City of Birmingham Touring Opera & Birmingham Contemporary Music Group

Tempter **Ivan Sharpe**

Father **Charles Johnston**

Elder son **Quentin Hayes**

Younger son **Andrew Burden**

Musical direction **Simon Halsey**

CD-ROM

Interactive Listening Guide

You can use this disc exactly as a normal audio CD on your hi-fi. It also contains a multimedia program for Windows PCs featuring an interactive listening guide to the music on this CD and useful background articles. You can run this on a suitably equipped PC to read and learn about the music while listening to it.

To run the disc, insert it into your PC. On Windows 95 PCs with autoplay, the program will start automatically. On other PCs, choose the Run menu option from the Windows 95 Start menu (or, in Windows 3.x, from the Program Manager File menu). Then type d:\START and press Return. Change the d: to the relevant letter if your CD-ROM is not drive D.

CD-Extra is a relatively new format and not all PCs will be able to use this disc. If your PC does not read the disc at all or only sees it as an audio CD, your CD-ROM drive may not be appropriate or you may need to update your CD-ROM driver software. If the program appears to run correctly but you do not hear music, your PC may not be set up for CD audio. You
