Laparoscopy	83-85
The Vagina	22-24	6. Abnormalities of Menstruation	87
Uterus	25-31	Normal and Physiological Changes in the Menstrual Cycle	88
Fallopian Tube	32	Physiological Amenorrhoea	89
Broad Ligament	33	Uterine and Lower Genital Tract Disorders	90, 91
Ovary	34-37	Ovarian Disorders	92-96
Changes in the Genital Tract with Age	38	Pituitary Disorders	97-100
Blood Supply of the Pelvis	39-41	Hypothalamic Disorders	101
Lymphatic Drainage of the Genital Tract	42	Investigation of Amenorrhoea	102-104
Nerves of the Pelvis	43	Hirsutism	105
Autonomic Nerve Supply of the Pelvis	44	Virilisation	106
		Management of Hirsutism	107, 108
3. Physiology of the Reproductive Tract	45	Menstrual Disorder	109
Ovulation	46-50	Dysfunctional Uterine Bleeding	110
Cyclical Ovarian Hormonal Changes	51	Investigation of the Endometrium	111, 112
Action of Ovarian Hormones	52	Investigations of Endometrium - Complications	113
Effects of Ovarian Hormones	53	Management of Heavy Menstrual Bleeding	114-119
Puberty	54	Dysmenorrhoea	120, 121
The Menopause	55		

Adenomyosis	122	Premalignant and Malignant Cervical Disease	178
Endometriosis	123–128	Colposcopy	179
Premenstrual Syndrome	129, 130	Treatment of Cervical Intraepithelial Neoplasia	180–182
7. Gynaecological Infections	131	Carcinoma of the Cervix	183–185
Inflammation in the Lower Gynaecological Tract	132	Diagnosis of Cervical Carcinoma	186
Vulval Inflammation	133	Staging of Cervical Carcinoma	187, 188
Vaginal Discharge and Infection	134	Radiotherapy and Chemotherapy in Cervical Carcinoma	189
Complaints of Vaginal Discharge	135	Surgery for Cervical Carcinoma	190–193
Vaginal Discharge	136–138	11. Diseases of the Uterus	195
Vaginitis	139	Uterine Polyps	196
Genital Herpes	140	Fibroids	197–200
Genital Warts	141	Endometrial Hyperplasia	201, 202
Bacterial Infections	142	Carcinoma of the Endometrium	203, 204
Tropical Sexually Transmitted Infections	143	Staging of Endometrial Carcinoma	205
Gonorrhoea	144	Spread of Endometrial Carcinoma	206
Syphilis	145–147	Aetiological Factors in Endometrial Carcinoma	207
Physiological Variation of the Cervix	148	Prognosis of Endometrial Carcinoma	208
Pelvic Inflammatory Disease	149, 150	Treatment of Endometrial Carcinoma	209
Genital Tuberculosis	151, 152	Recurrence of Endometrial Carcinoma	210
Human Immunodeficiency Virus	153, 154	Sarcoma of the Uterus	211, 212
8. Diseases of the Vulva	155	12. Prolapse and Urogynaecology	213
Vulval Dermatoses	156, 157	Retroversion of the Uterus	214, 215
Benign Tumours of the Vulva	158	Uterovaginal Prolapse	216, 217
Vulval Intraepithelial Neoplasia	159	Vaginal Prolapse	218, 219
Carcinoma of the Vulva	160–164	Clinical Features of Prolapse	220
Diseases of the Urethra	165	Differential Diagnosis of Prolapse	221
9. Diseases of the Vagina	167	Pessary Treatment	222
Benign Vaginal Disease	168	Anterior Colporrhaphy (and Repair of Cystocele)	223, 224
Malignant and Premalignant Disease	169	Manchester Repair	225, 226
Carcinoma of the Vagina	170, 171	Posterior Colpoperineorrhaphy (Including Repair of Rectocele)	227
Plastic Surgery of the Vagina	172	Repair of Enterocele	228
10. Diseases of the Cervix	173	Vaginal Hysterectomy	229, 230
Normal Cervical Epithelium	174	Urogynaecology	231, 232
The Role of Human Papilloma Virus in Cervical Disease	175	Blood Supply of the Ureter	233
Screening for Cervical Cancer	176		
Cervical Smears	177		

