Introduction: the importance of quantitative genetics in understanding evolutionary processes	57
List of Authors	xii
<b>1 The study of quantitative genetics in wild populations</b>	1
Loeske E. B. Kruuk, Anne Charmantier and Dany Garant	
<b>2 Four decades of estimating heritabilities in wild vertebrate populations: improved methods, more data, better estimates?</b>	16
Erik Postma	
<b>3 Quantitative genetic approaches to understanding sexual selection and mating system evolution in the wild</b>	34
Jane M. Reid	
<b>4 Individual behaviour: behavioural ecology meets quantitative genetics</b>	54
Niels J. Dingemanse and Ned A. Dochtermann	
<b>5 The quantitative genetics of senescence in wild animals</b>	68
Anne Charmantier, Jon E. Brommer and Daniel H. Nussey	
<b>6 The effects of others' genes: maternal and other indirect genetic effects</b>	84
Andrew G. McAdam, Dany Garant and Alastair J. Wilson	
<b>7 Dominance genetic variance and inbreeding in natural populations</b>	104
Matthew E. Wolak and Lukas F. Keller	
<b>8 Cross-pollination of plants and animals: wild quantitative genetics and plant evolutionary genetics</b>	128
John R. Stinchcombe	
<b>9 Quantitative genetics of wild populations of arthropods</b>	147
Felix Zajitschek and Russell Bonduriansky	
<b>10 Case study: quantitative genetics and sexual selection of weaponry in a wild ungulate</b>	160
Loeske E. B. Kruuk, Tim Clutton-Brock and Josephine M. Pemberton	

<b>11</b>	<b>Epigenetic processes and genetic architecture in character origination and evolution</b>	<b>177</b>
	Alexander V. Badyaev and J. Bruce Walsh	
<b>12</b>	<b>Evolutionary potential and constraints in wild populations</b>	<b>190</b>
	Céline Teplitsky, Matthew R. Robinson and Juha Merilä	
<b>13</b>	<b>Molecular quantitative genetics</b>	<b>209</b>
	Henrik Jensen, Marta Szulkin and Jon Slate	
<b>14</b>	<b>Bayesian approaches to the quantitative genetic analysis of natural populations</b>	<b>228</b>
	Michael B. Morrissey, Pierre de Villemereuil, Blandine Doligez and Olivier Gimenez	
<b>15</b>	<b>Evolutionary dynamics in response to climate change</b>	<b>254</b>
	Phillip Gienapp and Jon E. Brommer
