List of contributors	ix
List of tables, boxes and figures	x
List of abbreviations	xiii
Glossary	xvi
Preface	xviii
Chapter 1 A framework for thinking about health system efficiency	1
<i>Jonathan Cylus, Irene Papanicolas, Peter C. Smith</i>	
1.1 Why is health sector efficiency important?	1
1.2 What is inefficiency?	2
1.3 Allocative inefficiency	4
1.4 Technical inefficiency	6
1.5 An analytical framework for thinking about efficiency indicators	10
1.6 Concluding comments	18
References	20
Chapter 2 Measuring and comparing health system outputs: using patient classification systems for efficiency analyses	21
<i>Wilm Quentin, Alexander Geissler, Reinhard Busse</i>	
2.1 Introduction: what are the benefits of classifying patients into groups?	21
2.2 DRG systems in Europe: background and definitions	23
2.3 Application of DRGs: indicators of efficiency	27
2.4 Patient classification systems for other areas of health care	35
2.5 Conclusion: advantages and limitations of patient classification systems	44
References	48
Chapter 3 Using registry data to compare health care efficiency	53
<i>Reijo Sund and Unto Häkkinen</i>	
3.1 Introduction	53
3.2 Using registry data to define episodes of care	54
3.3 Constructing indicators based on episodes of care	56
3.4 Comparing provider performance: the need for risk adjustment	61

3.5 Adjustment techniques	64
3.6 Examples of efficiency considerations	64
3.7 International comparisons	66
3.8 The EuroHOPE project	67
3.9 The EuroREACH diabetes case study	70
4.0 Conclusions	72
References	73
Chapter 4 Management accounting and efficiency in health services: the foundational role of cost analysis	75
<i>Christopher S. Chapman, Anja Kern, Aziza Laguecir and Wilm Quentin</i>	
4.1 Introduction	75
4.2 Analysing the challenge of cost system design	78
4.3 Demonstrating cost system design choices with two detailed examples	83
4.4 The role of cost data in delivering efficient health care	90
4.5 Cost data and support of local clinical and managerial decision-making	93
4.6 Conclusions	97
References	98
Chapter 5 Health system efficiency: measurement and policy	99
<i>Bruce Hollingsworth</i>	
5.1 Introduction: data envelopment analysis and stochastic frontier analysis	99
5.2 Efficiency measurement methods	100
5.3 The application of DEA	105
5.4 Setting out the protocol	109
5.5 Conclusions	113
References	113
Chapter 6 Cost-effectiveness analysis	115
<i>Ranjeeta Thomas and Kalipso Chalkidou</i>	
6.1 Introduction	115
6.2 Cost-effectiveness analysis: an overview of its strengths and weaknesses	116
6.3 Methodological issues in the use of economic evaluations at the micro level	119
6.4 Cost-effectiveness analysis as a measure of organizational and system efficiency	123
6.5 Methodological and informational challenges	124
6.6 Cost-effectiveness analysis in policy: present and future	129
6.7 Conclusion	134
References	135

Chapter 7 Cross-national efficiency comparisons of health systems, subsectors and disease areas	139
<i>Jonathan Cylus and Mark Pearson</i>	
7.1 Introduction: the basis for interest in cross-country efficiency comparisons	139
7.2 Cross-country databases containing health system efficiency metrics	141
7.3 Multicountry health care efficiency studies at the system, subsector and treatment levels	147
7.4 Key progress and remaining challenges	159
7.5 Conclusion	164
References	164
Chapter 8 Efficiency measurement for policy formation and evaluation	167
<i>Anita Charlesworth, Zeynep Or and Emma Spencelayh</i>	
8.1 Introduction	167
8.2 The definition of public health basket and regulation of reimbursement	169
8.3 Cost sharing arrangements	175
8.4 Hospital organization	180
8.5 Provider payment	184
8.6 Public reporting of health care data	190
8.7 Conclusion	194
References	197
Chapter 9 Efficiency measurement for management	203
<i>Alec Morton and Laura Schang</i>	
9.1 Introduction	203
9.2 Who are managers?	204
9.3 Frameworks for analysis	206
9.4 Managerial roles for efficiency analysis in intelligence, design and choice	208
9.5 Recommendations for practice	218
9.6 Conclusion	222
References	223
Chapter 10 Conclusions	225
<i>Jonathan Cylus, Irene Papanicolas, Peter C. Smith</i>	
10.1 Introduction	225
10.2 Revisiting the analytical framework: key challenges of efficiency measurement	226
10.3 The role of simple metrics	231
10.4 Promising opportunities for efficiency measurement	236
10.5 Concluding remarks	240
References	242