Physiology of Micturition	234, 235	14. Complications of	
Mechanism of Voiding	236	Gynaecological Surgery	287
Detrusor Instability	237	Urinary Tract Injuries	288
Genuine Stress Incontinence	238	Injury to the Ureter	289
Other Incontinence Mechanisms	239	Management of Ureteric Injury	290, 291
The Urethral Syndrome	240	Fistula Formation	292, 293
Investigation of Incontinence	241	Lymphoedema and Lymphocyst	294
Urodynamic Investigation of Bladder		Venous Thrombosis	295–297
Function	242	Clinical Features of Deep Venous	
Thrombosis		Thrombosis	298
Indications for Urodynamic		Investigations for Deep Venous	
Assessment	243	Thrombosis	299
Treatment of Stress Incontinence	244	Methods of Thromboprophylaxis	300, 301
Surgical Treatment of Stress		Pulmonary Embolism	302–304
Incontinence	245	Treatment of Pulmonary Embolus	305
Marshall–Marchetti–Krantz		Mortality	306
Urethropexy	246		
Burch's Colposuspension		15. Early Pregnancy	307
Operation	247	Miscarriage	308, 309
Sling Procedures	248	Management	310–313
Treatment of Detrusor Instability	249	Recurrent Miscarriage	314–316
		Termination of Pregnancy	317–319
13. Diseases of the Ovary and		Ectopic Pregnancy	320
Fallopian Tube	251	Diagnosis of Tubal Pregnancy	321, 322
Clinical Features of Ovarian		Sites of Implantation	323
Tumours	252–254	Treatment of Tubal Pregnancy	324
Differential Diagnosis	255–258	Gestational Trophoblastic	
Ovarian Cyst Accidents	259–261	Disease	325–330
Benign and Malignant Ovarian			
Tumours	262, 263	16. Sexuality and Contraception	331
Risk Factors of Ovarian Cancer	264	Physiology of Coitus	332, 333
Epithelial Ovarian Tumours	265, 266	Dyspareunia	334
Germ Cell Ovarian Tumours	267–270	Sexual Problems Affecting the Male	335
Hormone-Producing Tumours	271–274	Treatment Options for Erectile	
Other Hormone-Producing		Dysfunction	336
Tumours	275	Medico-Legal Problems	337
Surgical Treatment of Ovarian		Methods of Contraception	338, 339
Tumours	276	Hormonal Contraception	340, 341
Treatment of Ovarian		Minor Side Effects of OCs	342
Cancer	277, 278	Oral Contraception: Risks	343–345
Staging of Ovarian Cancer	279, 280	Intrauterine Devices (IUDs)	346, 347
Principles of Chemotherapy	281	Complications of Intrauterine Devices	348
Chemotherapeutic Agents in Ovarian		Diaphragms and Caps	349
Cancer	282	Condoms	350
Broad Ligament Cysts	283, 284		
Carcinoma of Fallopian Tubes	285		

Contraception Based on Time of Ovulation	351	Assisted Conception	370
Postcoital Contraception	352	Fertility Drugs	371, 372
Irreversible Methods	353, 354	Tubal Surgery	373
Laparoscopic Sterilisation	355	Assisted Conception Techniques	374-379
Vasectomy	356	Assisted Conception	380
17. Infertility	357	18. The Menopause	381
Infertility	358, 359	The Menopause	382, 383
Investigations	360	The Greene Climacteric Scale	384
Evidence of Ovulation	361-363	Changes in the Genital Tract	385
Seminal Analysis	364	Osteoporosis	386-388
Sperm Production Tests	365	Cardiovascular Disease and the Menopause	389, 390
Abnormalities in Sperm Production	366	Hormone Replacement Therapy	391-393
Sperm Function Tests	367	Index	395
Tests of Tubal Patency	368, 369
